

PRIOR AUTHORIZATION CRITERIA Effective 3/11/2024

Field Name	Field Description	
Prior Authorization Group	Oncology Drugs	
Drugs	Oncology Medications and Oncology Gene Therapies (specialty or non-specialty) without product specific criteria when requested for an oncology diagnosis	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert, and/or per the National Comprehensive Cancer Network (NCCN)	
Exclusion Criteria	N/A	
Required Medical Information	See "Other Criteria"	
Age Restrictions	N/A	
Prescriber Restrictions	Prescriber is an oncologist, or specialist in type of cancer being treated	
Coverage Duration	If the criteria are met, the request will be approved for up to 6 month duration.	
Other Criteria	All of the following criteria must be met:	
	 Requested use must be a labeled indication or be supported by NCCN Category 1 or 2A level of evidence. If the request is for an off-label use supported by NCCN as Category 2B recommendation then medical documentation has been provided as to why member is unable to utilize a treatment regimen with a higher level of evidence (e.g. allergic reaction, contraindication) Documentation has been provided of the results of all required genetic testing where required per product package insert Documentation has been provided of the results of all required laboratory values and patient specific information (e.g. weight, ALT/AST, Creatine Kinase, etc.) necessary to ensure the patient has no contraindications to therapy per product package insert The product is being prescribed at a dose that is within FDA approved/NCCN guidelines. Requests to initiate therapy with an oral brand drug with a therapeutically equivalent (AB-rated) generic drug currently available, will require a 30-day trial and failure or documented medical reason for not using, the generic equivalent drug If the request is for a reference biologic drug with either a biosimilar or interchangeable biologic drug currently available, documentation of one of the following: 	

0	The provider has verbally or in writing submitted a
	member specific reason why the reference biologic is
	required based on the member's condition or treatment
	history; AND if the member had side effects or a
	reaction to the biosimilar or interchangeable biologic,
	the provider has completed and submitted an FDA
	MedWatch form to justify the member's need to avoid
	these drugs. The MedWatch form must be included with
	the prior authorization request
0	The currently available biosimilar product does not have
	the same appropriate use (per the references outlined in

requested

Revision/Review 1/2024

Form FDA 3500 – Voluntary Reporting

"Covered Uses") as the reference biologic drug being

• If the request is for abiraterone (Zytiga) 500 mg tablet, a documented medical reason why two tablets of generic abiraterone acetate 250 mg cannot be used

Prior Authorization	Medications without Drug or Class Specific Criteria	
Group Description		
Drugs	 Medications without drug or class specific prior authorization criteria Brand drugs and reference biologics when a therapeutic equivalent generic drug or biosimilar/interchangeable biologic is available 	
	The Oncology Drugs prior authorization criteria will be applied to oncology drugs without drug or class specific criteria	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "other criteria"	
Age Restrictions	According to package insert	
Prescriber Restrictions	N/A	
Coverage Duration	If the criteria is met, the request will approved for up to 12 months (depending on the diagnosis and usual treatment duration).	
Other Criteria	Initial Authorization:	
	All Requests:The drug is requested for an appropriate use (per the	
	references outlined in "Covered Uses"	
	• The dose requested is appropriate for the requested use (per the references outlined in "Covered Uses")	
	Patient meets one of the three following criteria:	
	O Documented trial and failure or intolerance with up to two alternative preferred medications appropriate for the requested use (per the references outlined in "Covered Uses" or has a medical reason why these drug(s) cannot be used [e.g. intolerance, contraindication]). For medications where there is only one preferred agent, only that agent must have	
	been ineffective or not tolerated. O No other preferred medication has a medically accepted use for the patient's specific diagnosis as referenced in the medical compendia.	
Revision/Review Date 10/2023	o All other preferred medications are contraindicated based on the patient's diagnosis, other medical conditions, or other medication therapy.	

Brand drugs with a therapeutically equivalent (A-rated) generic drug currently available:

• The provider either verbally or in writing has submitted a medical or member specific reason why the brand name drug is required based on the member's condition or treatment history; **AND** if the member had side effects or a reaction to the generic drug, the provider has completed and submitted an FDA MedWatch form to justify the member's need to avoid this drug. The MedWatch form must be included with the prior authorization request

Form FDA 3500 – Voluntary Reporting

Reference biologic drugs with either a biosimilar or interchangeable biologic drug currently available:

- The prescriber has verbally or in writing submitted a medical or member specific reason why the reference biologic is required based on the member's condition or treatment history; AND if the member had side effects or a reaction to two (if available) biosimilar or interchangeable biologics, the provider has completed and submitted an FDA MedWatch form to justify the member's need to avoid these drugs. The MedWatch form must be included with the prior authorization
- The currently available biosimilar product(s) does not have the same appropriate use (per the references outlined in "Covered Uses") as the reference biologic drug being requested

Form FDA 3500 – Voluntary Reporting

Reauthorization:

- Documentation of provider attestation that demonstrates a clinical benefit
- The requested drug is for a medically accepted dose as outlined in Covered Uses

Field Name	Field Description
Prior Authorization Group Description	Prior Authorization Exception Criteria
Covered Uses Scope	All medically accepted indications. Medically accepted indications are defined using the following compendia resources: the Food and Drug Administration (FDA) approved indication(s) (Drug Package Insert), American Hospital Formulary Service Drug Information (AHFS-DI), and DRUGDEX Information System. The reviewer may also reference disease state specific standard of care guidelines. Requests for exception to the drug's prior authorization criteria
Беоре	requirements
Coverage Duration	12 months
Criteria	 The provider either verbally or in writing has submitted a medical or member specific reason why prior authorization criteria all or in part is not applicable to the member. Medical and/or member specific reasons may include but are not limited to: Uniqueness of the member's condition or other physical characteristics of the member's condition. Psychiatric, intellectual, physical, cultural, and/or linguistic characteristics of the member which may inhibit the provider from obtaining all necessary prior authorization criteria requirements. Medical Director/clinical reviewer may override criteria when, in his/her professional judgement, the requested item is medically
	necessary.
Revision/Review Date:	10/2023

Field Name	Field Description	
Prior Authorization Group Description	Quantity Limit Exception Criteria	
Covered Uses	All medically accepted indications. Medically accepted indications are defined using the following compendia resources: the Food and Drug Administration (FDA) approved indication(s) (Drug Package Insert), American Hospital Formulary Service Drug Information (AHFS-DI), and DRUGDEX Information System. The reviewer may also reference disease state specific standard of care guidelines.	
Scope	Requests for formulary drugs exceeding the health plan's published quantity limits	
Criteria	 The provider has submitted a medical reason why the plan's quantity limit will be inadequate based on the member's condition and treatment history. AND one of the following: The member has a documented treatment failure with the drug prescribed at the health plan's quantity limit AND the dose requested is supported by the Medical Compendia or current treatment guidelines. The member requires a dose within prescribing guidelines that exceeds the plan's quantity limit. Medical Director/clinical reviewer may override criteria when, in his/her professional judgement, the requested item is medically necessary. 	
Coverage Duration	12 Months	
Revision/Review Date	10/2023	

Field Name	Field Description	
Prior Authorization Group Description	Safety Edit Exception Criteria	
Covered Uses	All medically accepted indications. Medically accepted indications are defined using the following compendia resources: the Food and Drug Administration (FDA) approved indication(s) (Drug Package Insert), American Hospital Formulary Service Drug Information (AHFS-DI), and DRUGDEX Information System. The reviewer may also reference disease state specific standard of care guidelines.	
Scope	 Requests for formulary drugs and for previously approved nonformulary drugs: Exceeding the Food and Drug Administration (FDA) or compendia max dose recommendations Exceeding the FDA dosing or compendia administration frequency recommendations Exceeding the FDA or compendia duration of therapy recommendations Duplication of therapy error at Point of Service (POS) Age Restriction error at POS Day Supply Limit error at POS Concurrent Use error at POS Drug Drug Interaction error at POS 	
Criteria	Exceeding the Food and Drug Administration (FDA) or compendia maximum dose, administration frequency or duration of therapy recommendations. • The member must have a documented treatment failure with the drug at the maximum dose based on patient age/weight, administration frequency, or duration of therapy per FDA or compendia. AND • The provider must submit a medical reason why the maximum dose, administration frequency or duration of therapy needs to be exceeded based on the member's condition or treatment history. Duplication of therapy Transition from one agent to another • If a provider has outlined a plan to transition a member to a similar drug or provided a dose titration schedule, the requested drug is approved for one month*.	
	Concurrent Therapy with two similar agents	

	 The provider must submit a medical reason why treatment with more than one drug in the same class is required based on the member's condition and treatment history. OR The provider must submit disease state specific standard of care guidelines supporting concurrent therapy.
	Age Restriction
	The provider must submit a medical reason why the drug is needed for a member whose age is outside of the plan's minimum or maximum age limit. AND
	The indication and dose requested is supported by the Medical Compendia or current treatment guidelines.
	Day Supply Limit
	An additional fill exceeding the day supply limit is needed based on a dose increase or is needed to achieve a total daily dose
	 The provider must submit a medical reason why an additional fill is needed outside of the plan's day supply limit. AND The indication and dose requested is supported by the FDA, Medical Compandia or current treatment guidelines
	Medical Compendia or current treatment guidelines.
	 Concurrent Use/Drug Interaction The provider must submit a medical reason why treatment with both drugs is necessary for the member AND
	The increased risk for side effects when taking the drugs together has been discussed with the member
	Medical Director/clinical reviewer may override criteria when, in his/her professional judgement, the requested item is medically necessary.
Coverage Duration	*One month approval for Duplication of therapy when transitioning from one agent to another and Day Supply Limit due to a dose increase. All Other Scenarios: 12 months
Revision/Review Date: 10/2023	

Field Name	Field Description
Prior Authorization Group Description	Step Therapy Exception Criteria
Covered Uses	All medically accepted indications. Medically accepted indications are defined using the following compendia resources: the Food and Drug Administration (FDA) approved indication(s) (Drug Package Insert), American Hospital Formulary Service Drug Information (AHFS-DI), and DRUGDEX Information System. The reviewer may also reference disease state specific standard of care guidelines.
Scope	Requests for drugs on the plan's formulary with a step therapy restriction which do not meet step therapy requirements
Criteria	Requests for drugs on the plan's formulary with a step therapy restriction which do not meet step therapy requirements will be considered when the provider verbally or in writing has submitted a medical reason why: • Required step therapy drug(s) would be ineffective, or; • Required step therapy drug(s) have the potential to cause harm or deterioration of the member's condition, or; • The requested drug would be superior to the required prerequisite trial(s) with preferred drug(s). Medical Director/clinical reviewer may override criteria when, in his/her professional judgement, the requested item is medically necessary.
Coverage Duration	12 Months
Revision/Review Date:	10/2023

Field Name	Field Description	
Prior Authorization Group Description	Off-Label Uses Criteria	
Drugs	Medications with off-label uses	
Covered Uses	Off-label uses: Medically accepted indications are defined using the	
	following sources: American Hospital Formulary Service-Drug	
	Information (AHFS-DI), Truven Health Analytics Micromedex	
	DrugDEX (DrugDEX), National Comprehensive Cancer Network	
	(NCCN) Drugs and Biologics Compendium, Wolters Kluwer Lexi-	
	Drugs, and Elsevier/Gold Standard Clinical Pharmacology and/or	
	positive results from two peer-reviewed published studies.	
Exclusion Criteria	N/A	
Required Medical Information	See "other criteria"	
Age Restrictions	N/A	
Prescriber Restrictions	N/A	
Coverage Duration	If the criterion is met, the request will be approved for up to a 12 month duration (depending on the diagnosis and usual treatment duration).	
Other Criteria	Authorization:	
	1. One of the following:	
	a. Patient has had a documented trial and or intolerance	
	with up to two preferred medications used to treat the	
	documented diagnosis, or for medications where	
	there is only one preferred agent, only that agent must	
	have been ineffective or not tolerated.	
	b. No other formulary medication has a medically	
	accepted use for the patient's specific diagnosis as	
	referenced in the medical compendia	
	AND	
	2. One of the following:	
	a. Medication is being requested for an accepted off-	
	label use and is listed in the standard clinical decision	
	support resources (as noted in Covered Uses section above)	
	b. Requested use can be supported by at least two	
	published peer reviewed clinical studies	
	AND	

	Medication is being requested at an appropriate dose per literature
Revision/Review Date	
4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is
	medically necessary.

Prior Authorization Group Description	5-Hydroxytryptamine-3 Serotonin Receptor Antagonists (5-HT3 RA), Substance P/Neurokinin 1 Receptor Antagonists (NK1 RA), and Combination Agents	
	 Preferred: ondansetron (Zofran) tablet, orally disintegrating tablet (ODT), oral solution 	
	 Non-Preferred: granisetron (Kytril) oral tablet, IV solution Sustol (granisetron ER) SQ injection Sancuso (granisetron ER) transdermal patch 	
Drugs	 ondansetron (Zofran) IV solution, injection (IV/SQ) Zuplenz (ondansetron) oral film 	
-	 palonosetron (Aloxi) 0.25 mg/2 mL IV solution dolasetron (Anzemet) oral tablet 	
	 Cinvanti (aprepitant) IV emulsion Varubi (rolapitant) oral capsule, IV emulsion aprepitant (Emend) oral capsule 	
	 Emend (fosaprepitant) IV emulsion Akynzeo (palonosetron/netupitant) oral capsule, IV solution 	
	Any other newly marketed agent in the class Medically accepted indications are defined using the following sources:	
Covered Uses	the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).	
Exclusion Criteria	None	
Required Medical Information	See "Other Criteria"	
Age Restrictions	None	
Prescriber Restrictions	Prescribed by a specialist in the field to treat the patient's respective medical condition	
Coverage Duration	If all of the conditions are met, the request will be approved for up to 6 months or as long as recommended by the medical compendium and/or per the NCCN/ASCO standard of care guidelines.	
Other Criteria	 The medication is being requested for a Food and Drug Administration (FDA) approved indication or a medical condition that is supported by the medical compendium, the National Comprehensive Cancer Network (NCCN), and/or American Society of Clinical Oncology (ASCO) standard of care guidelines for antiemetic therapy. The requested dosing of the 5-HT3 RA and/or NK1 RA is within FDA approved, NCCN/ASCO or other medical compendia standard of care guidelines Patients meeting one of the following criteria may receive the generic 5-HT3 RA palonosetron hydrochloride without prior trial and failure of ondansetron: 	

	 Adult patients receiving an antineoplastic agent with HIGH or MODERATE emetic risk per the NCCN Practice Guidelines Pediatric patients receiving an antineoplastic agent with HIGH emetic risk per the NCCN Practice Guidelines who are unable to receive dexamethasone For all other patients, if the medication request is for a non-preferred
Revision/Review Date: 10/2023	drug: O The patient has a documented treatment failure after receiving an adequate trial of ondansetron tablets and/or has a documented medical reason (intolerance, hypersensitivity, contraindication, etc.) for not utilizing ondansetron tablets to treat their medical condition.
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Acute Migraine Treatments	
Drugs	Preferred: Nurtec ODT (rimegepant) – If the request is for migraine prevention please refer to the Calcitonin Gene-Related Peptide (CGRP) Antagonists for Headache Prevention criteria Non-preferred: Reyvow (lasmiditan) Ubrelvy (ubrogepant) any newly marketed treatment for acute migraine	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "Other Criteria"	
Age Restrictions	Member is 18 years of age or older	
Prescriber Restrictions	Prescribed by or in consultation with a neurologist	
Coverage Duration	If all of the criteria are met, the initial request will be approved for 3 months. For continuation of therapy the request will be approved for 6 months.	
Other Criteria	 Initial Authorization: Diagnosis of migraine headache Requested dose is within FDA approved dosing guidelines Documented trial and failure of (or medical justification for not using) two triptan products Attestation the patient was counseled regarding not driving or operating machinery until at least 8 hours after taking each dose (Reyvow only) If the request is for a non-preferred drug, documentation of trial and failure or medical reason for not using a preferred drug. Medication will not be used in combination with another CGRP inhibitor for either acute or preventative treatment of migraine Criteria for Re-Authorization: Documentation of improvement in migraine pain and symptom (s) (e.g., photophobia, nausea, phonophobia) Nurtec ODT QL of 8 units per month. Reyvow QL of 8 units per month. Ubrelvy QL of 16 units per month Criteria for exceeding the quantity limit (note all of the above criteria must also be 	
	met)	

	 Documented trial and failure (or a medical justification for not using e.g. hypersensitivity, baseline bradycardia or hypotension, adverse events experienced from previous trial, etc.) with at least one drug from two categories below for at
Revision/Review Date: 2/2024	least 4 weeks EACH, at minimum effective doses:
	o Beta-adrenergic blockers o Topiramate or divalproex ER or DR o Amitriptyline or venlafaxine o Frovatriptan, zolmitriptan or naratriptan (for menstrual migraine prophylaxis)
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description	
Prior Authorization Group Description	Corticotropin	
Drugs	Preferred: Cortrophin (corticotropin) Non-Preferred: Acthar (corticotropin)	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "other criteria"	
Age Restrictions	See "other criteria"	
Prescriber Restrictions	See "other criteria"	
Coverage Duration	If the criteria are met, the request will be approved for up to a 1 month duration.	
Other Criteria	 Infantile Spasms (West Syndrome): Patient is < 2 years of age The medication is being prescribed by a neurologist. Documentation of the patient's current weight (in kg) and height/length (in cm) or body surface area (BSA) Multiple Sclerosis: Documentation was submitted that patient is having an acute attack, with neurologic symptoms and increased disability or impairments in vision, strength or cerebellar function, and has failed therapy with intravenous (IV) methylprednisolone, or a medical reason has been submitted why patient is unable to use IV methylprednisolone. The medication is being prescribed by a neurologist If the request is for a non-preferred product, trial and failure of, contraindication to, or medical reason for not using the preferred product 	
	 All Other FDA Approved Conditions and Indications: Documented trial and failure of an IV corticosteroid AND an oral corticosteroid, or documented medical reason for why the patient cannot use these therapies for treatment Documentation was provided that ALL other standard therapies have been used to treat the member's condition as described in the medical compendium (Micromedex, AHFS, Drug Points, and package insert) as defined in the Social Security Act and/or per recognized standard of care guidelines OR there is a documented medical reason (i.e. 	

	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.
Revision/Review Date 7/2023	 medical intolerance, treatment failure, etc.) for why all other standard therapies could not be used to treat the member's condition. Prescriber is a specialist in the condition they are treating. If the request is for a non-preferred product, trial and failure of, contraindication to, or medical reason for not using the preferred product

Prior Authorization		
Group Description	Adakveo (crizanlizumab-tmca)	
Drugs	Adakveo (crizanlizumab-tmca)	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "other criteria"	
Age Restrictions	Member must be 16 years of age or older	
Prescriber Restrictions	Prescriber must be a hematologist or sickle cell specialist	
Coverage Duration	If the criteria are met, requests may be approved for 12 months.	
Other Criteria	 Initial Authorization: Member has a confirmed diagnosis of sickle cell disease Documentation was provided that the member has had 2 or more pain crises in the last 12 months Documentation was provided that the member has been taking hydroxyurea at the maximum tolerated dose and has been compliant within the last 6 months (or a medical reason was provided why the patient is unable to use hydroxyurea) Documentation of the member's current weight Request is for an FDA-approved dose Reauthorization: Documentation has been submitted that the member has demonstrated or maintained ONE of the following changes from baseline: Reduction in pain crises Increased time between crises Decrease in days hospitalized Documentation of the member's current weight Request is for an FDA-approved dose Medical Director/clinical reviewer must override criteria when, in 	
Revision/Review Date: 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.	

Field Name	Field Description
Prior Authorization	Adenosine Triphosphate-Citrate Lyase (ACL) inhibitors
Group Description	Tracinosmic Triphosphace Civiace Lyase (TCL) minorests
Drugs	Nexletol (bempedoic acid)
	Nexlizet (bempedoic acid and ezetimibe)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	None
Required Medical	See "Other Criteria"
Information	
Age Restrictions	18 years or older
Prescriber Restrictions	Prescriber must be a cardiologist or specialist in the treatment of
	lipid disorders
Coverage Duration	If all of the conditions are met, the initial request will be approved
	with a 3-month duration and all reauthorization requests will be
0.1 0.1	approved with a 12-month duration.
Other Criteria	Initial Authorization:
	Member must have documentation of baseline low density linearizing chalacteral (LDL C)
	lipoprotein cholesterol (LDL-C) • One of the following:
	o Member has a diagnosis of heterozygous familial
	hypercholesterolemia (FH)
	o Member has a diagnosis of hyperlipidemia and
	atherosclerotic cardiovascular disease (ASCVD) as
	evidenced by a fasting LDL-C \geq 70 mg/dL and a history of least one of the following:
	Myocardial infarction or acute coronary
	syndrome,
	 Stroke or transient ischemic attack,
	• Coronary artery disease with stable angina,
	Coronary or other arterial revascularization,
	Peripheral vascular disease, orAortic aneurysm
	 Clinically significant congenital heart
	disease (CHD) diagnosed by invasive or
	non-invasive testing (such as coronary
	angiography, stress test using treadmill,
	stress echocardiography, or nuclear imaging)

- Member has tried and failed a high-intensity statin (i.e. atorvastatin 40-80 mg, rosuvastatin 20-40 mg) at maximum tolerated dose for 3 months via claim history or chart notes OR documentation has been provided that the member is not able to tolerate a statin.
- Member has tried and failed ezetimibe at a maximum tolerated dose or documentation has been provided that the patient is not able to tolerate ezetimibe.
- Member will continue on maximum tolerated statin dose while receiving Nexletol/Nexlizet or documentation has been provided that the member is not able to tolerate a statin.
- Documentation was provided indicating provider has counseled member on smoking cessation and following a "heart healthy diet".

Reauthorization:

- Documentation provided that the member has obtained clinical benefit from medication (e.g. LDL-C lowering from baseline)
- One of the following:
 - Member will continue on maximum tolerated statin and ezetimibe dose while receiving Nexletol or documentation has been provided that the member is not able to tolerate a statin and/or ezetimibe.
 - Member will continue on maximum tolerated statin dose while receiving Nexlizet, or documentation has been provided that the member is not able to tolerate a statin

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date 7/2023

Group Description	Field Description Adrenal Enzyme Inhibitors for Cushing's Disease	
1		
Drugs Is	Isturisa (osilodrostat)	
Covered Uses N	Medically accepted indications are defined using the following ources: the Food and Drug Administration (FDA), Micromedex, the Drug Package Insert, and/or per the standard of care guidelines	
	N/A	
Required Medical Information S	See "Other Criteria"	
	Member must be ≥ 18 years of age	
	Prescribed by, or in consultation with, an endocrinologist or other pecialist in the treatment of metabolic disorders	
a	Initial Authorization: If the criteria are met, the request will be approved for a 6-month duration.	
	Reauthorization: If the criteria are met, the request will be approved for a 12-month duration.	
Other Criteria <u>I</u>	<u>nitial Authorization:</u> Member has confirmed diagnosis of Cushing's Disease	
	Pituitary surgery is not an option or has not been curative Provider attests baseline electrocardiogram (ECG) has been obtained and hypokalemia and/or hypomagnesemia has been corrected prior to initiating therapy if present The medication is being prescribed at a dose that is consistent with FDA-approved package labeling, nationally recognized compendia or peer-reviewed literature Documented baseline urinary free cortisol (UFC) test ≥ 1.3upper limit of normal (ULN) □ UFC Normal Range = 3.5-45 mcg/24 hrs (9.66-124.2 nmol/24 hrs) Member has had a documented trial and failure of one of the following: □ ketoconazole □ Metopirone (metyrapone) □ Lysodren (mitotane) □ cabergoline □ Signifor/Signifor LAR (pasireotide) □ etomidate OR Member has a documented medical reason (e.g. contraindication, intolerance, hypersensitivity) as to why these medications cannot be used	

T		4 •
Result	horiza	tion.
ILCUUL	1101124	

- Member has responded to therapy as defined by a documented urinary free cortisol (UFC) test ≤ the upper limit of normal (ULN)
- The medication is being prescribed at a dose that is consistent with FDA-approved package labeling, nationally recognized compendia

Revision/Review Date: 2/2024

Prior Authorization Group Description	Adrenal Enzyme Inhibitors for Cushing's Syndrome
Drugs	Recorlev (levoketoconazole)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Patients with a non-endogenous source of hypercortisolism, such as exogenous source of glucocorticoids or therapeutic use of ACTH. Patient has a diagnosis of pituitary or adrenal carcinoma
Required Medical Information	See "Other Criteria"
Age Restrictions	Per FDA approved package insert
Prescriber Restrictions	Prescriber must be an endocrinologist or in consultation with an endocrinologist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization:
	 Patient has a diagnosis of endogenous Cushing's syndrome. Patient is not a candidate for surgery, surgery is not an option, or prior surgery has not been curative. Documented baseline urinary free cortisol (UFC) test ≥ 1.5 times ULN (within the past 30 days). Patient has tried and failed, or has a medical reason for not using, ketoconazole. Medication is prescribed at an FDA approved dose.
	Re-Authorization:
	 Documentation or provider attestation of positive clinical response (i.e. decrease in urinary free cortisol from baseline.) Medication is prescribed at an FDA approved dose
Revision/Review Date: 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Aduhelm (aducanumab)
Drugs	Aduhelm (aducanumab)
	Initial authorizations and reauthorizations must be approved by a Medical Director
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Patients with moderate to severe Alzheimer's Disease (AD) Patients with neurodegenerative disease caused by a condition other than AD
Required Medical Information	See "Other Criteria"
Age Restrictions	None
Prescriber	Prescriber must be a neurologist
Restrictions	
Coverage Duration	For initial authorization: the request will be approved in accordance with the FDA-indicated titration schedule for up to 6 months For reauthorization: if all of the conditions are met, the request will be approved for 6 months.
Other Criteria	Initial Authorization
	 Diagnosis of mild cognitive impairment (MCI) caused by AD or mild AD as evidenced by at least one of the following: Clinical Dementia Rating Global (CDR-G) score of 0.5
	(very mild dementia)
	 ○ Repeatable Battery for Assessment of Neuropsychological Status (RBANS) delayed memory index (DMI) score ≤ 85 (low average) ○ Mini-Mental State Examination (MMSE) score ≥ 24 (questionably significant impairment) • The request is for an FDA approved dose • Documentation of BOTH of the following: ○ Recent, within past year, positive results for the presence of beta-amyloid plaques on a positron emission tomography (PET) scan or cerebrospinal fluid testing ○ Recent, within past year, baseline Magnetic Resonance Imaging (MRI) scan • Not currently using blood thinners (except aspirin)

 No recent (past 1 year) history of stroke or transient ischemic attack (TIA)

Reauthorization

- The request is for an FDA approved dose
- Provider attestation of safety monitoring and management of amyloid related imaging abnormalities (ARIA) and intracerebral hemorrhage, as recommended per the manufacturer's prescribing information.
- Patient continues to have a diagnosis of mild cognitive impairment (MCI) caused by AD or mild AD consistent with Stage 3 or Stage 4 Alzheimer's disease as evidenced by at least one of the following:
 - o CDR-G score of 0.5 (very mild dementia)
 - o RBANS DMI score ≤ 85 (low average)
 - o MMSE score of 24-30
 - Not currently using blood thinners (except aspirin)
 - No recent (past 1 year) history of stroke or TIA
 - Recent, within past year, positive results for the presence of beta-amyloid plaques on a positron emission tomography (PET) scan

If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.

Revision/Review Date: 7/2023

Prior Authorization	
Group Description	Agents for Atopic Dermatitis
Group Description	**Medications will be limited to 400 grams per year, Eucrisa is limited to 300 grams per year.
	Preferred Elidal (nimearalimus)
	Elidel (pimecrolimus) tacrolimus (Protopic)
	Dupixent (dupilumab)
	Adbry (tralokinumab)
Drugs	Non-Preferred
	pimecrolimus
	Opzelura (ruxolitinib)
	Rinvoq (upadacitinib)
	Cibinqo (abrocitinib)
	Eucrisa (crisaborole)
	*Note: Adher and Dunivant will now at point of sale for mambers who filled a topical
	Note: Adbry and Dupixent will pay at point of sale for members who filled a topical corticosteroid and a topical calcineurin inhibitor in the past 180 days
	Medically accepted indications are defined using the following sources:
	the Food and Drug Administration (FDA), Micromedex, American
Covered Uses	Hospital Formulary Service (AHFS), United States Pharmacopeia Drug
	Information for the Healthcare Professional (USP DI), the Drug Package
	Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Tacrolimus (Protopic), pimecrolimus (Elidel), and Opzelura (ruxolitinib): Immunocompromised members
Required Medical Information	See "other criteria"
Age Restrictions	Per package insert
Prescriber Restrictions	Adbry, Cibinqo, Dupixent, Opzelura, and Rinvoq requests: Prescriber must be a dermatologist, pediatrician, or allergist or in consultation with a dermatologist, pediatrician, or allergist
	For Opzelura: If the criteria are met, the request will be approved for up to 8 weeks and reauthorization requests will be approved for up to 6 months.
Coverage Duration	For all others: If the criteria are met, the request will be approved for 12 months with a
	maximum quantity limit of 400 grams per year.
Other Criteria	Initial Authorization
	For pimecrolimus (Elidel):
	 Diagnosis of <u>mild to moderate</u> atopic dermatitis in patients who have failed to respond adequately or are intolerant to a formulary topical medium to high potency corticosteroid
	 If the request is for pimecrolimus, member has a documented treatment failure with Elidel OR has a documented medical reason (intolerance, hypersensitivity, contraindication, etc.) why Elidel cannot be used
	For tacrolimus (Protopic):
	 Diagnosis of <u>moderate to severe</u> atopic dermatitis in patients who have failed to respond adequately or are intolerant to a formulary topical medium to high potency corticosteroid
	For Eucrisa:

- Diagnosis of <u>mild to moderate</u> atopic dermatitis
- Trial and failure of a formulary medium to high potency topical corticosteroid or topical immunosuppressant

For Adbry or Dupixent:

- o Trial and failure, or contraindication/intolerance to ALL of the following:
 - o One formulary medium to high potency topical corticosteroid
 - o Topical tacrolimus or Elidel
- o For members less than 2 years of age requesting Dupixent, trial of topical tacrolimus or Elidel is not required.

For Opzelura:

- Diagnosis of mild to moderate atopic dermatitis
- o Member must have 3% to 20% of body surface are (BSA) atopic dermatitis involvement (excluding scalp)
- Trial and failure, or contraindication/intolerance to, ALL of the following:
 - o One formulary medium to high potency topical corticosteroid
 - o Topical tacrolimus or Elidel
 - o Eucrisa (crisaborole)

A MAXIMUM of ONE 60 g TUBE of OPZELURA MAY BE APPROVED PER WEEK

For Rinvog or Cibingo:

- Diagnosis of refractory, moderate to severe, AD
 - For moderate AD: Trial and failure of, or contraindication to, ALL of the following:
 - o One formulary topical medium to high potency topical corticosteroid
 - o Topical tacrolimus or Elidel
 - o Eucrisa (crisaborole)
- For severe AD: Trial and failure of, or contraindication to ALL of the following:
 - One formulary medium to high potency topical corticosteroid
 - o Topical tacrolimus
- Trial and failure of, intolerance to, or contraindication to another systemic drug product

Reauthorization:

• Prescriber attests that the member has experienced improvement in symptoms (e.g. significant clearing of the skin, reduction in itching)

If the criteria are not met, the request will be referred to a clinical reviewer for medical necessity review.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date: 1/2024

Ragwitek:

• Diagnosis has been confirmed by positive skin, or in vitro, testing to Short Ragweed pollen

Reauthorization:

For all requests:

• Member has experienced a reduction in symptoms associated with allergic rhinitis

Revision/Review Date 10/2023

Prior Authorization Group Description	Agents for graft versus host disease
Drugs	Rezurock (belumosudil), Imbruvica (ibrutinib), Jakafi (ruxolitinib phosphate), Orencia (abatacept)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, the Drug Package Insert, and/or per the standard of care guidelines
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must be a hematologist, oncologist, or other specialist in the treatment of hematopoietic cell transplants
Coverage Duration	Jakafi, Rezurock, and Imbruvica: If all of the conditions are met, the request will be approved for up to a 3 month duration for initial requests and up to a 6 month duration for renewal requests. Orencia: If all of the conditions are met, the request will be approved for 1 month duration (4 total infusions)
Other Criteria	**For oncological indications, please refer to the "Oncology Agents" policy**
	 Imitial Authorization: Imbruvica Member has a diagnosis of chronic graft versus host disease Member has tried and failed or cannot use a systemic corticosteroid or documentation is provided as to why a systemic corticosteroid cannot be used The drug is prescribed at an FDA-approved dose Jakafi Member has a diagnosis of acute graft versus host disease or a diagnosis of chronic graft versus host disease Member has tried and failed or cannot use a systemic corticosteroid or documentation is provided as to why a systemic corticosteroid cannot be used The drug is prescribed at an FDA-approved dose Rezurock Member has a diagnosis of chronic graft versus-host disease Member has tried and failed at least two lines of systemic immunosuppressive therapy (e.g. corticosteroids, calcineurin inhibitors, mycophenolate mofetil, ibrutinib, ruxolitinib), one of which must be a systemic corticosteroid, or documentation is provided as to why a systemic corticosteroid cannot be used The drug is prescribed at an FDA-approved dose Orencia Orencia is being requested for prophylaxis against acute graft versus host disease Member will be undergoing hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated donor Member will be receiving Orencia in combination with a calcineurin inhibitor
Revision/Review Date: 7/2023	 (e.g., tacrolimus, cyclosporine) and methotrexate Member will be receiving antiviral prophylactic treatment for Epstein-Barr virus reactivation and will continue for 6 months following HSCT

- Attestation provider has considered prophylactic antivirals for cytomegalovirus (CMV) infection/reactivation during treatment and for 6 months following HSCT
- The drug is prescribed at an FDA-approved dose

Re-Authorization:

- Documentation is provided that the member has achieved a clinical benefit from medication (e.g. symptom improvement, reduction in corticosteroid dose)
- The drug is prescribed at an FDA-approved dose

If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Alpha-1 Proteinase Inhibitors (Human)
Drugs	Preferred: Prolastin-C Non-Preferred: Aralast NP Glassia Zemaira Or any other newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	None
Required Medical Information	None
Age Restrictions	18 years of age or older
Prescriber	Prescribed by or in consultation with a pulmonologist or specialist in
Restrictions	the treatment of AAT
Coverage Duration	The request will be approved for up to a 12 month duration.
Other Criteria	 Initial Authorization: Documented diagnosis of a congenital deficiency of alpha-1 antitrypsin (AAT) (serum AAT level < 11 micromol/L [approximately 57 mg/dL using nephelometry or 80mg/dl by radial immunodiffusion]). Documentation was submitted indicating the member has undergone genetic testing for AAT deficiency and is classified as phenotype PiZZ, PiSZ, PiZ(null) or Pi(null)(null) [NOTE: phenotypes PiMZ or PiMS are not candidates for treatment with Alpha1-Proteinase Inhibitors] Documentation was submitted (member's pulmonary function test results) indicating airflow obstruction by spirometry (forced expiratory volume in 1 second [FEv1] ≤ 65% of predicted), or provider has documented additional medical information demonstrating medical necessity Documentation was submitted indicating member is a non-smoker or an ex-smoker (eg. smoking cessation treatment) Documentation of the member's current weight The Alpha-1 Proteinase Inhibitor (human) is being prescribed at an FDA approved dosage If the medication request is for an Alpha1-Proteinase Inhibitor (human) product other than Prolastin-C, the patient has a

documented medical reason (intolerance, hypersensitivity, contraindication, treatment failure, etc.) for not using Prolastin-C to treat their medical condition

Reauthorization:

- Documentation of the member's current weight
- Documentation was submitted indicating member is a non-smoker or an ex-smoker (e.g. smoking cessation treatment)
- Documentation was submitted indicating the member has clinically benefited from therapy (i.e. stable lung function, improved PFTs, alpha-1 antitrypsin serum level maintained above 11 micromol/L [approximately 57 mg/dL using or 80 mg/dL by radial immunodiffusion], improved quality of life)
- The Alpha-1 Proteinase Inhibitor (human) is being prescribed at an FDA approved dosage

Clinical reviewer/Medical Director must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date 2/2024

Prior Authorization	A 10 11
Group Description	Amifampridine
Drugs	Firdapse (amifampridine)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Patients must be 6 years age or older
Prescriber Restrictions	Prescribed by or in consultation with a neurologist or a neuromuscular specialist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy the request will be approved for 6 months.
Other Criteria	 Initial Authorization: Diagnosis of Lambert-Eaton myasthenic syndrome (LEMS) based on at least one electrodiagnostic study (i.e., repetitive nerve stimulation, nerve conduction studies, electromyography) OR anti-P/Q-type voltage-gated calcium channel antibody testing Member has been screened for small cell lung cancer (SCLC) and/or other malignancies Member does not have a history of seizures Medication is being prescribed at an FDA approved dose or is supported by compendia or standard of care guidelines Re-authorization: Medication is prescribed at an FDA-approved dose or is supported by compendia or standard of care guidelines Documentation provided that prescriber has evaluated the member and recommends continuation of therapy
Revision/Review Date 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group	Androgenic Agents
	If the request is for gender dysphoria, please use the Medications without Drug or Class Specific Criteria
	Preferred products: testosterone 1.62% pump (generic Androgel) testosterone cypionate intramuscular oil testosterone enanthate 200 mg/ml intramuscular oil
Drug(s)	Non-preferred products: testosterone (Androgel) 1% packet testosterone (Vogelxo) 50 mg/5 g packet testosterone (Androgel) 1.62% packet testosterone 1% pump (generic Androgel, Vogelxo) testosterone 10 mg gel pump (generic Fortesta) testosterone 30 mg/1.5 ml pump testosterone (Testim) 1% gel Androderm patch Natesto nasal methyltestosterone (Methitest) 10 mg capsule Aveed 750 mg/3 ml (250 mg/ml) intramuscular solution Testopel 75 mg implant pellet Jatenzo capsule Xyosted subcutaneous solution Tlando
Covered Uses	Any newly marketed testosterone product Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI) and the Drug Package Insert).
Exclusion Criteria	Men with carcinoma of the breast or known or suspected prostate cancer. Pregnant or breastfeeding women.
Required Medical Information	See "Other Criteria"
Age Restrictions	None
Prescriber Restrictions	None
Coverage Duration	If all of the conditions are met, the initial request will be approved for 3 months; renewal requests will be approved for 12 months.
Other Criteria	 Criteria for Initial Authorization: Diagnosis of primary hypogonadism (congenital or acquired) or hypogonadotropic hypogonadism (congenital or acquired) Documented low testosterone level (s) below 300ng/dl (copy of laboratory result required) Documented adequate trial and failure or intolerance with a preferred agent.
Revision/Review Date: 10/2023	 Criteria for Re-Authorization: Diagnosis of primary hypogonadism (congenital or acquired) or hypogonadotropic hypogonadism (congenital or acquired). Documentation that the member is benefiting from use of the medication.

Clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.	
--	--

Prior Authorization Group Description	Injectable Anticoagulants
Drugs	Preferred
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	Member's current weight
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	 If the conditions are met, the request will be approved for an appropriate duration according to the following: For the use in venous thromboembolism (VTE): up to a 30-day duration (unless greater duration of therapy is requested and medically necessary then will be approved for up to a 6 month duration) For use in pregnant members: up to 6 weeks past the expected due date For use in members with cancer: 6 months
Other Criteria	Criteria for approval for use in VTE:
	 The medication is being prescribed for the prevention and/or treatment of VTE The medication is being prescribed at a dose that is within FDA-approved guidelines and/or is supported by the medical compendia The prescriber must provide a medical reason why the member cannot be treated with a formulary oral anticoagulant If the request is for a non-preferred agent, documentation was provided as to why the member is not able to use the preferred agent.
	 Criteria for approval for use in a pregnant member: The medication is being prescribed for the prevention or treatment of VTE during pregnancy. Documentation of the expected due date. The medication is being prescribed by an obstetrician or a hematologist The medication is being prescribed at a dose that is within FDA-approved guidelines and/or is supported by the medical compendia If the request is for a non-preferred agent, documentation was provided as to why the member is not able to use the preferred agent. Criteria for approval for use in member with cancer:

- The medication is being prescribed for the prevention or treatment of VTE for a member with cancer.
- The medication is being prescribed by, or in consultation with, an oncologist/hematologist
- The prescriber must provide a medical reason why the member cannot be treated with a formulary oral anticoagulant
- The medication is being prescribed at a dose that is within FDA-approved guidelines and/or is supported by the medical compendia as defined by the Social Security Act and/or per the National Comprehensive Cancer Network (NCCN), American Society of Clinical Oncology (ASCO), or American Society of Hematology (ASH) standard of care guidelines.
- If the request is for a non-preferred agent, documentation was provided as to why the member is not able to use the preferred agent.

Reauthorization criteria for approval for use in member with cancer:

Revision/Review Date: 10/2023

- The medication is being prescribed for the prevention and/or treatment of VTE for a member with cancer.
- The prescriber must provide a valid medical reason as to why the member needs to continue treatment and cannot be treated with a preferred oral anticoagulant.
- The medication is being prescribed by or in consultation with an oncologist/hematologist
- The medication is being prescribed at a dose that is within FDA-approved guidelines or is supported by the medical compendia as defined by the Social Security Act and/or per NCCN, ASCO, or ASH standard of care guidelines.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Anti-CD19 CAR-T Immunotherapies
Drugs	Kymriah (tisagenlecleucel), Yescarta (axicabtagene ciloleucel), Tecartus (brexucabtagene autoleucel), Breyanzi (lisocabtagene maraleucel)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Patients with primary central nervous system lymphoma
Required Medical Information	See "Other Criteria"
Age Restrictions	See "Other Criteria"
Prescriber	Prescriber must be an oncologist, hematologist or other prescribers
Restrictions Coverage Dynation	who specialize in the treatment of blood cancers.
Coverage Duration	If all the criteria are met, the initial request will be approved for a one – time infusion per lifetime.
	Initial authorization:
Other Criteria	 Patient must not have received prior anti-CD19 CAR-T therapy. Patient will be screened for HBV, HCV, and HIV in accordance with clinical guidelines. Patient does not have an active infection or inflammatory disorder. Patient will not receive live virus vaccines for at least 6 weeks prior to the start of lymphodepleting chemotherapy and until immune recovery following treatment.
	<u>Leukemia</u>
	 B-cell precursor Acute Lymphoblastic Leukemia (ALL): If the request is for Kymriah Patient is 25 years of age or younger ALL that is refractory or in second or later relapse If the request is for Tecartus Patient is 18 years of age or older ALL that is relapsed or refractory
	Non-Hodgkin's Lymphoma (NHL)
	Mantle Cell Lymphoma (MCL): • If the request is for Tecartus: • Patient is 18 years of age or older

- o Patient has relapsed/refractory disease defined as failure of BOTH the following lines of therapy:
 - Chemoimmunotherapy such as an anti-CD20 monoclonal antibody (e.g. Rituxan) + any chemotherapeutic agent
 - Bruton Tyrosine Kinase (BTK) Inhibitor (e.g. Calquence, Imbruvica, Brukinsa)

Other forms of NHL:

- If the request is for Breyanzi (lisocabtagene maraleucel), Kymriah (tisagenlecleucel), Yescarta (axicabtagene ciloleucel)
 - Use is supported by a labeled indication or NCCN guidelines
 - o Patient is 18 years of age or older
 - o For Breyanzi: One of the following:
 - Patient is refractory to first-line chemoimmunotherapy or relapses within 12 months of first-line chemoimmunotherapy
 - Patient is refractory to first-line chemoimmunotherapy or relapses after first-line chemoimmunotherapy and is not eligible for hematopoietic stem cell transplantation (HSCT) due to comorbidities or age
 - Patient has failed two or more lines of systemic therapy
 - For Kymriah: Patient has relapsed/refractory disease defined as failure of two or more lines of systemic therapy
 - For Yescarta: Patient refractory to first-line chemoimmunotherapy or relapses within 12 months of first-line chemoimmunotherapy OR has failed two or more lines of systemic therapy

Re-authorization:

• Treatment exceeding 1 dose per lifetime will not be authorized.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date: 10/2023

Prior Authorization Group Description	Anti-Depressants for the Pediatric Patient
Drugs	bupropion (Aplenzin, Wellbutrin, Forfivo), citalopram, desvenlafaxine, Drizalma Sprinkle (duloxetine), fluoxetine, fluvoxamine, mirtazapine, nefazodone, paroxetine, sertraline, escitalopram, venlafaxine, duloxetine, trazodone, tranylcypromine, amitriptyline, clomipramine, desipramine, doxepin, imipramine, nortriptyline, phenelzine, protriptyline, trimipramine, maprotiline, Fetzima (levomilnacipran), Marplan (isocarboxazid), Trintellix (vortioxetine), Viibryd (vilazodone), Emsam (selegiline), or any newly-approved anti-depressant
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Delaware Medical Assistance Program requires prior authorization for members 5 years of age and younger
Prescriber Restrictions	Prescriber must be a psychiatrist or a medical provider certified in pediatric mental/behavioral health
Coverage Duration	If the criteria are met, the request will be approved for 12 months.
Other Criteria	
Revision/Review Date:	 Initial Authorization: Requested dose is appropriate for age and indication per compendia Re-Authorization: Documentation that the member has experienced a benefit from the medication or discontinuation would be detrimental Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.
4/2023	

Prior Authorization Group Description	Anti-FGF23 Monoclonal Antibodies
Drugs	Crysvita (burosumab) SQ solution, or any other newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: The Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	See Other Criteria
Required Medical Information	See Other Criteria
Age Restrictions	X-linked hypophosphatemia (XLH): 6 months of age or older Tumor-induced osteomalacia (TIO): 2 years of age and older
Prescriber Restrictions	Prescribed by, or in consultation with, an endocrinologist, nephrologist, molecular geneticist, or other specialist experienced in the treatment of metabolic bone disorders
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months and reauthorization requests will be approved for 12 months.
Other Criteria	Initial Authorization:
	 For X-linked hypophosphatemia (XLH): Diagnosis of XLH Dosing is appropriate as per labeling or is supported by compendia or standard of care guidelines Labs, as follows: Serum phosphorus below normal for patient age eGFR > 30 mL/min/1.73 m2 or CrCl ≥ 30 mL/min Patient will not use concurrent oral phosphate and/or active vitamin D analogs (e.g. calcitriol, paricalcitol, doxercalciferol, calcifediol) Additionally, for adults: Clinical signs and symptoms of XLH (e.g. bone/joint pain, fractures, osteomalacia, osteoarthritis, ensethopathies, spinal stenosis impaired mobility, presence or history of lower limb deformities, etc.) Trial and failure of, or contraindication to, combination therapy with oral phosphate and active vitamin D (calcitriol) for a minimum of 8 weeks
	 For tumor-induced osteomalacia (TIO): Diagnosis of FGF23-related hypophosphatemia in TIO Dosing is appropriate as per labeling or is supported by compendia or standard of care guidelines The tumor(s) is/are not amenable to surgical excision or cannot be located Labs, as follows:
	o Serum phosphorus below normal for patient age

- o eGFR > 30 mL/min/1.73 m2 or CrCl ≥ 30 mL/min
- Patient will not use concurrent oral phosphate and/or active vitamin
 D analogs (e.g. calcitriol, paricalcitol, doxercalciferol, calcifediol)

Re-authorization:

For XLH or TIO:

- Documented effectiveness as evidenced by at least one of the following:
 - o Serum phosphorus within normal limits for patient age
 - Clinical improvement (e.g. improved rickets, improved bone histomorphometry, increased growth velocity, increased mobility, decrease in bone fractures, improved fracture healing, reduction in bone-related pain)
- 25-hydroxyvitamin D level and, if abnormally low, documented supplementation with cholecalciferol or ergocalciferol
- Patient is not concurrently using oral phosphate and/or active vitamin
 D analogs (e.g. calcitriol, paricalcitol, doxercalciferol, calcifediol)
- Dosing continues to be appropriate as per labeling or is supported by compendia or standard of care guidelines

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date: 7/2023

Antifibrotic Respiratory Tract Agents

Drugs:

Ofev (nintedanib esylate) pirfenidone (Esbriet)

Covered Uses: Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.

INITIAL CRITERIA:

For all requests:

- ➤ Patient is 18 years of age or older
- ➤ Prescriber is a pulmonologist or lung transplant specialist
- Provider attests that they have reviewed the patient's other medications, and have addressed all potential drug interactions
- > Documentation has been provided that the patient does not smoke

If the request is for Idiopathic Pulmonary Fibrosis (IPF):

- > Confirmed diagnosis of IPF
- ➤ Pulmonary function test indicate patient has Forced Vital Capacity (%FVC) ≥ 50% within 30 days of request

If the request is for Systemic Sclerosis-Associated Interstitial Lung Disease (SSc-ILD) (Ofev only):

- Confirmed diagnosis of SSc-ILD
- > FVC \geq 40% within 30 days of request
- > Trial and failure of mycophenolate mofetil (MMF), cyclophosphamide or azathioprine.

<u>If the request is for Chronic Fibrosing Intersitial Lung Diseases (ILDs) with a progressive phenotype (Ofev only):</u>

- ➤ Diagnosis of chronic fibrosing ILD (such as connective tissue disease [CTD]-associated ILD, chronic fibrosing hypersensitivity pneumonitis [HP], idiopathic non-specific interstitial pneumonia [iNSIP], unclassifiable idiopathic interstitial pneumonia [IIP]) of a progressive phenotype
- ➤ Recent (12 month) history of treatment with at least one medication to treat ILD (e.g., corticosteroid, azathioprine, MMF, n-acetylcysteine (NAC), rituximab, cyclophosphamide, cyclosporine, or tacrolimus).
- FVC \geq 45% predicted within 30 days of request

If all of the above conditions are met, the request will be approved for a 6 month duration; if all of the above criteria are not met, the request is referred to a Medical/clinical reviewer for medical necessity review.

REAUTHORIZATION CRITERIA:

> Prescriber is a pulmonologist or lung transplant specialist

- > Documentation submitted indicates that the member has obtained clinical benefit from the medication
- > Documentation has been provided that the patient does not smoke

If all of the above conditions are met, the request will be approved for a 6 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

NOTE: Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date: 7/2023

Prior Authorization Group Description	Antipsychotics for Members Under 18 Years of Age
Drugs	All antipsychotics when prescribed for a member under 18 years of age
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Use of more than one antipsychotic at a time is prohibited, unless cross titration is needed for up to 60 days
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	Prescribed by, or in consultation with, a psychiatrist, pediatric neuropsychologist, developmental-behavioral pediatrician, or other specialist in the field of the member's diagnosed condition
Coverage Duration	 If the criteria are met, requests may be approved as follows: Members who started the antipsychotic during a recent hospitalization will receive a 6-month approval as continuity of care Members who are new to the plan and are stable on the antipsychotic will receive a 6-month approval as continuity of care All other requests meeting the criteria below may be approved for 12 months

Other Criteria

Criteria for Initial Approval:

- Members who started the antipsychotic during a recent hospitalization or who are new to the plan and are stable on the antipsychotic may receive approval as continuity of care without meeting the criteria below
- Antipsychotic is prescribed within FDA approved indications and dosing, recognized treatment guidelines, or recognized compendia
- Provider has indicated that baseline monitoring of weight, body mass index (BMI) or waist circumference, blood pressure, fasting glucose or HbA1c, fasting lipid panel, and tardive dyskinesia using the Abnormal Involuntary Movement Scale (AIMS) or Dyskinesia Identification System Condensed User Scale (DISCUS) has been completed
- Additional criteria for requests for major depressive disorder or obsessive compulsive disorder:
 - Member continues to have residual symptoms despite use of evidence-based nonpharmacologic therapies such as behavioral, cognitive, and family based therapies (for new antipsychotic starts only)
 - Member had an inadequate response, intolerable side effects or contraindication to at least TWO different antidepressant regimens at an adequate dose and duration (at least 4 weeks);
 - o If the request is for augmentation, the member is also receiving an SSRI or SNRI
- Additional criteria for requests for aggression associated with autism spectrum disorders, tic disorders, disruptive behavior disorders, conduct disorders, or intellectual disabilities:
 - Chart notes documenting evidence of a comprehensive clinical evaluation of conditions have been submitted including:
 - Treatment plan that comprehensively addresses all behaviors and conditions
 - Provider has indicated that the member's comorbid conditions are being treated
 - Documentation that aggressive behaviors continue and are not responding to non-pharmacologic therapies (e.g. behavioral, cognitive, and family based therapies)
- If the request is for a non-formulary agent the above criteria must be met AND at least one preferred formulary antipsychotic for the indication has previously failed or all preferred formulary antipsychotics are contraindicated

Criteria for Reauthorization:

- Prescriber indicates that there has been improvement in target symptoms as a result of antipsychotic therapy
- Documentation of a treatment plan that contains either plan for discontinuation or rationale for continued use
- Prescriber indicates that all appropriate continued monitoring is being conducted (e.g. monitoring for tardive dyskinesia using AIMS or DISCUS, weight/BMI/waist circumference, blood pressure, fasting glucose or A1c, fasting lipids)

Revision/Review Date: 2/2024

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Antisense Oligonucleotides for Duchenne Muscular Dystrophy
Group Description	
Drugs	Exondys 51 (eteplirsen), Vyondys 53 (golodirsen), Viltepso
	(viltolarsen), Amondys 45 (casimersen)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
	standard of care guidelines.
Exclusion Criteria	Concomitant use with another antisense oligonucleotide
Required Medical	See "Other Criteria"
Information	
Age Restrictions	$Age \le 20 \text{ years}$
Prescriber Restrictions	Prescribed by neurologist or provider who specializes in the treatment of DMD
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6
	months and reauthorization requests will be approved for 12 months.
Other Criteria	Initial Authorization:
	 Member has a diagnosis of Duchenne muscular dystrophy (DMD) and lab test was submitted confirming the mutation of dystrophin gene amenable to ONE of the following: Exon 51 skipping for Exondys 51 Exon 53 skipping for Vyondys 53 or Viltepso Exon 45 skipping for Amondys 45 Member is ambulatory Baseline dystrophin levels AND results of motor function tests are provided [e.g. 6-Minute Walk Test (6MWT), Time to Stand Test (TTSTAND), Time to Run/Walk Test (TTRW), North Star Ambulatory Assessment (NSAA), Time to Climb 4 Steps Test (TTCLIMB)] Member has stable pulmonary and cardiac function ONE of the following applies: Member has been on a stable dose of corticosteroids for at least 3 months for Viltepso Member has been on a stable dose of corticosteroids for at least 6 months for Vyondys 53, Exondys 51, or Amondys 45 Attestation of renal function monitoring is provided with request The request is for an FDA approved dose Reauthorization

Revision/Review Date 4/2023	 Documentation is provided that the member had an increase in dystrophin levels from baseline Documentation is provided that the member had the expected clinical response (e.g. provider statement that the therapy has reduced the rate of further decline in function as demonstrated by 6MWT, TTSTAND, TTRW, NSAA, or TTCLIMB) Member is ambulatory Attestation of renal function monitoring is provided with request The request is for an FDA approved dose
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Medications for Use in ADHD Treatment for Members 21 and Older
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Preferred drugs will pay for members 20 and younger; PA required for members 21 and older
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for 12 months.
Other Criteria	 Criteria for Authorization: Prescriber attests that the Diagnostic and Statistical Manual of Mental Disorders V (DSM-5) criteria for diagnosis of ADHD in adults has been met Appropriate dose of medication based on age and indication. Behavioral modification techniques have been tried prior to medication being prescribed. The patient is not concurrently taking a benzodiazepine with the exception of medication required for a seizure diagnosis. If a benzodiazepine is required, appropriate documentation has been provided by the prescriber indicating justification. The patient is not on a long-acting and a short-acting version of the same chemical agent simultaneously. If both a long-acting and a short-acting version of the same chemical agent are required simultaneously, appropriate documentation has been provided by the prescriber indicating justification. If the request is for a non-preferred medication, documented trial and failure or intolerance with two preferred medications used to treat the documented diagnosis. For medications where there is only one preferred agent, one of the following is true: Only that agent must have been ineffective or not tolerated No other preferred medication has a medically accepted use for the patient's specific diagnosis as referenced in the medical compendia All other preferred medications are contraindicated based on the patient's diagnosis, other medical conditions, or other medication therapy
Revision/Review Date: 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Atovaquone Suspension
Drugs	Atovaquone (Mepron) suspension
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for up to 6 months.
Other Criteria	 Treatment/Prevention of <i>Pneumocystis jirovecii</i> pneumonia Diagnosis of mild to moderate <i>Pneumocystis jirovecii</i> pneumonia (PCP) or diagnosis with the need to prevent PCP infection. AND Documented trial and failure with therapeutic doses or intolerance to trimethoprim- sulfamethoxazole (TMP-SMX) AND Documented trial and failure with therapeutic doses or intolerance to dapsone.
Revision/Review Date: 4/2023	 Treatment/Prevention of Toxoplasma gondii encephalitis in patients with HIV: Diagnosis of Toxoplasma gondii encephalitis or documentation of supporting diagnosis for prophylaxis Documented trial and failure with therapeutic doses or intolerance to trimethoprim- sulfamethoxazole (TMP-SMX). Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Benlysta (belimumab)
Group Description	• •
Drugs	Benlysta (belimumab)
Covered Uses	Medically accepted indications are defined using the following sources:
	the Food and Drug Administration (FDA), Micromedex, the Drug
F 1 : C':	Package Insert, and/or per the standard of care guidelines
Exclusion Criteria	Severe active central nervous system lupus
Required Medical Information	See "other criteria"
	Must be at least 5 years of age
Age Restrictions Prescriber	Must be at least 5 years of age Prescribed by or in consultation with a rhoumatologist or nonbrologist
Restrictions	Prescribed by or in consultation with a rheumatologist or nephrologist
Coverage Duration	If all the criteria are met initial authorization requests may be approved
Coverage Duration	for up to 6 months. Reauthorization requests may be approved
	12 months.
Other Criteria	Initial Authorization:
	Active systemic lupus erythematosus (SLE)
	o Provider attestation that the patient is positive for
	autoantibodies (or antinuclear antibodies or anti–double-
	stranded DNA [anti-dsDNA] antibodies)
	o The member has tried and failed both of the following (or
	contraindication/inability to use these medications):
	 Hydroxychloroquine
	 One other immunosuppressant [e.g., methotrexate,
	azathioprine, calcineurin inhibitors or
	mycophenolate]
	Active lupus nephritis
	o Provider attestation of diagnosis confirmed by kidney biopsy
	o The member has tried and failed, or has a medical reason for
	not using, both of the following
	Cyclophosphamide or tacrolimus
	• Mycophenolate
	Provider states the member will not be receiving concomitant the group with the following:
	therapy with the following:
	B-cell targeted therapy including (but not limited to) rituximab
	o Interferon receptor antagonist, type 1 including (but not
	limited to) Saphnelo (anifrolumab)
	 Dosing is appropriate per labeling
	2 come to appropriate per taccing
	Criteria for Reauthorization:
	Documentation or provider attestation of positive clinical
	response as indicated by one of the following:
	<u> </u>

o Fewer flares that required steroid treatment
o Lower average daily oral prednisone dose
o Improved daily function either as measured through a
validated functional scale or through improved daily
performance documented at clinic visits
 Sustained improvement in laboratory measures of lupus
activity
Dosing is appropriate per labeling
Medical Director/clinical reviewer must override criteria when, in
his/her professional judgement, the requested item is medically
necessary.

Covered Uses	Medically accepted indications are def the Food and Drug Administration (FI Hospital Formulary Service (AHFS), U Information for the Healthcare Profess Insert (PPI), or disease state specific st	DA), Micromedex, American United States Pharmacopeia Drug tional (USP DI), the Drug Package
Exclusion Criteria	N/A	
Required Medical Information	See "other criteria"	
Age Restrictions	N/A	
Prescriber Restrictions	N/A	

Initial authorization:

- Exempt conditions (palliative, hospice, other end-of-life care, seizure disorder): 12 months
- Preferred drugs requested above 14 day initial fill limits: 12 months, 30 day supply per fill

Coverage Duration

- Non-preferred drugs requested for up to 14 days of therapy: 1 time approval for up to 14 day supply
- Non-preferred drugs requested above 14 days of therapy: 12 months, 30 day supply per fill

Re-authorization: 12 months, 30 day supply per fill

Other Criteria

Initial Authorization

If the member is using benzodiazepines for the treatment of hospice, palliative, or end of life care (e.g. anxiety related to dyspnea) the following criteria apply:

The requested dose is within compendia guidelines

If the member is using benzodiazepines for the treatment of seizure disorder, the following criteria apply:

- The requested dose is within compendia guidelines
- Prescriber must attest to review of the State Prescription Monitoring Program prior to prescribing
- Documentation of trial and failure or inability to use TWO preferred benzodiazepines

If the request is for Loreev XR, the member is established on stable, evenly divided, three times daily dosing with lorazepam tablets

If the request is for a NON-PREFERRED product for a treatment-experienced member AND/OR for 14 days or less:

- The requested dose is within compendia guidelines
- Prescriber must attest to review of the State Prescription Monitoring Program prior to prescribing
- Documentation of trial and failure or inability to use TWO preferred benzodiazepines

Criteria for requests over the 14-day initial fill limit for benzodiazepine-naïve members, the following criteria apply:

- The requested dose is within compendia guidelines
- If the request is for a non-preferred product, documentation of trial and failure or inability to use at least TWO preferred benzodiazepines is required
- The member is NOT currently taking an opioid. If the member will be taking an opioid, the provider has counseled the member on the risks of concurrent benzodiazepine/opioid use.

- If the member will be concurrently taking another benzodiazepine, muscle relaxant, or sedative hypnotic drug (e.g. zolpidem, zaleplon), the prescriber attests to counseling the patient on risks of concurrent use
- Prescriber must attest to review of the State Prescription Monitoring Program prior to prescribing
- **For Insomnia:** the member must have a documented intolerance or poor response to ALL of the following:
 - O A non-benzodiazepine drug therapy for insomnia for at least 4 weeks (e.g. zolpidem, zaleplon, sedating antidepressant (e.g. trazodone, mirtazapine, amitriptyline, doxepin), sedating antipsychotic (e.g. quetiapine, olanzapine), or sedating anticonvulsant (e.g. gabapentin, tiagabine). OTC sleep aids or supplements will not be considered as prerequisite therapy.
 - o Non-pharmacologic therapy (e.g. stimulus control, relaxation training, cognitive behavioral therapy)
 - o Sleep hygiene measures
- **For Anxiety or Panic Disorder:** the member must have a documented intolerance or poor response to at least TWO of the following:
 - O Psychotherapy (e.g. cognitive behavioral therapy, applied relaxation)
 - Antidepressant medications (e.g. SSRIs, SNRIs, tricyclic antidepressants)
 - Other serotonergic agents (buspirone, trazodone)
 - Other alternative agents: hydroxyzine, bupropion, olanzapine, risperidone, quetiapine, or pregabalin (Lyrica)
- **For Restless Legs Syndrome:** ALL of the following apply:
 - O Prescriber attests that iron deficiency has been ruled out or if member is iron deficient, they have been adherent to iron + vitamin C regimen for at least 3 months
 - o Member has implemented good sleep hygiene practices
 - Member has tried TWO of the following pharmacologic treatments: pramipexole, ropinirole, gabapentin, Horizant (gabapentin enacarbil), Neupro (rotigotine), cabergoline, or pregabalin (Lyrica)
- For Chronic Muscle Spasms/Spasticity: If the request is for a duration of > 14 days for the diagnosis of chronic muscle spasms or spasticity, the member must have a documented intolerance or poor response to at least TWO of the following: tizanidine, baclofen, riluzole, dantrolene, cyclobenzaprine, carisoprodol, methocarbamol, orphenadrine, or chlorzoxazone.

Criteria for Reauthorization:

- The requested dose is within compendia guidelines
- The member is NOT currently taking an opioid. If the member will be taking an opioid, the provider has counseled the member on the risks of concurrent benzodiazepine/opioid use.
- If the member will be concurrently taking another benzodiazepine, muscle relaxant, or sedative hypnotic drug (e.g. zolpidem, zaleplon), the prescriber attests to counseling the patient on risks of concurrent use
- Prescriber must attest to review of the State Prescription Monitoring Program prior to prescribing
- Documentation of one of the following:
 - o A benzodiazepine tapering/ discontinuation plan is in place
 - o A benzodiazepine is the only adequate treatment for the member's disease state

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Age Restrictions	≥ 18 years		
Prescriber Restrictions	Prescribed by or in consultation with a cardiologist		
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.		
Other Criteria	 Initial Authorization: Diagnosis of symptomatic New York Heart Association (NYHA) class II or III obstructive hypertrophic cardiomyopathy (oHCM) Patient has a left ventricular ejection fraction (LVEF) ≥55% Patient has a peak left ventricular outflow tract (LVOT) gradient ≥ 50 mmHg at rest or with provocation Trial and failure or contraindication to ALL of the following: Beta blockers (i.e. metoprolol, propranolol, atenolol) Non-dihydropyridine calcium channel blockers (i.e. verapamil, diltiazem) Prescriber attests that patient is not diagnosed with a disorder that causes cardiac hypertrophy that mimics oHCM (i.e., Fabry disease, amyloidosis, or Noonan syndrome with LV hypertrophy) Prescriber attests that patient is not using moderate to strong CYP2C19 or CYP3A4 inhibitors or inducers Medication is prescribed at an FDA approved dose Re-Authorization: Documentation of clinical benefit as evidenced by an improvement in oHCM symptoms (i.e., improvement in shortness of breath, LVOT, peak oxygen consumption, etc.) from baseline OR improvement or no worsening of NYHA functional class from 		
Date: 7/2023	 baseline Patient has a left ventricular ejection fraction (LVEF) ≥50% Medication is prescribed at an FDA approved dose 		

If all of the above criteria are not met, the request is referred to a
Medical Director/Clinical Reviewer for medical necessity review.

Prior Authorization Group Description	Carisoprodol
Drugs	carisoprodol (Soma) carisoprodol-aspirin (Soma Compound)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Member 16 years of age or older
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for a single fill for a maximum of 84 tablets for a 90 day supply and requests for carisoprodol-aspirin will be approved for a single fill for a maximum of 168 tablets for a 90 day supply.
Other Criteria	 Initial Authorization: Member has had a trial and failure, or intolerance to, cyclobenzaprine, tizanidine, baclofen or a nonsteroidal anti-inflammatory drug (NSAID) in the last 90 days; AND If the member has previously received a carisoprodol containing drug within the past 90 days, then the provider attests the member has been screened for, and demonstrates no signs of, carisoprodol abuse Re-Authorization:
	Documentation has been provided that states the member has been screened for, and demonstrates no signs of, carisoprodol abuse
Revision/Review Date: 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Calcitonin Gene-Related Peptide (CGRP) Antagonists for Headache Prevention
Drugs	Preferred: Aimovig (erenumab) Ajovy (fremanezumab) Emgality (galcanezumab) Non-Preferred: Vyepti (eptinezumab) Nurtec ODT (rimegepant) – if the request is for acute treatment of migraine, please refer to the Acute Migraine Treatments criteria Qulipta (atogepant) any newly marketed drug in the class
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Request for indication of chronic cluster headaches
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with a neurologist
Coverage Duration	If the criteria are met, the request will be approved for 6 months. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the request will be approved for 12 months.
Other Criteria	Criteria for Initial Authorization:
	 Cluster Headache: Request for Emgality (galcanezumab) for diagnosis of episodic cluster headache If the request is for any other CGRP, do not approve; not indicated Requested dose is within FDA approved dosing guidelines

- headache days per month with ≥ 8 migraine days per month) despite use of abortive therapy (e.g. triptan or NSAIDs)
- Requested dose is within FDA approved dosing guidelines
- Documentation of the number of headache days per month
- Documentation of members Migraine Disability Assessment (MIDAS),
 Migraine Physical Function Impact diary (MFPDI), or Headache Impact Test
 (HIT-6) score
- Physician attests to trial and failure (or a medical justification for not using e.g. hypersensitivity, baseline bradycardia or hypotension, adverse events experienced from previous trial, etc.) with at least one drug from TWO categories below for at least 4 weeks EACH, at minimum effective doses:
 - 1. Beta-adrenergic blockers
 - 2. Topiramate or divalproex ER or DR
 - 3. Amitriptyline or venlafaxine
 - 4. Frovatriptan, zolmitriptan or naratriptan (for menstrual migraine prophylaxis)
- Medication will not be used in combination with another CGRP inhibitor for either acute or preventative treatment of migraine
- If the request is for a non-preferred CGRP antagonist, the patient has a documented medical reason (intolerance, hypersensitivity, contraindication, treatment failure etc) for not using a preferred CGRP antagonist for migraine prophylaxis.

Criteria for Re-Authorization:

Episodic Cluster Headache:

• Reduction in the frequency of headaches (clinical benefit)

Migraine:

Revision/Review Date: 2/2024

- For migraine: documented clinical benefit as evidenced by one of the following:
 - o Reduction of ≥50% in the number of headache days per month relative to pre-treatment baseline (clinical benefit)
 - Improvement in member's Migraine Disability Assessment (MIDAS), Migraine Physical Function Impact diary (MFPDI), or Headache Impact Test (HIT-6) score
- Provider should note on the prior authorization request the number of headache days per month
- Medication will not be used in combination with another CGRP inhibitor for either acute or preventative treatment of migraine

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Chelating Agents
Drugs	deferasirox (Exjade) tablet for oral suspension deferasirox (Jadenu) tablet, granule pack Chemet (succimer) capsule deferiprone (Ferriprox) solution deferoxamine mesylate (Desferal) vial penicillamine (Cuprimine, Depen, D-penamine) capsule, tablet Radiogardase (Prussian blue) capsule trientine (Spyrine) capsule Galzin (Zinc acetate) capsule Bal in Oil (Dimercaprol) ampule pentetate calcium trisodium ampule pentetate zinc trisdoium ampule Calcium Disodium Versenate (edetate calcium disodium) ampule
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	If the above conditions are met, the request will be for 6 months.
Other Criteria	Requests for deferasirox (Exjade, Jadenu) only:
	 Criteria for Approval for Chronic iron overload due to blood transfusions For Pediatric Population: Patient must be ≥ 2 years old and < 21 years old Diagnosis of chronic iron overload due to blood transfusions Patient receiving blood transfusions on a regular basis/participating in blood transfusion program Serum ferritin concentration is consistently > 1000 mcg/L. If the serum ferritin levels fall consistently below 500 mcg/L, deferasirox must be discontinued If the request is for deferasirox oral granules in packet member has had a documented trial and failure of deferasirox dispersible tablets or medical reason why deferasirox dispersible tablets cannot be used The medication requested is being prescribed at an FDA-approved dose For Adult Population: Patient must be ≥ 21 years old
	 Diagnosis of chronic iron overload due to blood transfusions Patient receiving blood transfusions on a regular basis/participating in blood transfusion program Serum ferritin concentration is consistently > 1000 mcg/L. If the serum ferritin levels fall consistently below 500 mcg/L, deferasirox must be discontinued

- Documentation that patient is unable to use deferoxamine (Desferal) parenterally
- If the request is for deferasirox oral granules in packet member has had a documented trial and failure of deferasirox dispersible tablets or medical reason why deferasirox dispersible tablets cannot be used
- The medication requested is being prescribed at an FDA-approved dose

Chronic iron overload in non-transfusion dependent thalassemia syndromes:

- Patient must be ≥ 10 years old
- Diagnosis of thalassemia syndrome
- Liver iron content (LIC) by liver biopsy of ≥ 5 mg Fe/g dry weight
- If the request is for deferasirox oral granules in packet member has had a documented trial and failure of deferasirox dispersible tablets or medical reason why deferasirox dispersible tablets cannot be used
- The medication requested is being prescribed at an FDA-approved dose

Requests for Ferriprox (deferiprone) only:

Transfusion iron overload due to thalassemia syndrome, sickle cell disease, or other anemias

- Patient must be ≥ 3 years old for oral solution $OR \geq 8$ years old for tablets
- Diagnosis of thalassemia syndrome, sickle cell disease, or other anemia
- Patient receiving blood transfusions on a regular basis/participating in blood transfusion program
- Serum ferritin concentration is consistently > 1000 mcg/L. If the serum ferritin levels fall consistently below 500 mcg/L, Ferriprox must be discontinued
- Documented patient is unable to use deferoxamine (Desferal) parenterally
- The medication requested is being prescribed at an FDA approved dose

Requests for Wilson's Disease:

Cuvrior (trientene tetrahydrochloride) only:

- Diagnosis of Wilson's disease
- Patient is de-coppered
- Patient is tolerant to penicillamine and will discontinue penicillamine before starting therapy with Cuvrior
- The medication requested is being prescribed at an FDA approved dose Trientene (Syprine) only:
 - Diagnosis of Wilson's disease
 - Documented trial and failure, intolerance, or contraindication to penicillamine
 - The medication requested is being prescribed at an FDA approved dose

Requests for all other drugs and indications:

• The drug is requested for an appropriate use (per the references outlined in "Covered Uses") AND

	The dose requested is appropriate for the requested use (per the references outlined in "Covered Uses")
Revision/Review Date: 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Cholbam
Group Description	
Drugs	Cholbam (cholic acid)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	MD is a gastroenterologist OR hepatologist
Coverage Duration	If all of the conditions are met, the request will be approved for a 3 month duration for the first year of therapy, and then for a 6 month duration after one year of treatment.
Other Criteria	Initial authorization: ■ Patient has a confirmed diagnosis of: ■ Bile acid synthesis disorder due to single enzyme defect (SEDs) OR ■ Peroxisomal disorders (PDs) including Zellweger spectrum disorders in patients that exhibit manifestations of liver disease, steatorrhea or complications from decreased fat soluble vitamin absorption ■ Current labs (within 30 days of request) have been submitted for the following: ■ ALT/AST ■ GGT (serum gamma glutamyltransferase) ■ ALP (Alkaline phosphatase) ■ Bilirubin ■ INR Re-authorization:
	 Documentation has been submitted indicating clinical benefit/liver function has improved since beginning treatment For reauthorization after the first 3 months of treatment, lab results must show an improvement in liver function and there must be no evidence of biliary obstruction or cholestasis Current labs (within 30 days of request) have been submitted for the following: ALT/AST

	➤ GGT (serum gamma glutamyltransferase)
	> ALP (Alkaline phosphatase)
	Bilirubin
	> INR
Revision/Review	
Date 10/2023	Medical Director/clinical reviewer must override criteria when, in
	his/her professional judgement, the requested item is medically
	necessary.
	necessary.

Field Name	Field Description
Prior Authorization Group Description	Complement Inhibitors
Drugs	Soliris (eculizumab), Ultomiris (ravulizumab), Empaveli
	(pegcetacoplan), Syfovre (pegcetacoplan injection), Izervay
	(avacincaptad pegol injection)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex, the Drug Package Insert, and/or per the standard of care guidelines
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber	Prescriber must be a hematologist, nephrologist, neurologist,
Restrictions	oncologist, ophthalmologist, or other appropriate specialist.
Coverage Duration	If the criteria are met, the criteria will be approved as follows:
	For Soliris (eculizumab), Ultomiris (ravulizumab), and Empaveli
	(pegcetacoplan): initial request will be approved for up to 3 month
	duration; reauthorization requests will be approved for up to 6 months.
	For Syfovre (pegcetacoplan injections): initial and reauthorization
	requests will be approved for up to 12 months.
	For Izervay (avacincaptad pegol injection): initial request will be
	approved for up to 12 month duration with no reauthorization
Other Criteria	Initial Authorization:
	 The request is age appropriate according to FDA approved package labeling or nationally recognized compendia; AND The request is for a dose that is FDA approved or in nationally recognized compendia in accordance with the patient's diagnosis, age and concomitant medical conditions; AND For Soliris (eculizumab), Ultomiris (ravulizumab), and Empaveli (pegcetacoplan)
	 Documentation of vaccination against meningococcal disease or a documented medical reason why the patient cannot receive vaccination or vaccination needs to be delayed; AND Antimicrobial prophylaxis with oral antibiotics (penicillin, or macrolides if penicillin-allergic) for two weeks will be administered if the meningococcal vaccine is administered less than two weeks before starting therapy or a documented medical reason why the patient cannot receive oral antibiotic prophylaxis.

Paroxysmal Nocturnal Hemoglobinuria (PNH):

- Documentation of diagnosis by high sensitivity flow cytometry
- Hemoglobin (Hgb) < 10.5 g/dL
- If the request is for Empaveli (pegcetacoplan), documented trial and failure of, contraindication to, or medical reason for not using Soliris (eculizumab) or Ultomiris (ravulizumab)

Generalized Myasthenia Gravis (gMG):

• Refer to the "Myasthenia Gravis Agents" policy

Neuromyelitis Optica Spectrum Disorder (NMOSD)

• Refer to the "Neuromyelitis Optica Spectrum Disorder (NMOSD) Agents" policy

Atypical Hemolytic Uremic Syndrome (aHUS)/Complement-Mediated HUS)

- Documentation of confirmed diagnosis as evidenced by complement genotyping and complement antibodies; OR
- Provider attestation treatment is being used empirically and delay in therapy will lead to unacceptable risk to the patient

Geographic Atrophy (GA):

- If the request is for Syfovre (pegcetacoplan injection), member must be ≥ 60 years of age
- If the request is for Izervay (avacincaptad pegol injection), member must be ≥ 50 years of age
- Diagnosis of GA secondary to age-related macular degeneration (AMD)
- Absence of choroidal neovascularization (CNV) in treated eye
- Best-corrected visual acuity (BCVA) of 24 letters (approximately 20/320) or better using Early Treatment Diabetic Retinopathy Study (ETDRS)
- GA lesion size ≥ 2.5 and ≤ 17.5 mm² with at least 1 lesion ≥ 1.25 mm²

Re-Authorization:

- Re-authorization may be considered for all agents included in these criteria with the exception of Izervay (avacincaptad pegol injection), which is only indicated for a 12 month duration
- Provider has submitted documentation of clinical response to therapy (e.g., reduction in disease severity, improvement in quality of life scores, reduced need for blood transfusions, slowing of growth rate of GA lesions, etc.); AND
- The request is for a dose that is FDA approved or in nationally recognized compendia in accordance with the patient's

Revision/Review
Date 10/2023

diagnosis, age, and concomitant medical condition; AND
 If the request is for aHUS/Complement Mediated HUS
 Documentation of confirmed diagnosis as evidenced by
complement genotyping and complement antibodies
Medical Director/clinical reviewer must override criteria when, in
his/her professional judgement, the requested item is medically
necessary.

Field Name	Field Description
Prior Authorization	Corlanor
Group Description	
Drugs	Corlanor (ivabradine)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Pregnancy
Required Medical Information	See "Other Criteria"
Age Restrictions	See "Other Criteria"
Prescriber Restrictions	Prescribed by or in consultation with a cardiologist
Coverage Duration	If all of the conditions are met, the request will be approved for 12 month duration.
Other Criteria	 Heart Failure in Adult Patients: Member is aged 18 years or older Member has a diagnosis of stable symptomatic chronic heart failure (NYHA functional class II-IV) with a left ventricular ejection fraction ≤ 35% Member is in sinus rhythm with a resting heart rate ≥ 70 beats per minute (bpm) Member is currently being prescribed, or documentation has been provided that the member is not able to tolerate, an evidence based beta-blocker (i.e., bisoprolol, carvedilol, metoprolol succinate) at maximally tolerated dose Heart Failure in Pediatric Patients: Member is aged 6 months to less than 18 years of age Member has stable heart failure (NYHA/Ross functional class II-IV) due to dilated cardiomyopathy and a left ventricular ejection fraction ≤ 45% Member is in sinus rhythm with an elevated resting heart rate
Revision/Review Date 2/2024	Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Description
Corticosteroids for Duchenne Muscular Dystrophy (DMD)
Agamree (vamorolone)
Emflaza (deflazacort)
Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service
(AHFS), United States Pharmacopeia Drug Information for the Healthcare
Professional (USP DI), the Drug Package Insert (PPI), or disease state specific
standard of care guidelines.
N/A
See "Other Criteria"
Patient must be 2 years of age or older
Prescribed by a neurologist, provider who specializes in the treatment of DMD, or in
consultation with a neurologist of provider who specialized in the treatment of DMD
If all of the conditions are met, the initial request will be approved for a 6 month
duration. For reauthorization, the request will be approved for 12 months.
Initial Authorization:
Confirmed diagnosis of Duchenne Muscular Dystrophy (such as documented
mutation of dystrophin gene, genetic sequencing indicating mutations
attributed to Duchene Muscular Dystrophy, muscle biopsy indicating absence of dystrophin protein, etc.), and copies of testing were submitted with request
Trial and failure with prednisone, and documented medical reason why
prednisone cannot be continued
The request is for an FDA approved dose
The request is for all 1211 approved dose
Reauthorization: Documentation or attestation of clinical benefit (such as improved muscle strength, muscle function, or overall symptom improvement) The request is for an FDA approved dose Physician/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Crinone
Group Description	
Drugs	Crinone (micronized progesterone)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Diagnosis or treatment of infertility
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for 30 single use applicators per 30 days until the end of pregnancy if the diagnosis is the prevention of spontaneous preterm delivery (singleton pregnancy and prior preterm birth or short cervix), or for up to 6 single use applicators if the diagnosis is secondary amenorrhea.
Other Criteria	in the stagnesse is secondary unionement
	 Prevention of spontaneous preterm delivery: Patient has singleton pregnancy and prior preterm birth or short cervix Secondary Amenorrhea: Patient has a diagnosis of secondary amenorrhea Patient has tried and failed, or has contraindication or intolerance to, oral progestin therapy (e.g. medroxyprogesterone acetate, norethindrone acetate tablets, micronized progesterone) If the request is for Crinone 8% gel the patient has tried and failed, or has a contraindication or intolerance to, Crinone 4% gel
Revision/Review Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Inhaled Antibiotics and Cystic Fibrosis Agents
Group Description	Inhaled Antiblotics and Cystic Fibrosis Agents
Group Desemption	Preferred products: tobramycin 300 mg/5 mL
Drug(s)	Non-preferred/Unlisted products: tobramycin 300 mg/4 mL, Bronchitol (mannitol), Cayston (aztreonam lysine), Arikayce (amikacin), Kitabis Pak (tobramycin), TOBI Podhaler (tobramycin), Pulmozyme (dornase alfa), Bethkis (tobramycin) or any newly marketed inhalation for treatment of cystic fibrosis
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), and/or per standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	See "Other Criteria"
Prescriber Restrictions	Prescriber is a pulmonologist or infectious disease specialist
Coverage Duration	If all of the conditions are met the request will be approved for 12 months.
Other Criteria	 For all Requests: Request is for an FDA approved indication and within dosing guidelines The request is appropriate for member (e.g. age/weight)
	For Arikayce Requests: member has refractory Mycobacterium avium complex (MAC) lung disease AND there is a documented medical reason (e.g. contraindication, intolerance, hypersensitivity, etc.) why parenteral amikacin cannot be used
	For Bronchitol (mannitol) requests: member has documented trial and failure or medical reason for not using generic hypertonic saline nebulization solution (sodium chloride 3% or 7%)
Review/Revision	Requests for Non-Preferred Agents: Member has a documented treatment failure with a preferred agent OR has a documented medical reason (intolerance, hypersensitivity, contraindication, etc.) why they are not able to use a preferred agent
Date: 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Cystic Fibrosis transmembrane conductance regulator (CFTR)
Group Description	Modulators
Drug(s)	Kalydeco, Kalydeco Granules (ivacaftor), Orkambi, Orkambi Granules (lumacaftor/ivacaftor), Symdeko (tezacaftor/ivacaftor), Trikafta (elexacaftor/tezacaftor/ivacaftor), or any newly marketed CFTR modulator to treat cystic fibrosis
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), and/or per standard of care guidelines.
Exclusion Criteria	See "Other Criteria"
Required Medical Information	See "Other Criteria"
Age Restrictions	See "Other Criteria"
Prescriber Restrictions	Prescriber is pulmonologist or specializes in the treatment of cystic fibrosis
Coverage Duration	If all of the conditions are met the initial request will be 6 months. Reauthorization requests will be 12 months.
Other Criteria	Initial criteria:
	 Documentation provided includes a copy of the FDA-cleared cystic fibrosis (CF) mutation test OR documentation from the National Cystic Fibrosis Registry (e.g. screen shot) with member's genetic mutations The request is for an FDA approved indication for the member's genotype and within dosing guidelines The request is appropriate for member (e.g. age/weight) based on FDA-approved package labeling, peer reviewed medical literature and nationally-recognized compendia.
	Reauthorization:
	 Based on prescriber's assessment, patient continues to benefit from therapy The request is within FDA dosing guidelines
Review/Revision Date 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	
Group Description	Dalfampridine
Drugs	dalfampridine (Ampyra)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	History of seizures. Moderate or severe renal impairment (creatinine clearance ≤ 50mL/minute)
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be 18 years of age or older
Prescriber Restrictions	Prescriber must be a neurologist
Coverage Duration	If all of the criteria are met, the request will be approved for 12 months.
Other Criteria	 Initial Authorization: Baseline creatinine clearance (within 60 days of request) Patient has diagnosis of multiple sclerosis (MS) Patient is ambulatory AND has walking impairment Baseline 25 foot walk was submitted with request Documentation was submitted (consistent with pharmacy claims data, OR for new members to the health plan, consistent with chart notes) that patient is currently being treated with a disease modifying therapy (DMT) for MS (e.g. immunomodulator, interferon, immunosuppressive), or documentation of a medical reason (intolerance, hypersensitivity) as to why patient is unable to use one of these agents to treat their medical condition Drug is being requested at an FDA approved dose Re-authorization: Prescriber attests patient's walking has improved with dalfampridine therapy Documentation was submitted patient is on MS treatment (e.g. immunomodulator, interferon, immunosuppressive), or documentation of a
Review/Revision	 medical reason (intolerance, hypersensitivity) as to why patient is unable to use one of these agents to treat their medical condition Drug is being requested at an FDA approved dose

Date: 10/2023	
	Medical Director/clinical reviewer must override criteria when, in his/her
	professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Danazol
Drugs	danazol capsules
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Pregnancy
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	See "other criteria"
Coverage Duration	If the criteria are met, the request will be approved for 6 months. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the request will be approved for 12 months.
Other Criteria	 ENDOMETRIOSIS Diagnosis of endometriosis One of the following: Documented trial and failure or medical reason for not using an analgesic pain reliever (e.g., NSAIDs, COX-2 inhibitors) taken in combination with a hormonal contraceptive (e.g. estrogen/progestin, progestin only) Documented trial and failure of a gonadotropin-releasing hormone (GnRH) agonist or a GNRH antagonist Prescriber is a gynecologist
Revision/Review Date: 10/2023	 HEREDITARY ANGIOEDEMA: Confirmed diagnosis of hereditary angioedema (HAE) Prescriber is an immunologist, allergist, rheumatologist, or hematologist Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Daraprim
Drugs	pyrimethamine (Daraprim)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Patients with documented megaloblastic anemia due to folate deficiency.
Required Medical Information	See "Other Criteria"
Age Restrictions	N/A
Prescriber Restrictions	Prescriber must be an appropriate specialist or documentation has been provided that prescriber has consulted with an appropriate specialist (i.e. infectious disease, OB/GYN).
Coverage Duration	If all of the conditions are met, congenital toxoplasmosis requests will be approved for 12 months, and all other requests will be approved for 3 months-at a time.
Other Criteria	Congenital Toxoplasmosis • Diagnosis of congenital toxoplasmosis
	Acquired Toxoplasmosis Diagnosis of acquired toxoplasmosis Prescribed in combination with leucovorin and either a sulfonamide or clindamycin Patients with Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Syndrome (AIDS) Diagnosis of Toxoplasmosis OR Both of the following: Toxoplasmosis prophylaxis Cystoisosporiasis Pneumocystis jiroveci pneumonia prophylaxis/treatment Documented medical reason why (e.g. intolerance, hypersensitivity, contraindication) sulfamethoxazole/trimethoprim cannot be used
Revision/Review Date 10/2023	 Hematopoietic Cell Transplantation Recipients Medication prescribed for Toxoplasmosis prophylaxis Documentation of medical reason why sulfamethoxazole/trimethorprim cannot be used Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Daybue (trofinetide)
Drugs	Daybue (trofinetide)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with a neurologist
Coverage Duration	If all the criteria are met, the initial request will be approved for 3 months. For continuation of therapy, the request will be approved for 6 months.
Other Criteria	 Initial Authorization: Medication is prescribed at an FDA approved dose Diagnosis of classic or typical Rett Syndrome (RTT) Documentation or attestation of mutation of the MECP2 gene Documentation of patient weight Documentation or provider attestation of all the following:
Revision/Review Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Dendritic Cell Tumor Peptide Immunotherapy
Group Description	December (classical T)
Drugs	Provenge (sipuleucel-T)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Small cell/neuroendocrine prostate cancer
Required Medical Information	See "Other Criteria"
Age Restrictions	See "Other Criteria"
Prescriber Restrictions	Prescriber must be an oncologist or urologist
Coverage Duration	3 doses per lifetime
Other Criteria	Initial Authorization:
	 Metastatic castrate resistant (hormone-refractory) prostate cancer (mCRPC) (consistent with medical chart history) Evidenced by soft tissue and/or bony metastases Patient does NOT have MOCRPC (defined as CRPC whose only evidence of disseminated disease is an elevated serum PSA) is not authorized Visceral metastases (e.g. liver, lung, adrenal, peritoneal, brain) Patient is not currently being treated with systemic immunosuppressants (e.g. chemotherapy, corticosteroids) or, if the patient is being treated with immunosuppressants, the prescriber has provided a valid medical reason for combination therapy Eastern Cooperative Oncology Group (ECOG) score 0-1 Serum testosterone <50 ng/dL (e.g. castration levels of testosterone) Predicted survival of at least six months Reauthorization: Treatment exceeding 3 doses per lifetime will not be authorized
Revision/Review Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Dificid (fidaxomicin)
Drugs	Dificid (fidaxomicin)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber	Prescribed by, or in consultation with, an infectious disease specialist or
Restrictions	gastroenterologist
Coverage Duration	If the criteria are met, the request will be approved for up to a 10-day duration.
Other Criteria	 Authorization for initial Clostridium difficile infection: Documentation provided for intolerance or medical reason why patient is unable to use oral vancomycin Dose requested follows FDA labeling Authorization for recurrent Clostridium difficile infection:
Revision/Review Date: 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Deielei
Group Description	Dojolvi
Drugs	Dojolvi (triheptanoin)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	Prescriber is a specialist in the treatment of the indicated condition
Coverage Duration	Initial: 6 months Renewal: 12 months
Other Criteria	 Initial Authorization: Member has a molecularly confirmed diagnosis of a long-chain fatty acid oxidation disorder (LC-FAOD) Documentation of at least two of the following: Disease specific elevation of acylcarnitines on a newborn blood spot or in plasma Low enzyme activity in cultured fibroblasts One or more known pathogenic mutations in either the CPT2, ACADVL, HADHA, or HADHB gene Member will not be receiving any other medium-chain triglyceride products while taking Dojolvi Documentation of member's daily caloric intake (DCI) Dose is within FDA-indicated limits and does not exceed 35% of DCI Re-Authorization: Documentation submitted indicating the member has experienced a clinical benefit (e.g. increased left ventricular ejection fraction, reduced left ventricular wall mass, reduced maximum heart rate, decreased incidence of rhabdomyolysis) Documentation of member's DCI Dose is within FDA-indicated limits and does not exceed 35% of DCI Dose is within FDA-indicated limits and does not exceed 35% of DCI
Revision/Review Date: 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Dose Rounding Policy Exception Criteria
Drugs	Avastin (bevacizumab), Mvasi, Zirabev, Vegzelma, Alymsys for oncologic indications
Covered Uses	All medically accepted indications. Medically accepted indications are defined using the following compendia resources: the Food and Drug Administration (FDA) approved indication(s) (Drug Package Insert), American Hospital Formulary Service Drug Information (AHFS-DI), and DRUGDEX Information System. The reviewer may also reference disease state specific standard of care guidelines.
Scope	Requests for drugs exceeding the health plan's dose rounding policy limits. • For drugs or biologic agents subject to dose rounding, the dose of the requested agent may be rounded down to the nearest whole vial size if the rounded dose falls within 10% of the prescribed dose. This policy applies to adult patients only.
Criteria	 If the requested medication is subject to other clinical prior authorization criteria, the member must meet criteria for approval also. The provider has submitted justification why the dose-rounding will be inadequate based on the member's condition and treatment history. Exceptions may include but are not limited to: Member is a pediatric patient (< 18 years) Member previously demonstrated a suboptimal or partial response to therapy at a rounded dose Rounded dose is unavailable due to manufacturer supply/shortage issues Provider has a documented medical reason why dose rounding is inappropriate for the member Medical Director/clinical reviewer may override criteria when, in his/her professional judgement, the requested item is medically necessary.
Coverage Duration	Indefinite
Revision/Review Date	12/2023

Field Name	Field Description
Prior Authorization	Elavidus (dalandistmasana mayanamyayas)
Group Description	Elevidys (delandistrogene moxeparvovec)
Drugs	Elevidys (delandistrogene moxeparvovec)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Any deletion in exon 8 and/or exon 9 in the Duchenne muscular dystrophy (DMD) gene Concurrent use with an exon skipping drugs (such as Exondys 51, Amondys 45, Vyondys 53, Viltepso)
Required Medical	See "Other Criteria"
Information	See Other Criteria
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by neurologist or provider who specializes in the treatment of DMD
Coverage Duration	If all the criteria are met, the initial request will be approved for a one-time treatment.
Other Criteria	Initial Authorization:
	Medication is prescribed at an FDA approved dose
	Documentation of weight
	Diagnosis of DMD with a confirmed mutation in the <i>DMD</i> gene
	Attestation patient is ambulatory Mankankankankankankankankankankankankanka
	Member has been on a stable dose of corticosteroids for at least 3 months
	Baseline micro-dystrophin protein level
Revision/Review	
Date: 10/2023	If all of the above criteria are not met, the request is referred to a
	Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Emergency Use Authorization (EUA) Drugs/Products for COVID-19
Drugs	Any drug/product approved by EUA for COVID-19
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Emergency Use Authorization for the drug/product in question, and the Drug Package Insert (PPI).
Exclusion Criteria	See "Other Criteria"
Required Medical Information	See "Other Criteria"
Age Restrictions	As outlined within current FDA Emergency Use Authorization (EUA) guidelines
Prescriber Restrictions	N/A
Coverage Duration	As outlined within current FDA Emergency Use Authorization (EUA) guidelines
Other Criteria	Emergency Use Authorization for COVID-19 related drugs/products
	 (all must apply): The requested drug/product has a currently active Emergency Use Authorization as issued by the U.S. Food and Drug Administration. Use of the requested drug/product is consistent with the current terms and conditions of the emergency use authorization (such as appropriate age/weight, formulation, disease severity, concurrent use with other medications or medical interventions, etc.). Attestation that the provider is not requesting reimbursement for ingredient cost of drug when drug is provided by U.S. government at no charge
Revision/Review Date 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Endari
Drugs	Endari (L-Glutamine)
Covered Uses	Medically accepted indications are defined using the following
Covered Cises	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional (USP
	DI), the Drug Package Insert (PPI), or disease state specific standard of
	care guidelines.
Exclusion Criteria	N/A
Required Medical	See "Other Criteria"
Information	
Age Restrictions	According to package insert
Prescriber	Prescriber must be a hematologist or sickle cell specialist
Restrictions	
Coverage Duration	If all of the conditions are met, requests will be approved for a 12
0.1 0.1	months.
Other Criteria	Initial:
	Member has diagnosis of sickle cell disease
	 Documentation was provided that the patient had 2 or more crises in the last 12 months
	 Documentation was provided the member has been on
	hydroxyurea at the maximum tolerated dose and was compliant
	within the last 6 months (or a medical reason was provided why
	patient is unable to use hydroxyurea)
	Request is for an FDA approved dose
	Reauthorization:
	Prescriber attests member had reduction in number of sickle
	cell crises
	Request is for an FDA approved dose
Revision/Review Date 10/2023	Physician/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Enzyme Replacement Therapy for Acid Sphingomyelinase Deficiency
Group Description	(ASMD)
Drugs	Xenpozyme (olipudase alfa-rpcp)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	N/A
Prescriber	Prescribed by, or in consultation with, a specialist experienced in the
Restrictions	treatment of ASMD
Coverage Duration	If all the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization:
	 Medication is prescribed at an FDA approved dose Member has a diagnosis of ASMD confirmed by one of the following: Deficiency in acid sphingomyelinase (ASM) enzyme activity (as measured by peripheral blood leukocytes, cultured skin fibroblasts, or dried blood spots) Sphingomyelin phosphodiesterase-1 (SMPD1) gene mutation Member has a clinical presentation consistent with ASMD type B or type A/B Documentation of members height and weight Documentation of baseline ALT and AST within 1 month prior to initiation of treatment Re-Authorization: Documentation or provider attestation of positive clinical response in improvement in splanementally beneformed by pulmonery
Date: 2/2024	(i.e. improvement in splenomegaly, hepatomegaly, pulmonary function, etc.)Medication is prescribed at an FDA approved dose
	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Enzyme Replacement Therapies for Fabry Disease
Drugs	Fabrazyme (agalsidase beta)
	Elfabrio (peguniigalsidase alfa)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to the FDA approved prescribing information
Prescriber Restrictions	Prescribed by or in consultation with a geneticist, cardiologist,
	nephrologist or specialist experienced in the treatment of Fabry disease
Coverage Duration	Initial Authorization: If the criteria are met, the request will be approved for a 6-month duration. Reauthorization: If the criteria are met, the request will be approved for a 12-month duration.
Other Criteria	
Other Criteria	 Initial Authorization: Male members must have a documented diagnosis of Fabry disease confirmed by one of the following: An undetectable (<1%) alpha galactosidase A (alpha-Gal-A) activity level OR A deficient alpha-Gal- activity level AND a documented detection of pathogenic mutations in the galactosidase alpha (GLA) gene by molecular genetic testing Female members must have a documented diagnosis of Fabry disease confirmed by detection of pathogenic mutations in the GLA gene by molecular genetic testing AND evidence of clinical manifestation of the disease (e.g. kidney, neurologic, cardiovascular, gastrointestinal) Member must not be using concurrently with Galafold (migalastat) Documentation of the member's current weight Request is for an FDA-approved dose
	Re-Authorization: Documentation that member has experienced an improvement in symptoms from baseline including but not limited to: decreased pain, decreased gastrointestinal

manifestations, decrease in proteinuria, stabilization of increase in eGFR, reduction of left ventricular hypertrophy (LVH) on echocardiogram, or improved myocardial function, or has remained asymptomatic

- Member must not be using concurrently with Galafold (migalastat)
- Documentation of the member's current weight
- Request is for an FDA-approved dose

Revision/Review Date: 7/2023

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Epidiolex (cannabidiol)
Drugs	Epidiolex (cannabidiol)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, the Drug Package Insert, and/or per the standard of care guidelines
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Member must be ≥ 1 year old
Prescriber Restrictions	Prescriber must be neurologist or specialist in treatment of seizure disorder.
Coverage Duration	If the criteria are met, the request will be approved for a 6 month duration.
Other Criteria	 Initial: Clinical diagnosis of Lennox-Gastaut syndrome, Dravet syndrome or Tuberous Sclerosis complex Member has a trial and failure of two antiepileptic drugs Member is currently taking a stable dose of at least one other antiepileptic medication Member's Weight Dose is within FDA approved limits Reauthorization: Documentation has been provided that demonstrates reduction or stabilization of seizure frequency Dose is within FDA approved limits Member's weight
Revision/Review Date: 10/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Erythropoiesis-Stimulating Agents (ESAs)
	Preferred:
	Epogen (epoetin alfa)
	Retacrit (epoetin alfa-epbx)
Drugs	Mircera (methoxy peg-epoetin beta)
	Non-Preferred:
	Aranesp (darbepoetin alfa-polysorbate 80)
	Procrit (epoetin alfa)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	N/A
Coverage Duration	 If criteria are met, the request will be approved as follows: 1 month if the member is deficient in iron, vitamin B12, or folate; and in the presurgical setting 3 months for all other requests If the provider attests that the medication is for a chronic or long-term condition, reauthorization will be approved for 12 months.
Other Criteria	Existing ESA users who are NEW to the plan:
	 Documentation of current dose Drug is being prescribed for an FDA-approved indication at an FDA-approved dose or is otherwise supported by the compendia or standard-of-care guidelines The member's hemoglobin (Hgb) is within the following indication-specific range: Anemia of CKD: Hgb ≤ 11 g/dl Anemia related to cancer: Hgb ≤ 12 g/dl Zidovudine-related anemia in members with HIV: Hgb ≤ 12 g/dl

o Ribavirin-induced anemia: $Hgb \le 12 \text{ g/dl}$

Requests for Initial Therapy

- Drug is being prescribed for an FDA-approved indication at an FDA-approved dose or is otherwise supported by the compendia or standard-of-care guidelines
- All lab results submitted must have been drawn within 30 days of request
- The following lab values have been submitted:
 - o hemoglobin (Hgb)
 - o hematocrit (HCT)
- The following lab results must be submitted and demonstrate normal values, otherwise, the member MUST be receiving, or is beginning, therapy to correct the deficiency:
 - o serum ferritin $\geq 100 \text{ ng/mL}$
 - o transferrin saturation (TSAT > 20%)
 - o vitamin B12 level > 223 pg/mL
 - o folate level > 3.1 ng/mL
- For requests for non-preferred ESAs, documentation must be provided as to why preferred products are not medically appropriate for the member.

Requests for anemia of CKD:

• Hgb < 10 g/dL

For anemia related to cancer:

- Receiving myelosuppressive therapy for palliative treatment for at least two
 months (members receiving myelosuppressive therapy with <u>curative intent</u> should
 <u>not</u> receive ESAs) AND documented <u>symptomatic</u> anemia with Hgb < 10 g/dL
- **OR** Member has symptomatic anemia related to myelodysplastic syndrome AND documented serum erythropoietin level ≤ 500 mU/mL

For zidovudine-related anemia in members with HIV:

- The member must currently be receiving highly active antiretroviral therapy (HAART)
- Erythropoietin level < 500 mU/mL
- Member is receiving a dose of zidovudine $\leq 4,200$ mg/week

For ribavirin-induced anemia:

- Member is currently receiving ribavirin
- Hgb < 12 g/dL

For members undergoing surgery to reduce the need for allogenic blood transfusion:

• Perioperative hemoglobin must be < 13 g/dL and > 10 g/dL

• The member is scheduled for an elective, non-cardiac, nonvascular surgery.

Reauthorization:

- All submitted lab results have been drawn within 30 days of the reauthorization request
- The following lab results must be submitted and demonstrate normal values, otherwise, the member MUST be receiving, or is beginning, therapy to correct the deficiency:
 - o Serum ferritin level > 100 ng/mL
 - o Transferrin saturation (TSAT) > 20%
 - o vitamin B12 level > 223 pg/mL
 - o folate level > 3.1 ng/mL
- The member's hemoglobin is within the following indication-specific range:
 - o Anemia of CKD: Hgb ≤11 g/dL
 - o Anemia related to cancer: Hgb < 12 g/dL
 - o Zidovudine-related anemia in members with HIV: $Hgb \le 12 \text{ g/dL}$
 - o Ribavirin-induced anemia: $Hgb \le 12 \text{ g/dL}$
- An increase in dose has not occurred more than once every 4 weeks

Revision/Review Date: 10/2023

For requests that fall outside of these parameters, or if the criteria are not met, the request will be referred to a Medical Director/clinical reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Fecal Microbiota
Group Description	Rebyota (fecal microbiota, live-jslm)
Drugs	Vowst (fecal micromiota spores, live-brpk)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Treatment of Clostridioides difficile infection (CDI)
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	N/A
Coverage Duration	If all the criteria are met, the request will be approved for 1 treatment course
Other Criteria	Medication is prescribed at an FDA approved dose
	 Diagnosis of at least 1 recurrent episode of CDI (≥2 total CDI episodes)
	• Current episode of CDI must be controlled (<3 unformed/loose stools/day for 2 consecutive days)
	Positive stool test for C. difficile within 30 days before prior authorization request
	Administration will occur 24–72 hours following completion of antibiotic course for CDI treatment
Date: 7/2023	For Vowst only: attestation patient will bowel cleanse using magnesium citrate or polyethylene glycol electrolyte solution the day before the first dose of Vowst
	Rebyota and Vowst are limited to 1 treatment course
	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Filspari (sparsentan)
Drugs	Filspari (sparsentan)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Pregnancy Coadministration with renin-angiotensin-aldosterone system (RAAS) inhibitors, endothelin receptor antagonists, or aliskiren
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must be a nephrologist or in consultation with a nephrologist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 9 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	 Initial Authorization: Medication is prescribed at an FDA approved dose Diagnosis of primary immunoglobulin A nephropathy (IgAN) verified by biopsy Total urine protein ≥1.0 g/day eGFR ≥30 mL/min/1.73 m2 Trial and failure with a maximized stable dose of ACE inhibitor or ARB Re-Authorization: Documentation of positive clinical response as evidenced by a decrease in urine protein-to-creatinine ratio (UPCR) Medication is prescribed at an FDA approved dose
Date: 4/2023	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Galafold
Group Description	
Drugs	Galafold (migalastat)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional (USP
	DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Members should be greater than or equal to 18 years of age
Prescriber Restrictions	Prescribed by or in consultation with a geneticist, cardiologist,
	nephrologist or specialist experienced in the treatment of Fabry
	disease
Coverage Duration	Initial Authorization: If the criteria are met, the request will be
	approved for a 6-month duration.
	Reauthorization: If the criteria are met, the request will be approved
	for a 12-month duration.
Other Criteria	Initial Authorization:
	Member has a documented diagnosis of Fabry disease
	Documentation member has an amenable galactosidase alpha
	(GLA) gene variant based on in vitro assay data
	Member will not be using Galafold concurrently with enzyme replacement therapy (e.g., Fabrazyme)
	 Documented baseline eGFR ≥ 30 mL/min
	Request is for an FDA-approved dose
	Re-Authorization:
	Documentation that member has experienced an
	improvement in symptoms from baseline including but
	not limited to: decreased pain, decreased gastrointestinal
	manifestations, decrease in proteinuria, stabilization of
	increase in eGFR, reduction of left ventricular hypertrophy (LVH) on echocardiogram, or improved
	myocardial function
	Member must not be using concurrently with other enzyme
	replacement therapy (e.g., Fabrazyme)
	 Documented eGFR ≥ 30 mL/min
	Request is for an FDA-approved dose
L	. 4

Revision/Review Date: 10/2023	If the criteria are not met, the request will be referred to a clinical reviewer for medical necessity review.
	Physician/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Agents to Treat Gaucher's Disease
Drugs	Cerdelga (eliglustat), Cerezyme (imiglucerase), Vpriv (velaglucerase alfa), Elelyso (taliglucerase alfa), miglustat (Zavesca)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	None
Required Medical Information	See "Other Criteria"
Age Restrictions	Per package insert
Prescriber Restrictions	Prescriber is a specialist in treatment of Gaucher's Disease (e.g.
	endocrinologist, hematologist or geneticist), or is in consultation with a specialist
Coverage Duration	If all of the conditions are met, the request will be approved with 6-month duration.
Other Criteria	Initial Authorization:
	Cerezyme, Vpriv, Elelyso, or miglustat initial authorization:
	Patient has a confirmed diagnosis of Gaucher's disease,
	type 1 (GD1)
	Request is for an FDA approved dose
	Cerdelga initial authorization:
	 Patient has a confirmed diagnosis of Gaucher's disease, type 1 (GD1) and is a CYP2D6 extensive metabolizer (EM), intermediate metabolizer (IM) or poor metabolizer (PM), as detected by an FDA-approved test. Patient is not concomitantly taking Class IA (e.g.
	quinidine, procainamide) or Class III antiarrhythmic (e.g. amiodarone, sotalol).
	 For EMs or IMs, patient is not concomitantly taking a moderate or strong CYP2D6 inhibitor (e.g. fluoxetine, bupropion) WITH a moderate or strong CYP3A inhibitor (fluconazole, ketoconazole).
	 For IMs and PMs, patient is not concomitantly taking a strong CYP3A inhibitor.
	 Patient has no pre-existing cardiac disease or long QT syndrome.
	 For EM's, patient does not have moderate or severe hepatic impairment
	For IM's or PMs, patient does not have any degree of hepatic impairment.

	Re-Authorization criteria for all agents: • Documentation has been provided that patient has obtained
Revision/Review Date	clinical benefit from medication (e.g. increased platelet count, improvement in anemia, PFT's, improvement in radiographic scans, improved quality of life) • Request is for an FDA approved dose
4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Generalized Pustular Psoriasis (GPP) Agents
Drugs	Spevigo (spesolimab-abzo)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Per package insert
Prescriber Restrictions	Prescribed by or in consultation with a dermatologist or geneticist
Coverage Duration	If all of the criteria are met, the request will be approved for up to 2 doses. If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.
Other Criteria	 Diagnosis of generalized pustular psoriasis (GPP) Member is experiencing an acute flare of GPP of moderate to severe intensity as defined by the patient having all of the following: Generalized Pustular Psoriasis Physician Global Assessment (GPPPGA) total score of 3 or greater Presence of fresh pustules (new appearance or worsening of pustules) GPPPGA pustulation sub score of 2 or greater At least 5% of body surface area covered with erythema and the presence of pustules If member has previously received Spevigo treatment for a prior GPP flare, member must have achieved a clinical response, defined as achieving a GPPPGA score of 0 or 1, to previous treatment but is now experiencing a new flare Medication is prescribed at an FDA approved dose
Date: 2/2024	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Prior Authorization	Consideration Delegging Hermans (CNDH) Associate
Group Description	Gonadotropin Releasing Hormone (GNRH) Agonists
	IF DIAGNOSIS IS CANCER, USE ONCOLOGY CRITERIA **If Diagnosis is Gender Dysphoria, use Medications without Drug or Class Specific Criteria**
Drug(s)	Preferred: Lupron Depot (leuprolide acetate), Lupron Depot-Ped (leuprolide acetate), leuprolide acetate 22.5mg vial, Fensolvi (leuprolide acetate), Supprelin LA (histrelin acetate), Synarel (nafarelin acetate), Triptodur (triptorelin pamoate), Trelstar (triptorelin pamoate)
	Non-Preferred:
	any newly marketed GnRH agonist
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), and/or per the National Comprehensive Cancer Network (NCCN), the American Society of Clinical Oncology (ASCO), the American College of Obstetricians and Gynecologists (ACOG), or the American Academy of Pediatrics (AAP) standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert if not detailed in "Other Criteria"
Prescriber Restrictions	Prescriber must be a specialist in the appropriate field to treat the member's condition.
Coverage Duration	If all of the conditions are met, the request will be approved for up to 12 months if diagnosis is central precocious puberty, and up to 6 months as indicated below for other indications as recommended per FDA approved indications and/or as defined by the medical compndium or standard of care guidelines.
Other Criteria	INITIAL AUTHORIZATION for ALL REQUESTS:
	The medication is being prescribed for an FDA approved/standard of care guideline indication and within FDA approved/standard of care dosing guidelines. AND the member meets the following for the respective diagnosis:
	Central precocious puberty (CPP)
	 Onset of secondary sexual characteristics occurred when member was aged less than 8 years for females or aged less than 9 years for males Diagnosis is confirmed by a pubertal response to a GnRH stimulation test and/or measurement of gonadotropins (FSH/LH) and bone age advanced beyond chronological age. Patients with low or intermediate basal levels of LH should

have a GnRH stimulation test to clarify the diagnosis.

- If basal levels of LH are markedly elevated [e.g. more than 0.3mlU/ml (where IU- International units)] in a child with precocious puberty, then a diagnosis of CPP can be made without proceeding to a GnRH stimulation test.
- Brain magnetic resonance imaging (MRI) has been performed for all boys with CPP and for girls with onset of secondary sexual characteristics before the age of six years of age to rule out a tumor.
- If the request is for a non-preferred drug, the member has had a documented trial and failure with a preferred drug, or a documented medical reason (e.g. intolerance, hypersensitivity, contraindication) was submitted why the member is not able to use a preferred drug

Endometriosis

- For all therapies except Lupron, Lupron Depot, or Lupron Depot-Ped, member is ≥ 18 years of age AND
- Member has a confirmed diagnosis (e.g. laparoscopy, etc.) of endometriosis
- Documented trial and failure or medical reason for not using an analgesic pain reliever (e.g., NSAIDs, COX-2 inhibitors) taken in combination with combined estrogen progestin oral contraceptive pills (OCPs):
 - o If one of the following drugs has been tried previously, a trial of OCPs is not required: progestins, Orilissa (elagolix), danazol, or aromatase inhibitors (anastrazole, letrozole)
- If the request is for a non-preferred drug, the member has had a documented trial and failure with a preferred drug, or a documented medical reason (e.g. intolerance, hypersensitivity, contraindication) was submitted why the member is not able to use a preferred drug
- Approval is 6 months

Uterine leiomyomas (Fibroids)

- Member has a confirmed diagnosis (e.g. pelvic examination, etc.)
- If the request is for a non-preferred drug, the member has had a documented trial and failure with a preferred drug, or a documented medical reason (e.g. intolerance, hypersensitivity, contraindication) was submitted why the member is not able to use a preferred drug
- Approval is 3 months

Endometrial thinning

- Member has a confirmed diagnosis (e.g. pelvic examination, etc.)
- Documentation indicates patient is scheduled for endometrial ablation for dysfunctional uterine bleeding.
- If the request is for a non-preferred drug, the member has had a documented trial and failure with a preferred drug, or a documented medical reason (e.g. intolerance, hypersensitivity, contraindication) was submitted why the member is not able to use a preferred drug
- Approval is 3 months

REAUTHORIZATION for all requests:

- The medication is being prescribed for an FDA approved indication and within FDA approved dosing guidelines.
- Documentation was provided supporting continued treatment (e.g. patient still has symptoms), and medication is being continued as recommended in package insert or standard of care guidelines.

AND meets the following per diagnosis:

Central precocious puberty (CPP)

• If the medication reauthorization is for central precocious puberty, the child is male and < 12 years or female and < 11 years of age OR a documented medical reason to continue treatment was provided with request, and includes current height and bone age

Endometriosis

- Prescriber has evaluated patient for osteoporosis (e.g. Dexascan), and patient is receiving "add back" hormonal therapy (norethindrone acetate 5 mg daily alone or with conjugated estrogen therapy) or an oral bisphosphonate AND calcium and vitamin D supplementation.
- The patient has not received cumulative doses of the GnRH agonist greater than 12 months of therapy.

Revision/Review Date: 1/2024

Fibroids

• The patient has not received cumulative doses of the GnRH agonist greater than 6 months of therapy

NOTE: Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Prior Authorization Group Description	Gonadotropin Releasing Hormone Receptor Antagonists	
Drugs	Preferred: Orilissa (elagolix), Myfembree (relugolix, estradiol, and norethindrone acetate)	
Diugo	Non-Preferred: Oriahnn (elagolix, estradiol, and norethindrone acetate)	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, the Drug Package Insert, and/or per the standard of care guidelines	
Exclusion Criteria	 Pregnancy History of osteoporosis History of hepatic impairment (Myfembree, Oriahnn), or severe hepatic impairment (Orilissa) 	
Required Medical Information	See "Other Criteria"	
Age Restrictions	Member must be ≥18 years of age	
Prescriber Restrictions	Prescriber is a obstetrician/gynecologist	
Coverage Duration	 If the criteria are met, the request will be approved as outlined below: Initial Authorization: 6 months Reauthorization: 6 months 6 months for patients with moderate hepatic impairment requesting 150 mg once daily dosing. 	
Other Criteria	 Initial Authorization for all requests: Medication is prescribed at an FDA approved dose If patient is of childbearing potential, prescriber attests the patient is not currently pregnant Prescriber attests the patient does not have a history of osteoporosis Prescriber attests they have reviewed the patient's liver function For a diagnosis of endometriosis associated with moderate to severe pain Request is for Orilissa or Myfembree only Documented trial and failure or medical reason for not using an analgesic pain reliever (e.g., NSAIDs, COX-2 inhibitors) taken in combination with combined estrogen progestin oral contraceptive pills (OCPs):	
	releasing hormone (GnRH) agonists, danazol, or aromatase inhibitors (e.g. anastrozole, letrozol) For a diagnosis of heavy menstrual bleeding associated with uterine leiomyomas (fibroids):	

•	Request	is for	Oriahnn	or My	yfembree	only
---	---------	--------	---------	-------	----------	------

- Documented trial and failure or medical reason for not using estrogenprogestin contraceptive therapy
- If one of the following drugs has been tried previously, a trial of estrogen-progestin contraceptive therapy is not required:
 - o gonadotropin-releasing hormone (GnRH) agonists,
 - o progestin-releasing intrauterine device
 - o tranexamic acid
- If the request is from Oriahnn, there is a documented trial and failure of Myfembree, or medical reason why Myfembree cannot be used

Revision/Review Date: 2/2024

Reauthorization:

- Medication is prescribed at an FDA approved dose
- Maximum lifetime treatment duration based on previous dosing and/or hepatic functioning has not been exceeded
- Documentation or provider attestation of positive clinical response (e.g., reduction in pain, reduced menstrual bleeding).

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group	Growth Hormone (GH) for Growth Failure or GH Deficiency	
Drug(s)	Preferred products: Norditropin FlexPro (somatropin) Nutropin AQ (somatropin) Genotropin cartridge, Genotropin MiniQuick (somatropin) Non-preferred/unlisted products: Humatrope (somatropin) Sogroya (somapacitan-beco) Ngenla (somatrogon) Omnitrope (somatropin) Saizen, Saizenprep (somatropin) Skytrofa (lonapegsomatropin-tcgd) Zomacton (somatropin) Any newly marketed growth hormone agent	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	Treatment of idiopathic short stature (ISS) not a covered benefit and will not be approved	
Required Medical Information	See other criteria	
Age Restrictions	According to package insert	
Prescriber	Prescribed by or in consultation with an endocrinologist or specialist in the stated	
Restrictions	diagnosis If all of the conditions are met, the initial request will be approved for 12	
Coverage Duration	months.	
Other Criteria	 Initial Authorization If diagnosis is for growth failure associated with chronic kidney disease (CKD), documentation that: Either pretreatment height is less than -1.88 standard deviations (SD) below the mean for age or the height velocity for age is less than 3rd percentile and persists beyond 3 months AND epiphyses are open If diagnosis is for growth failure associated with Prader-Willi Syndrome, Noonan Syndrome, Turner's syndrome, or short stature homeobox-containing gene (SHOX) mutation, or other underlying genetic cause, documentation of confirmatory genetic testing is provided. If diagnosis is adult-onset GH deficiency (AO-GHD), documentation of one of the following: Insulin Growth Factor (IGF-1) deficiency (< -2 SD below reference range for age and gender*) and multiple (≥3) pituitary hormone deficiencies (MPHD) Evidence of genetic defects affecting the hypothalamic pituitary axis 	

(HPA)

- o Evidence of hypothalamic pituitary structural brain defects
- O Positive results of GH stimulatory test (e.g. insulin tolerance test [ITT], glucagon, arginine, clonidine, or macimorelin).
- If diagnosis childhood-onset GH deficiency (CO-GHD),
 - O And patient is currently pediatric, documentation of all of the following is required:
 - IGF-1 and insulin-like growth factor binding protein-3 (IGFBP-3) deficiency (less than 0 SD below reference range for age and gender)* with prescriber attestation of growth failure AND
 - Provider attests that MRI or CT has been completed to exclude possibility of a pituitary tumor AND
 - Provider attests that member's epiphyses are open
 - o And patient is currently adult, documentation of one of the following:
 - If diagnosis is idiopathic isolated GHD, documentation was provided that indicates GH therapy is still medically necessary (IGF-1 retesting during the transition period after a minimum 1 month of therapy discontinuation reveals continued GH deficiency)
 - Diagnosis is GHD associated with MPHD, genetic defect affecting the HPA axes, or patient with hypothalamic pituitary structural brain defect
- Requests for Non-Preferred Agents: Member has a documented treatment
 failure with at least two of the preferred agents OR has a documented medical
 reason (intolerance, hypersensitivity, contraindication, etc.) why they are not
 able to use any of the preferred agents.

Reauthorization

Revision/Review Date: 2/2024

- Documentation of diagnosis (Note: ISS is not a covered benefit)
- Documented IGF-1 levels do not exceed upper limit of normal (ULN) (> 2 SD above reference range for age and gender)*, or if the IGF-1 levels exceed ULN, the dose has been reduced
- In CO-GHD, growth response (as demonstrated by length/height and calculated height velocity within previous 6 months).

*IGF-1 levels are highly age and gender specific. In the event the form provides a value and not the corresponding reference range, refer to published reference ranges for interpretation.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description	
Prior Authorization Group Description	Hemangeol (propranolol)	
Drugs	Hemangeol (propranolol HCl) oral solution, 4.28 mg/mL	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "Other Criteria"	
Age Restrictions	See "Other Criteria"	
Prescriber Restrictions	N/A	
Coverage Duration	If all of the conditions are met, initial requests will be approved for up to 12 months. Subsequent authorizations will be approved for up to 6 months.	
Other Criteria	<u>Initial Authorization (all must apply):</u>	
	 Member has a diagnosis of proliferating infantile hemangioma which requires systemic therapy Member is at least 5 weeks corrected gestational age Member's weight is at least 2 kg Request is for FDA approved dose (member's weight must be provided with the request) 	
	Renewal Authorization (all must apply):	
	 Request is for FDA approved dose (member's weight must be provided with the request) Documentation is provided to support continued use of Hemangeol solution beyond the initial 12 month authorization period (ex. rebound growth or recurrence of infantile hemangioma, medical justification of extended length of therapy due to patient's condition, etc.) 	
Revision/Review Date 10/2023	Physician/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.	

Field Name	Field Description
Prior Authorization	Primary Hemophagocytic Lymphohistiocytosis (HLH) Agents
Group Description	Trimary Temophagocytic Lymphonistiocytosis (TLII) Agents
Drugs	Gamifant (emapalumab-lzsg)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Members who have undergone hematopoietic stem cell transplantation (HSCT)
Required Medical Information	"See Other Criteria"
Age Restrictions	N/A
Prescriber	Hematologist, Oncologist, Immunologist, Transplant Specialist, or other
Restrictions	specialist experienced in the treatment of immunologic disorders
Coverage Duration	Initial Authorization: 1 month
Other Criteria	*Gamifant will only be approved for members who have not yet
	 received HSCT and will be discontinued at the initiation of HSCT* Initial Authorization Member has a diagnosis of Primary HLH Prescriber attests that member has not achieved a satisfactory response to or is intolerant to conventional HLH therapy (e.g. etoposide, dexamethasone) or has recurrent disease Prescriber attests that the member is a candidate for hematopoietic stem cell transplant (HSCT) Member has been screened for latent tuberculosis infection Member has or will receive prophylactic pre-medications (e.g. antivirals, antibiotics, antifungals) for Herpes Zoster, <i>Pneumocystis jirovecii</i>, and other fungal infections Dosing is consistent with FDA approved labeling Reauthorization Member continues to meet initial authorization criteria Member is receiving prophylactic pre-medications (e.g. antivirals, antibiotics, antifungals) for Herpes Zoster, <i>Pneumocystis jirovecii</i>, and other fungal infections

	Medical Director/clinical reviewer must override criteria when, in
Revision/Review	his/her professional judgement, the requested item is medically
Date 4/2023	necessary.

Prior Authorization Group Description	Hemlibra	
Drugs	Hemlibra (emicizumab-kxwh)	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "other criteria"	
Age Restrictions	N/A	
Prescriber Restrictions	Prescriber must be a hematologist	
Coverage Duration	If the criteria are met, requests will be approved for 6 months. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the request will be approved for 12 months.	
Other Criteria	 Initial Authorization: Documentation submitted indicates the following: The patient's weight Dose is within FDA-indicated limits Severe hemophilia A AND one of the following Member has tried Factor VIII products and is not well-managed due to limited venous access (attestation must be submitted from prescriber) Request is for routine prophylaxis in patients with a diagnosis of severe hemophilia A WITH Factor VIII inhibitors and history of spontaneous or traumatic bleeding episode	
	 Re-Authorization: Documentation submitted indicating the member has experienced a clinical benefit from the medication (e.g. reduction in bleeding episodes, improved quality of life) The patient's weight Dose is within FDA-indicated limits 	
Revision/Review Date: 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.	

Prior Authorization	Blooding Disorder Blood Products		
Group Description	Bleeding Disorder Blood Products		
Drugs	<u>Preferred:</u> Afstyla, Alphanate, Alphanine SD, Alprolix, Benefix, Hemofil M,		
	Humate-P, Ixinity, Jivi, Koate, Kovaltry, Mononine, Novoeight, Nuwiq,		
	Profilnine, Rixubis, Wilate, Xyntha, Xyntha Solofuse		
	Non-Formulary/Non-preferred: Advate, Adynovate, Altuviiio, Eloctate,		
	Esperoct, Kogenate FS, Recombinate, Vonvendi, Idelvion, Obizur, Rebinyn,		
	Vonvendi, Coagadex, Corifact, Feiba, NovoSeven RT, Tretten, Sevenfact and		
	any newly marketed blood product indicated for a bleeding disorder		
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.		
Exclusion Criteria	N/A		
Required Medical Information	See "Other Criteria"		
Age Restrictions	Patient must be age appropriate per package insert		
Prescriber Restrictions	Prescriber must be a hematologist		
Coverage Duration	If all of the criteria are met, the request will be approved for 1 month. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the request will be approved for 12 months.		
Other Criteria			
	Patient has a diagnosis of a bleeding disorder, and the type of deficiency has been provided		
	The drug is being used for an FDA-approved indication at an FDA		
	approved dose or the indication/dose are otherwise supported by treatment guidelines.		
Revision/Review	Requests for Non-Preferred Agents: Member has a documented treatment failure with at least two of the preferred agents OR has a documented medical reason (intolerance, hypersensitivity, contraindication, etc.) why they are not able to use preferred agents.		
Date: 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her		
	professional judgement, the requested item is medically necessary.		

Prior Authorization Group Description	Hepatitis C Antiviral Agents
Drugs	Preferred products: • Mavyret (glecaprevir/pibrentasvir) • ribavirin • sofosbuvir/velpatasvir (Epclusa) 400-100 mg tablets **Preferred sofosbuvir/velpatasvir, and ribavirin products do not require prior authorization for up to 12 weeks of therapy per year. Mavyret does not require prior authorization for up to 16 weeks of therapy per year** Non-preferred/unlisted products: • Epclusa (sofosbuvir/velpatasvir) 200-50 mg tablets • Epclusa (sofosbuvir/velpatasvir) pellet packets • Epclusa (brand) 400-100 mg tablets • Harvoni tablets, pellet packets
	 ledipasvir/sofosbuvir (Harvoni) tablets Peg-Intron (peginterferon alfa-2b) Pegasys (peginterferon alfa-2a) Sovaldi (sofosbuvir) tablets, pellet packets Vosevi (sofosbuvir/ velpatasvir/voxilaprevir) Zepatier (elbasvir/grazoprevir) Any other newly marketed antiviral agent for the treatment of Hepatitis C
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Per drug package insert
Prescriber Restrictions	See "Other Criteria": For treatment-experienced members, prescriber must be a specialist in hepatology, gastroenterology, infectious disease, HIV, or liver
Coverage Duration	If the criteria are met, requests will be approved for a 28 day supply for a duration of 6 months.

Initial requests must meet ALL of the following requirements:

- Request must be for a FDA-approved/AASLD guideline recommended indication, at an approved dose and duration, appropriate for the member (e.g. age/weight).
- Provider attests that they have documentation of a complete Hepatitis B screening (sAg and cAb)
 - If positive quantitative HBV DNA results and if there is detectable HBV DNA, a treatment plan for Hepatitis B consistent with AASLD recommendations
 - o If negative, documentation of a hepatitis B immunization plan or counseling to receive the hepatitis B immunization series
- Provider attests that they have documented HIV screening and if the member has confirmed HIV, documentation was provided they are being treated with antiretroviral therapy, or a reason is provided with rationale for not treating HIV
- Provider attests that all potential drug interactions with concomitant medications have been addressed (including discontinuation of the interacting drug, dose reduction, or counseling of the member of the risks associated with the use of both medications).
- Provider attests if member is actively abusing alcohol or IV drugs, or has a
 history of abuse that they have counseled member regarding the risks of
 alcohol or IV drug abuse, and an offer of referral for substance abuse
 disorder treatment has been made.
- Provider attests that member is committed to treatment plan, including lab
 monitoring and SVR12 lab testing will be completed and submitted to health
 plan.
- The following are required before treatment (copies of labs required):
 - o Detectable HCV RNA viral load
 - o Fibrosis level
 - Treatment history
 - o CBC (only if regimen contains ribavirin and hemoglobin must be be at least 10g/dL)
 - o TSH (only if regimen contains interferon)
 - o Pregnancy test (as applicable)
 - o If member is cirrhotic, documentation of Child Turcotte Pugh Class (Class A, Class B, Class C).
- If treatment naïve and request is for Zepatier, documentation of RASs (resistance-associated substitutions, previously called RAVs) must be provided

Other Criteria

•	If treatment	experienced	
•	n neament	experienced	

- o Prescriber must be a specialist in hepatology, gastroenterology, infectious disease, HIV, or liver transplant
- o Documentation of genotype (and subtype if provided)
- o Documentation of RASs testing for:
 - Zepatier or Harvoni genotype1a requests
- If request is for a non-preferred agent, documentation of medical necessity was provided including a medical reason why member is not able to use a preferred agent.

Revision/Review Date: 1/2024

• If request is for sofosbuvir/velpatasvir, or a ribavirin product for a duration greater than 12 weeks of therapy per year, or for Mavyret for a duration greater than 16 weeks of therapy per year, documentation of medical necessity was provided including a medical reason why treatment beyond that duration is required.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Hereditary Angioedema Treatment	
Drugs	Preferred: Berinert (C1 Esterase Inhibitor), danazol (Danocrine), icatibant (Firazyr), Haegarda (C1 Esterase Inhibitor), Cinryze (C1 Esterase Inhibitor), Ruconest (C1 Esterase Inhibitor), Takhzyro (lanadelumab-flyo), Kalbitor (ecallantide), Orladeyo (berotralstat), Firazyr (icatibant), Sajazir (icatibant) Non-Preferred: Any newly marketed agent for hereditary angioedema For danazol requests, refer to the "Danazol" policy	
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.	
Exclusion Criteria	N/A	
Required Medical Information	See "Other Criteria"	
Age Restrictions	According to package insert	
Prescriber Restrictions	Prescriber is an immunologist, allergist, rheumatologist, or hematologist	
Coverage Duration	If criteria are met, the request will be approved as follows: • Acute treatment: 1 + 5 refills • Pre procedural prophylaxis: 1 treatment • Long-term prophylaxis: o Initial:6 months, o Reauthorization: 12 months	

Other Criteria

All requests MUST meet the following requirements:

- Drug is being requested at an FDA approved dose
- The patient is not taking ACE inhibitors or estrogen replacement containing oral contraceptives/hormone replacement therapy

Diagnosis of one of the following:

- HAE with deficient or dysfunctional C1INH (e.g. type I, type II, or acquired C1NH deficiency)
- HAE with normal C1INH:
 - o If known origin, documentation of results of confirmatory genetic test (e.g. mutations in gene for factor XII, angiopoietin-1, plasminogen, kininogen-1)
 - o If unknown origin (U-HAE), documentation of a prolonged trial of high-dose non-sedating antihistamines

For acute treatment:

- The patient is receiving only one agent for the treatment of acute attacks
- If the request is for a non-preferred agent, the member has documented trial and failure of, or a documented medical reason why the member cannot use, a preferred agent

For prophylaxis:

- Pre-procedural: Documentation that patient will be undergoing a medical, surgical, or dental procedure associated with mechanical impact to the upper aerodigestive tract
- Long-Term: The patient has a history of at least two severe attacks per month (e.g. with swelling of the face, throat, or GI tract) or at least one laryngeal attack and chart notes have been submitted indicating the date and severity of attack. The patient is only receiving one medication for long-term prophylaxis
- If the request is for a non-preferred agent
 - And the patient has a C1INH deficiency or dysfunction, documented trial and failure of or medical reason why patient cannot use a preferred agent
 - o And the patient has HAE with normal C1INH, documented trial and failure of, or documented medical reason why patient cannot use danazol (note: danazol may require prior authorization)

Re-authorization Criteria:

For acute treatment:

- Documentation was submitted that the patient has experienced a clinical benefit from HAE medication
- The patient is receiving no other medications for acute treatment
- The medication is being prescribed at an FDA-approved dose

	For prophylaxis:
Revision/Review Date: 4/2023	 Documentation was submitted that the patient has experienced a clinical benefit from prophylactic therapy as demonstrated by a reduced number of attacks The medication is being prescribed at an FDA approved dose If the request is for Takhzyro and the patient has been well controlled (e.g. attack free) for 6 months or more while receiving Takhzyro the patient will be receiving 300 mg every four weeks, or a medical reason has been provided why continued therapy with 300 mg every two weeks is necessary The patient is receiving no other medications for prophylaxis Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Hormone Replacement Therapy (estrogen-only oral and vaginal
Group Description	products)
Drugs	FORMULARY STATUS Preferred, Pays at Point-of-Sale
	Estradiol (Estrace) oral tablet
	Estradiol (Estrace) vaginal cream
	Estradiol (Vagifem) vaginal tablet
	FORMULARY STATUS Preferred, Requires Step Therapy
	Premarin (estrogens, conjugated) oral tablet
	Premarin (estrogens, conjugated) vaginal cream
	Menest (estrogens, esterified) oral tablet
Covered Uses	Medically accepted indications are defined using the following sources:
	the Food and Drug Administration (FDA), Micromedex, American
	Hospital Formulary Service (AHFS), United States Pharmacopeia Drug
	Information for the Healthcare Professional (USP DI), the Drug
	Package Insert (PPI), or disease state specific standard of care
	guidelines.
Exclusion Criteria	N/A
Required Medical	See "other criteria"
Information	
Age Restrictions	N/A
Prescriber	N/A
Restrictions	
Coverage Duration	If the criteria are met, the request will be approved with up to a 12
0.1 0.1	month duration.
Other Criteria	For all requests:
	• The request is for an FDA approved indication.
	Initial authorization for Premarin and Menest oral tablet
	Documented trial and failure or intolerance with estradiol oral tablet
	If the request is for the treatment of moderate to severe symptoms of vulvar and vaginal atrophy or atrophic vaginitis
	due to menopause, must also have documented trial and failure
	or intolerance with estradiol vaginal cream OR estradiol vaginal
	tablet
	Initial authorization for Premarin vaginal cream
	Documented trial and failure or intolerance with estradiol
Revision/Review Date 10/2023	vaginal cream OR estradiol vaginal tablet
	Medical Director/clinical reviewer must override criteria when, in
	his/her professional judgement, the requested item is medically
	necessary.

Prior Authorization Group Description	Hyaluronic Acid Derivatives
Drug(s)	Euflexxa, Gel-One, Gelsyn-3, GenVisc 850, Hyalgan, Supartz FX, TriVisc, Visco-3, Durolane, Hymovis, Monovisc, Orthovisc, Synvisc, Synvisc-One, Triluron, sodium hyaluronate 1% syringe, or any newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), or the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See other criteria
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber is a rheumatologist, orthopedist, sports medicine specialist, or physiatrist
Coverage Duration	If all of the criteria are met, the request will be approved for one complete course of treatment (based on the FDA labeled dose of the drug requested).
Other Criteria	 Initial Authorization: A diagnosis of Osteoarthritis (OA)/Degenerative joint disease (DJD) of the knee. Documentation (in claim history or provider statement) that the member has had trials of at least 2 alternatives (e.g. acetaminophencontaining products, topical NSAIDs, oral NSAIDs, other oral analgesics, etc.) without improvement in pain/function or has a medical reason (intolerance, hypersensitivity, contraindication, etc.) for not being able to utilize these therapies. Documentation has been provided that the member has tried and failed two intra-articular steroid injections, per affected knee, or the member has a medical reason for not being able to utilize steroid injections.
Revision/Review Date: 2/2024	 Reauthorization: Documentation was submitted that the patient had a response to the treated knee(s) that lasted at least 6 months (e.g. decreased joint pain or stiffness, improved range of motion, etc.) Documentation was submitted that the patient has a return of symptoms of osteoarthritis that has not responded to acetaminophen-containing products, oral or topical NSAIDs, or other oral analgesics; or has a medical reason (intolerance, hypersensitivity, contraindication, etc.) for not being able to utilize these therapies.
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Hydroxyprogesterone caproate (generic Delalutin)
Drugs	Hydroxyprogesterone caproate (generic Delalutin)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Pregnancy
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must be a gynecologist or in consultation with a gynecologist
Coverage Duration	If all the criteria are met, the initial request will be approved for up to 6 months. For continuation of therapy, the request will be approved for up to 6 months.
Other Criteria	 Initial Authorization: Medication is prescribed at an FDA approved dose If request is for preterm birth, do not approve Request is for one of the following indications: Amenorrhea or abnormal uterine bleeding due to hormonal imbalance Production of secretory endometrium and desquamation Test for endogenous estrogen production Advanced uterine adenocarcinoma
Review Date: 4/2023	 Re-Authorization: Documentation or provider attestation of clinical benefit Medication is prescribed at an FDA approved dose
., 2020	If all the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Prior Authorization Group Description	Hyaluronic Acid Derivatives
Drug(s)	Euflexxa, Gel-One, Gelsyn-3, GenVisc 850, Hyalgan, Supartz FX, TriVisc, Visco-3, Durolane, Hymovis, Monovisc, Orthovisc, Synvisc, Synvisc-One, Triluron, sodium hyaluronate 1% syringe, or any newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), or the Drug Package Insert (PPI).

Field Name	Field Description
Prior Authorization	Ileal bile acid transporter inhibitor (IBAT)
Group Description	
Drugs	Bylvay (odevixibat), Livmarli (maralixibat)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Per prescribing information
Prescriber	Prescribed by or in consultation with a gastroenterologist or
Restrictions	hepatologist
Coverage Duration	If the conditions are met, the request will be approved for a 6 month duration for initial requests and a 12 month duration for renewal requests.
Other Criteria	Initial Authorization:
	 Progressive Familial Intrahepatic Cholestasis (Bylvay ONLY) Diagnosis of progressive familial intrahepatic cholestasis (PFIC) type 1, 2, or 3 with genetic confirmation Documentation that patient does not have an ABCB11 variant that results in non-functional or complete absence of bile salt export pump protein (BSEP-3) Documented history of moderate to very severe pruritus Documentation of patient's weight Prescriber attests to monitor liver function tests and fat soluble vitamin (FSV) levels during treatment Baseline serum bile acid level is provided Documentation of trial and failure OR contraindication to at least ONE of the following: Ursodiol Cholestyramine or colesevelam The prescribed dose is within FDA approved dosing guidelines
	 Alagille Syndrome (Livmarli ONLY) Diagnosis of Alagille syndrome (ALGS) Documented history of moderate to very severe pruritus Documentation of trial and failure OR medical reason why the member is unable to use all of the following: Ursodiol

- o Cholestyramine or colesevelam
- o Rifampin
- Prescriber attests that the member has cholestasis
- Baseline serum bile acid level is provided
- Documentation of patient's weight
- Prescriber attests to monitor liver function tests and fat soluble vitamin (FSV) levels during treatment
- The prescribed dose is within FDA approved dosing guidelines

Reauthorization:

- Documentation of clinical benefit indicating each of the following:
 - An improvement in pruritus (e.g. improved observed scratching, decreased sleep disturbances/nighttime awakenings due to scratching, etc.)
 - o Reduction in serum bile acid level from baseline
- Documentation of patient's weight
- Prescriber attests to monitor liver function tests and FSV levels during treatment
- Prescriber attests that patient has had no evidence of hepatic decompensation (e.g. variceal hemorrhage, ascites, hepatic encephalopathy, portal hypertension, etc.)
- The prescribed dose is within FDA approved dosing guidelines

Revision/Review Date: 7/2023

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Increlex
Group Description	Thereiex
Drugs	Increlex (mecasermin [recombinant human insulin-like growth factor-1])
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	\geq 2 years to < 18 years
Prescriber	Prescribed by or in consultation with an Endocrinologist or specialist in
Restrictions	the treatment of pediatric growth disorders
Coverage Duration	If all of the conditions are met, the request will be approved for 12 months.
Other Criteria	 Member has a diagnosis of one of the following Growth hormone (GH) gene deletion with the development of neutralizing antibodies to GH Severe primary insulin-like growth factor-1 (IGF-1) deficiency as defined as:
Revision/Review Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Immune Globulins
Group Description	
Drugs	Gamunex-C (IV or SQ) (Immune Globulin)
	Bivigam (IV) (Immune Globulin)
	Cuvitru (SQ) (Immune Globulin)
	Flebogamma (IV) (Immune Globulin)
	Gamastan (IM) (Immune Globulin) Gamastan SD (IM) (Immune Globulin)
	Gammagard liquid (IV or SQ) (Immune Globulin)
	Gammagard SD (IV) (Immune Globulin)
	Gammaked (IV or SQ) (Immune Globulin)
	Gammaplex (IV) (Immune Globulin)
	Hizentra (SQ) (Immune Globulin)
	Octagam (IV) (Immune Globulin)
	Privigen (IV) (Immune Globulin)
	Asceniv (IV) (Immune Globulin-slra)
	Cutaquig (SQ) (Immune Globulin-hipp)
	Panzyga (IV) (Immune Globulin-ifas)
	Hyqvia (SQ) (Immune Globulin Human/Recombinant Human
	Hyaluronidase)
	Xembify (SQ) (Immune Globulin-klhw)
	Or any newly marketed immune globulin
	Gamunex-C is the preferred product for the indications of primary immunodeficiency, chronic idiopathic thrombocytopenic purpura, and chronic inflammatory demyelinating polyneuropathy
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
Exclusion Criteria	standard of care guidelines. N/A
Required Medical	
Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	See "other criteria"
Coverage Duration	If the criteria are met the request will be approved for a 3 month
	duration unless otherwise specified in the diagnosis specific "Other
	Criteria" section below.
Other Criteria	All Requests:
	 Documentation of diagnosis confirmed by a specialist
	Member has tried and failed, or has a documented medical

- reason for not using, all other standard of care therapies as defined per recognized guidelines
- Member's height and weight are provided
- Dosing will be calculated using ideal body weight (IBW), unless ONE of the following:
 - If the member's actual weight is less than their IBW, then dosing will be calculated using their actual weight
 - o If the member's body mass index (BMI) is ≥30 kg/m² OR if their actual weight is greater than 20% of their IBW, then dosing will be calculated using adjusted body weight (adjBW)

Primary Immunodeficiency*:

- Patient's IgG level is provided and below normal for requested indication
- Clinically significant deficiency of humoral immunity as evidenced by ONE of the following:
 - o Inability to produce an adequate immunologic response to specific antigens.
 - History of recurrent infections despite prophylactic antibiotics
- Dose is consistent with FDA approved package labeling, nationally recognized compendia, or peer-reviewed literature
- If the request is for any medication other than Gamunex-C, the member has tried and failed, or has a documented medical reason for not using, Gamunex-C
- If criteria is met, approve for 6 months.

*Primary Immunodeficiency includes, but is not limited to, the following: Congenital agammaglobulinemia, hypogammaglobulinemia (Common Variable Immunodeficiency, CVID), severe combined immunodeficiency (SCID), Wiskott-Aldrich syndrome, X-linked agammaglobulinemia or Bruton's agammaglobulinemia, hypergammaglobulinemia, X-linked hyper IgM syndrome

Idiopathic Thrombocytopenic Purpura, acute and chronic:

- Acute:
 - Patient has active bleeding, requires an urgent invasive procedure, is deferring splenectomy, has platelet counts < 20,000/ul and is at risk for intracerebral hemorrhage or has life threatening bleeding, or has an inadequate increase in platelets from

- corticosteroids or is unable to tolerate corticosteroids
- Dose does not exceed 1g/kg daily for up to 2 days, or 400mg/kg daily for 5 days

• Chronic:

- o Duration of illness is greater than 12 months
- Member has documented trial and failure of corticosteroids and splenectomy, or has a documented medical reason why they are not able to use corticosteroids or member is at high risk for post-splenectomy sepsis.
- Dose does not exceed 1g/kg daily for up to 2 days, or 400mg/kg daily for 5 days
- If the request is for any medication other than Gamunex-C, the member has tried and failed, or has a documented medical reason for not using, Gamunex-C
- If criteria is met, approve for up to 5 days.

Kawasaki disease:

- Immunoglobulin is being given with high dose aspirin unless contraindicated
- Requested dose does not exceed a single 2g/kg dose
- If criteria is met, approve for 1 dose

Chronic B-cell lymphocytic leukemia:

- The patient has had recurrent infections requiring IV antibiotics or hospitalization and has a serum IgG of <500 mg/dL
- Dose does not exceed 500mg/kg every 3-4 weeks
- If criteria is met, approve for 3 months.

Bone marrow transplantation:

- The patient has bacteremia or recurrent sinopulmonary infections and their IgG level is < 400mg/dL
- Dose does not exceed 500mg/kg/wk for the first 100 days post- transplant
- Dose does not exceed 500 mg//kg every 3-4 weeks 100 days after transplant
- If criteria is met, approve for 3 months.

Pediatric HIV:

• Patient is < 13 years of age

- Either patient's IgG level is < 400mg/dL or
- If patient's IgG level is ≥ 400 mg/dL than significant deficiency of humoral immunity as evidenced by ONE of the following:
 - o Inability to produce an adequate immunologic response to specific antigens.
 - History of recurrent bacterial infections despite prophylactic antibiotics
- Dose does not exceed 400mg/kg/dose every 2-4 weeks
- If criteria is met, approve for 3 months.

Multifocal motor neuropathy (MMN):

- Duration of symptoms has been at least 1 month with disability.
- Nerve conduction studies were completed to rule out other possible conditions, and confirms the diagnosis of MMN.
- Dose does not exceed 2g/kg/month administered over 2 to 5 days.
- If criteria is met, approve for up to 5 days for 3 months.

<u>Chronic inflammatory demyelinating polyneuropathy</u> (CIDP):

- Duration of symptoms has been at least 2 months with disability.
- Nerve conduction studies or a nerve biopsy were completed in order to rule out other possible conditions, and confirms the diagnosis of CIDP.
- Patient has tried and failed, or has a documented medical reason for not using, corticosteroids.
 - o If the patient has severe and fulminant or pure motor CIDP a trial of corticosteroids is not required
- Dose is consistent with FDA approved package labeling, nationally recognized compendia, or peer-reviewed literature
- If the request is for any medication other than Gamunex-C, the member has tried and failed, or has a documented medical reason for not using, Gamunex-C
- If criteria is met, approve for up to 5 days for 3 months

Guillain-Barre syndrome:

- Patient has severe disease with the inability to walk without aid
- Onset of symptoms within the last 4 weeks
- Dose does not exceed 2g/kg administered over 2-5 days
- If criteria is met, approve for up to 5 days.

Myasthenia Gravis:

- Acute:
 - Patient has an acute myasthenic exacerbation (i.e. acute episode of respiratory muscle weakness, difficulty swallowing, etc.) or is in preparation for thymoma surgery to prevent myasthenic exacerbation
 - Dose does not exceed 2 g/kg administered over 2-5 days
 - o If criteria is met, approve for up to 5 days
- Chronic:
 - Diagnosis of refractory generalized myasthenia gravis
 - Patient has tried and failed, or has a documented medical reason for not using 2 or more immunosuppressive therapies (i.e. corticosteroids, azathioprine, cyclosporine, mycophenolate mofetil)
 - Dose does not exceed 2 g/kg/month administered over 2-5 days
 - o If criteria is met, approve for 3 months

Dermatomyositis (DM):

- One of the following:
 - o Bohan and Peter score of 3 (i.e. definite DM)
 - Bohan and Peter score of 2 (i.e. probable DM) AND concurring diagnostic evaluation by ≥ 1 specialist (e.g. neurologist, rheumatologist, dermatologist)
- Patient does NOT have any of the following:
 - Cancer (CA) associated myositis defined as myositis within 2 years of CA diagnosis (except basal or squamous cell skin cancer or carcinoma in situ of the cervix that has been excised and cure)
 - o Active malignancy
 - o Malignancy diagnosed within the previous 5 years
 - o Breast CA within the previous 10 years
- For a diagnosis of DM, one of the following:
 - Member has tried and failed, or has a documented medical reason for not using both of the following:
 - methotrexate (MTX) OR azathioprine

	rituximab.
	o Member has severe, life-threatening weakness or
	dysphagia
	 For a diagnosis of cutaneous DM (i.e. amyopathic DM, hypomyopathic DM):
	 Member has tried and failed, or has a documented medical reason for not using all of the following: MTX and mycophenolate mofetil.
	 Dose does not exceed 2 g/kg administered over 2-5 days every 4 weeks.
	• If criteria is met, approve for up to 3 months.
Revision/Review Date	If criteria is met, the request will be approved for the duration listed above. If the criteria is not met, the request is referred to a Medical Director/Clinical reviewer for medical necessity review.
10/2023	Medical Director/Clinical Reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary

Field Name	Field Description
Prior Authorization	Immunosuppressants for Lupus Nephritis
Group Description	
Drugs	Lupkynis (voclosporin)
Covered Uses	Medically accepted indications are defined using the following sources:
	the Food and Drug Administration (FDA), Micromedex, American
	Hospital Formulary Service (AHFS), United States Pharmacopeia Drug
	Information for the Healthcare Professional (USP DI), and the Drug
	Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Member must be 18 years of age or older
Prescriber Restrictions	Prescriber must be rheumatologist, nephrologist or other specialist in the treatment of autoimmune disorders
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6
	months. For continuation of therapy, the request will be approved for
	12 months.
Other Criteria	Initial Authorization
	 Member must have a diagnosis of systemic lupus erythematosus (SLE) with a kidney biopsy indicating a histologic diagnosis of lupus nephritis (LN) Class III, IV, or V Documentation that the member has a baseline eGFR > 45
	$mL/min/1.73m^2$
	 Documentation of the member's urine protein/creatinine ratio (UPCR) is provided
	 Member is concurrently being treated with background immunosuppressive therapy, or has a medical reason for not using background immunosuppressive therapy Member is NOT concurrently being treated with cyclophosphamide
	Medication is prescribed at an FDA approved dose
	Reauthorization
Revision/Review	 Documentation of improvement in renal function (i.e. reduction in UPCR or no confirmed decrease from baseline eGFR ≥ 20%) Medication is prescribed at an FDA approved dose
Date 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	DPP-4 Inhibitors Step Therapy
Drugs	Preferred DPP-4 Inhibitors: Januvia (sitagliptin) tablet Janumet, Janumet XR (sitagliptin/metformin) tablet Tradjenta (linagliptin) tablet Jentadueto (linagliptin/metformin) tablet
	And any other newly-marketed DPP-4 inhibitor that is preferred on the PDL Medically accepted indications are defined using the following sources: the
Covered Uses	Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), or the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	Age appropriate per labeling
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for 12 months.
Step Therapy Criteria	 Documentation of a trial and failure or intolerance to metformin or a metformin combination product in the last 90 days New members to the plan who are stable on a DPP-4 inhibitor do not require a trial of metformin
Revision/Review Date: 4/2023	If all of the criteria are not met, the request will be referred to a Medical Director or clinical reviewer for medical necessity review.

Prior Authorization Group Description	Infliximab Products
Drugs	PREFERRED: infliximab (unbranded) Avsola (infliximab-axxq) Renflexis (infliximab-abda) NON-PREFERRED: Remicade (infliximab) Inflectra (infliximab-dyyb) Or any newly-marketed infliximab biosimilar/follow-on biologic
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria Required Medical Information	N/A N/A
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by, or in consultation with, a specialist in the treatment of the applicable disease
Coverage Duration	If all of the conditions are met, the request will be approved for 12 months.
Other Criteria	 Initial Authorization for All Indications: The request is for an approved indication The medication is being prescribed at an appropriate FDA-approved dose (for age and weight) If the request is for a non-preferred product, documented (consistent with pharmacy claims/medical record data/chart notes, physician attestation) adequate trial of a preferred infliximab product. Requests for Crohn's Disease: If the member has a diagnosis of severe-fulminant, moderate-severe, or perianal/fistulizing Crohn's disease – approve If the member has a diagnosis of mild-to-moderate/low-risk Crohn's disease,
	 the following is required: an adequate trial or a documented medical reason for not using conventional therapy to manage the condition (e.g. sulfasalazine, budesonide ER (Uceris), azathioprine, 6-mercaptopurine, or methotrexate) Requests for Ulcerative Colitis: If the member has a diagnosis of moderate-severe ulcerative colitis – approve. If the member has a diagnosis of mild-moderate ulcerative colitis, the following is required: an adequate trial of, or medical reason for not using, conventional therapy to manage the condition (e.g. oral aminosalicylates, azathioprine, 6-mercaptopurine, or oral corticosteroids)

Requests for Plaque Psoriasis:

- The member has had an adequate trial of, or medical reason for not using, a therapy in 3 of the following categories, at least one of which must be either systemic therapy or phototherapy (consistent with pharmacy claims/medical chart data):
 - o Topical steroids
 - o Topical calcipotriene, calcitriol, or tazarotene
 - o Topical tacrolimus or pimecrolimus
 - o Topical anthralin, coal tar, or salicylic acid
 - o Oral methotrexate or cyclosporine
 - o Oral acitretin
 - o UVB phototherapy or PUVA (oral psoralen or topical methoxsalen plus UVA therapy)

Requests for Psoriatic Arthritis:

- The member has had an adequate trial of, or medical reason for not using (consistent with pharmacy claim/medical chart data):
 - o At least one non-steroidal anti-inflammatory drug (NSAID) or cyclooxygenase-2 (COX-2) inhibitor <u>AND</u>
 - At least one conventional DMARD (e.g. leflunomide, methotrexate, sulfasalazine) <u>OR</u>
 - Member has axial symptoms/disease or enthesitis (i.e involving the plantar fascia and Achilles tendon insertion) and has tried and failed NSAID therapy

Requests for Rheumatoid Arthritis:

• The member has had an adequate trial or a documented medical reason for not using a conventional DMARD (e.g. methotrexate, leflunomide, sulfasalazine, hydroxychloroquine)

Requests for Axial Spondyloarthritis (Ankylosing Spondylitis or Non-Radiographic Axial Spondyloarthritis):

 The member has had an adequate trial and failure or medical reason for not using two different nonsteroidal anti-inflammatory drugs (NSAIDs) or cyclooxegenase-2 (COX-2) inhibitors, each for at least two weeks

Reauthorization:

• The member has been receiving the medication and there is documentation that a clinical benefit was observed.

Continuation of Therapy/Grandfathering Provision:

• Members with history (within the past 90 days) of a preferred infliximab product are not required to try the above-mentioned conventional therapies prior to receiving infliximab.

	Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.
Revision/Review Date: 4/2023	

Prior Authorization Group Description	Pulmonary Biologics for Asthma and Eosinophilic Conditions
Drugs	Preferred: Fasenra (benralizumab) Dupixent (dupilumab) pens, syringes Nucala (mepolizumab) autoinjectors, 40 mg/0.4 mL syringes Tezspire (tezepelumab-ekko) pens Non-Preferred/Non-Formulary: Cinqair (reslizumab) Tezspire (tezepelumab-ekko) syringes Nucala (mepolizumab) 100mg/mL syringes, vials Or any newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 When being used for relief of acute bronchospasm or status asthmaticus When used in combination with another monoclonal antibody for the treatment of asthma or eosinophilic conditions
Required Medical Information	See "other criteria"
Age Restrictions	Per Package Insert
Prescriber Restrictions	Prescriber must be an allergist, pulmonologist, immunologist, rheumatologist, gastroenterologist, other provider who specializes in the treatment of asthma or eosinophilic conditions, or in consultation with one of these specialists
Coverage Duration	If the above conditions are met, the initial request will be approved with a 4 month duration. All subsequent requests will be approved with a 6 month duration.
Other Criteria	Initial Authorization:
	Asthma:
	 Confirmed diagnosis of one of the following: Nucala, Fasenra, and Cinqair: Severe eosinophilic asthma Dupixent: Moderate-to-Severe eosinophilic asthma Tezspire: Severe asthma Documentation has been provided of blood eosinophil count within ONE of the following ranges: Nucala and Dupixent: ≥ 150 cells/mcL (within 6 weeks of request) OR ≥ 300 cells/mcL (within the past 12 months)

- o Fasenra: $\geq 150 \text{ cells/mcL}$ (within the past 12 months)
- o Cingair: ≥ 400 cells/mcL (within the past 12 months)
- o Tezspire: No baseline blood eosinophil counts are required
- The member has a documented baseline FEV₁ < 80% of predicted with evidence of reversibility by bronchodilator response.
 - o Tezspire ONLY: If age is < 18 years, the member has a documented baseline FEV1 < 90% of predicted with evidence of reversibility by bronchodilator response
- Documentation has been provided indicating that the member continues to experience significant symptoms while compliant on a maximally tolerated inhaled corticosteroid with long-acting beta2 agonist (ICS/LABA) AND long-acting muscarinic antagonist (LAMA) (or a documented medical reason must be provided why the member is unable to use these therapies) and ONE of the following:
 - o Nucala: ≥ 2 exacerbations in the past 12 months
 - o Fasenra: ≥ 1 exacerbation in the past 12 months
 - o Cinqair: ≥ 1 exacerbation in the past 12 months requiring systemic corticosteroids
 - o Dupixent: ≥ 1 exacerbation in the past 12 months requiring systemic corticosteroids or hospitalization
 - O Tezspire: ≥ 2 exacerbations requiring systemic corticosteroids OR \geq 1 exacerbation in the past 12 months requiring hospitalization
- The prescribed dose is within FDA approved dosing guidelines
- For non-preferred drug requests: documented trial and failure of, or medical reason for not using, a preferred drug

Oral Corticosteroid Dependent Asthma: (Dupixent only)

- Confirmed diagnosis of oral corticosteroid (OCS) dependent asthma with at least 5 mg oral prednisone or equivalent per day for at least 4 weeks within the last 3 months
- The patient has a documented baseline FEV₁ < 80% of predicted with evidence of reversibility by bronchodilator response.
- Documentation has been provided indicating patient still is having significant symptoms with ≥ 1 exacerbations in the previous 12 months requiring additional medical treatment, (emergency room visits, hospital admissions) while compliant on a high-dose inhaled corticosteroid with a long-acting B₂ agonist (ICS/LABA) AND a long-acting muscarinic antagonist (LAMA). If the patient has not utilized these therapies, a documented medical reason must be provided why patient is unable to do so.
- The prescribed dose is within FDA approved dosing guidelines

Eosinophilic granulomatosis with polyangiitis (EGPA) (*Nucala only*):

• Confirmed diagnosis of EGPA and eosinophilic asthma lasting for ≥6 months

- Member has a history of relapsing disease defined as at least one EGPA
 relapse requiring additional corticosteroids or immunosuppressant or
 hospitalization within the past 2 years OR member has a history of
 refractory disease defined as failure to attain remission in the prior 6 months
 following induction treatment with standard therapy
- Member must be on a stable dose of oral corticosteroids for at least 4 weeks prior to request
- Member has a blood eosinophil count ≥1,000 cells/mcL OR > 10% of total leukocyte count
- Documented trial and failure, intolerance, or contraindication to cyclophosphamide, azathioprine, methotrexate, rituximab, OR mycophenolate mofetil
- The prescribed dose is within FDA approved dosing guidelines

<u>Hypereosinophilic Syndrome (HES) (Nucala only):</u>

- Confirmed diagnosis of FIP1 like 1-platelet derived growth factor receptor alpha (FIP1L1-PDGFRA)-negative HES lasting for ≥6 months without an identifiable non-hematologic secondary cause
- Member has a history of two or more HES flares (worsening of HES-related symptoms necessitating therapy escalation or ≥2 courses of rescue oral corticosteroids) within the past 12 months
- Member has a blood eosinophil count ≥1,000 cells/mcL
- Documented trial and failure, intolerance, or contraindication to oral corticosteroids AND at least one second-line agent (e.g. hydroxyurea, interferon, imatinib, methotrexate, cyclophosphamide, cyclosporine, azathioprine) (member must be on stable dose of at least one agent for at least 4 weeks prior to request)

Eosinophilic Esophagitis (EoE) (*Dupixent only*):

- Confirmed diagnosis of EoE by endoscopic biopsy indicating ≥15 intraepithelial eosinophils per high-power field (eos/hpf)
- Documentation of baseline esophageal intraepithelial eosinophil count and Dysphagia Symptom Questionnaire (DSQ) scores
- Member has a history of at least 2 episodes of dysphagia (with intakes of solids) per week in the last 4 weeks
- Documented trial and failure, intolerance, or contraindication to one proton pump inhibitor at a maximally tolerated dose for a minimum of 8 weeks
- Member has a documented weight greater than or equal to 40 kg
- The prescribed dose is within FDA approved dosing guidelines

Prurigo Nodularis (PN) (Dupixent only):

- Confirmed diagnosis of PN lasting for at least three months prior to request
- Member has a Worst-itch Numeric Rating Scale (WI-NRS) score of 7 or higher indicating severe or very severe itching
- Member has at least 20 PN lesions in total
- Documented trial and failure, intolerance, or contraindication to at least two of the following for a minimum of two weeks:
 - o One medium to super-high potency topical corticosteroid
 - o One topical calcineurin inhibitor
 - o UVB phototherapy or psoralen plus UVA phototherapy
- The prescribed dose is within FDA approved dosing guidelines

Revision/Review Date:

2/2024

Re-Authorization:

- 1. Documentation submitted indicates the member has clinically benefited from the medication (e.g. Asthma: improved FEV₁, reduced exacerbations; HES: symptomatic improvement, reduced oral corticosteroid dose; EGPA: reduction in relapse frequency or severity, disease remission, symptomatic improvement, reduced oral corticosteroid dose; EoE: histological remission, improvement in DSQ scores; PN: improvement in WI-NRS score, symptomatic improvement)
- 2. The prescribed dose is within FDA approved dosing guidelines

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Prior Authorization	Injectable/Infusible Bone-Modifying Agents for Osteoporosis and Paget's
Group	Disease
Drugs	Preferred products:
	ibandronate (Boniva), Prolia (denosumab)
	Non-preferred/non-formulary products:
	pamidronate, teriparatide (Forteo), teriparatide (biosimilar), zoledronic acid
Covered Uses	Medically accepted indications are defined using the
	following sources: the Food and Drug Administration
	(FDA), Micromedex, American Hospital Formulary Service (AHFS), United
	States Pharmacopeia Drug Information for the Healthcare Professional (USP
Exclusion Criteria	N/A
Required Medical	"See other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must be an endocrinologist, rheumatologist, orthopedist, or obstetrician/gynecologist
Coverage Duration	If all of the conditions are met, requests will be approved for
	1 year.
	*** TERIPARATIDE/FORTEO/TYMLOS REQUESTS WILL
	ONLY BE APPROVED FOR A TOTAL DURATION OF
	24 MONTHS***
	EVENITY WILL ONLY BE APPROVED FOR A TOTAL DURATION OF 12 MONTHS

Other Criteria

For all requests:

• The medication is FDA-approved for indication and is being requested at an FDA approved dose

If the diagnosis is postmenopausal or male osteoporosis:

- If the request is for male osteoporosis or high risk postmenopausal osteoporosis with no prior fractures, the member must have a documented (consistent with pharmacy claims) adequate trial of an oral bisphosphonate or has a medical reason (e.g. intolerance, hypersensitivity, contraindication, etc.) for not using an oral bisphosphonate
- If the request is for very high risk postmenopausal osteoporosis or postmenopausal osteoporosis with prior fractures, a documented trial and failure of an oral bisphosphonate will not be required. Very high risk is defined as having one or more of the following:
 - o History of fracture in the past 12 months
 - Multiple fractures
 - o Fractures while on drugs causing skeletal harm (e.g. long-term glucocorticoids)
 - o Very low T scores (< -3.0)
 - High risk for falls
 - o History of injurious falls
 - Very high fracture probability as determined by fracture risk assessment tool (FRAX) (e.g. major osteoporosis fracture >30%, hip fracture > 4.5%)
- Documentation was submitted indicating the member is postmenopausal woman or a male member over 50 years of age and one of the following applies:
 - o A bone mineral density (BMD) value consistent with osteoporosis (T-scores equal to or less than -2.5)
 - o Has had an osteoporotic fracture
 - A T-score between -1 and -2.5 at the femoral neck or spine and a 10 year hip fracture probability >3% or a 10 year major osteoporosis-related fracture probability >20% (based on the US-adapted WHO absolute fracture risk model)
- If request is for teriparatide (Forteo), teriparatide (biosimilar), Tymlos (abaloparatide), or Evenity (romosozumab), one of the following applies to member:
 - Documented trial and failure of Prolia (denosumab) AND EITHER ibandronate (Boniva) injection or zoledronic acid (Reclast) or has a medical reason (e.g. intolerance, contraindication, etc.) why these therapies are not suitable to be used
 - Has SEVERE osteoporosis (T-Score -3.5 or below, or T-Score of -2.5 or below plus a fragility fracture)
- If request is for teriparatide (Forteo) or teriparatide (biosimilar), a medical reason why member is unable to use Tymlos (abaloparatide) or Evenity (romosozumab) as appropriate based on diagnosis
- If the request is for Evenity (romosozumab), the member does not have history of heart attack or stroke within the preceding year

If the diagnosis is Paget's disease:

- The member has a documented (consistent with pharmacy claims) adequate trial of an oral bisphosphonate or has a medical reason (e.g. intolerance, hypersensitivity, contraindication, etc.) for not using an oral bisphosphonate
- Documentation (within 60 days of request) was submitted including member's serum alkaline phosphatase level of ≥ two times the upper limit of normal AND the member is symptomatic or there is documentation of active disease

If the diagnosis is glucocorticoid-induced osteoporosis:

- The member has a documented (consistent with pharmacy claims) adequate trial of an oral bisphosphonate or has a medical reason (e.g. intolerance, hypersensitivity, contraindication, etc.) for not using an oral bisphosphonate
- For members ≥ 40 years of age on long-term glucocorticoid therapy:
 - O Dosage of the oral glucocorticoid therapy is equivalent to a dose greater than 2.5 mg of prednisone daily
 - Member has a moderate to very high risk of fracture based on ONE of the following:
 - History of osteoporotic fracture
 - BMD less than or equal to -1 at the hip or spine
 - FRAX 10-year risk for major osteoporotic fracture greater than or equal to 10% (with glucocorticoid adjustment)
 - FRAX 10-year risk for hip fracture greater than 1% (with glucocorticoid adjustment)
- For adult members (all ages) receiving HIGH dose glucocorticoid therapy:
 - o Member has a moderate to very high risk of fracture based on ONE of the following:
 - History of prior fracture(s)
 - Glucocorticoid dose ≥ 30mg/day or cumulative ≥ 5 grams/year
 - Continuing glucocorticoid treatment ≥ 7.5mg/day for ≥ 6 months AND BMD Z score < -3 OR significant BMD loss (> least significant change of DXA)
- If the request is for teriparatide (Forteo), teriparatide (biosimilar), or Tymlos (abaloparatide), the member has documented trial and failure of Reclast (zoledronic acid) AND Prolia (denosumab) or a medical reason (e.g. intolerance, contraindication, etc.) as to why the member is unable to use these medications is provided.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date: 2/2024

Prior Authorization Group Description	Injectable/Infusible Bone-Modifying Agents for Oncology Indications
Drugs	Preferred Bone-Modifying Agent(s): pamidronate disodium (Aredia), zoledronic Acid (Zometa), Prolia (denosumab)
	Non-preferred Bone-Modifying Agent(s): Xgeva (denosumab)
Covered Uses	The request is for an FDA approved indication or for a medically accepted indications as defined or as supported by the medical compendia (Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), Drug Package Insert) as defined in the Social Security Act 1927, or per the National Comprehensive Cancer Network (NCCN), the American Society of Clinical Oncology (ASCO), or the National Institutes of Health (NIH) Consensus Panel standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber is an oncologist
Coverage Duration	If the criteria are met, the request may be approved for 6 months. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the request will be approved for 12 months.

Other Criteria

- The request is for an approved/accepted indication at an approved dose
- If the request is for Xgeva (denosumab) for any of the indications below, the patient has a documented trial and failure of generic pamidronate (Aredia) OR zoledronic acid (Zometa) that is consistent with claims history, or has a documented medical reason (intolerance, hypersensitivity, contraindication, renal insufficiency, etc.) for not utilizing one of these agents to manage the medical condition
 - o Bone metastases from solid tumor
 - o Hypercalcemia of malignancy
 - o Multiple myeloma osteolytic lesion
- If the request is for Xgeva (denosumab) for treating giant cell tumor of bone, documentation has been submitted that the tumor is unresectable or that surgical resection is likely to result in morbidity (e.g. denosumab therapy is being used to aid in the possibility of resection with tumor shrinkage), or that disease has recurred.
- If the request if for Prolia (denosumab) for breast cancer, the patient has a documented trial and failure of generic pamidronate (Aredia) OR zoledronic acid (Zometa) that is consistent with claims history, or has a documented medical reason (intolerance, hypersensitivity, contraindication, renal insufficiency etc.) for not utilizing one of these agents to manage their medical condition.
- If the request is for Prolia (denosumab) for prostate cancer, approve.

Revision/Review Date: 2/2024

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Insulin-Like Growth Factor-1 Receptor (Igf-1r) Antagonists For
Group Description	Thyroid Eye Disease
Drugs	Tepezza (teprotumumab-trbw)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
	standard of care guidelines.
Exclusion Criteria	N/A
Required Medical	See "Other Criteria"
Information	
Age Restrictions	Member must be 18 years age or older
Prescriber Restrictions	Prescriber must be an ophthalmologist, endocrinologist, or specialist with expertise in the treatment of Grave's disease with thyroid eye disease.
Coverage Duration	If all of the criteria are met, the request will be approved for up to 24
	weeks of treatment (8 total infusions). Retreatment requests will not
	be allowed beyond the 8 dose limit.
	 Dosing does not exceed dosing guidelines as outlined in the package insert Patient has a confirmed diagnosis of Graves' disease Documentation of moderate-severe thyroid eye disease as evidenced by one or more of the following: Lid retraction of >2mm Moderate or severe soft-tissue involvement Proptosis ≥3mm above normal values for race and sex Periodic or constant diplopia Patient must be euthyroid or thyroxine and free triiodothyronine levels are less than 50% above or below normal limits (submit laboratory results with request) Patients of reproductive potential: attestation the patient is not pregnant, and appropriate contraception methods will be used before, during, and 6 months after the last infusion Patient has had a trial and therapy failure of, or contraindication to:

Revision/Review Date 7/2023	Re-authorization: • Retreatment or renewal requests beyond a total of 24 weeks of treatment (8 total infusions) will not be allowed.
1/2023	Medical Director/clinical reviewer must override criteria when,
	in his/her professional judgement, the requested item is
	medically necessary.

Field Name	Field Description
Prior Authorization	Insulin Pumps
Group Description	Insum Lumps
Drugs	Omnipod Dash Intro Kit, Omnipod Dash Pods, Omnipod 5 G6 Intro Kit,
	Omnipod 5 G6 Pods, OmniPod GO
	This policy does not apply to pumps reviewed and/or covered by the
	Medical Benefit including, but not limited to V-Go 24-hour disposable
	system and t:slim X2, and continuous glucose monitor/insulin pumps such
	as MiniMed. Requests for these products are referred to the plan's
	Utilization Management team for review.
Covered Uses	Medically accepted indications are defined using the following sources: the
	Food and Drug Administration (FDA), Micromedex, American Hospital
	Formulary Service (AHFS), United States Pharmacopeia Drug Information for
	the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease
	state specific standard of care guidelines.
Exclusion Criteria	None
Required Medical	See "Other Criteria"
Information	
Age Restrictions	None
Prescriber	Prescribed by or in consultation with an endocrinologist, a certified diabetes care
Restrictions	and education specialist (CDCES), or an obstetrician/gynecologist
Coverage Duration	If all of the criteria are met, the request will be approved for 12 months.
Other Criteria	Initial Authorization
	Diagnosis – diabetes
	 One of the following Type 1 diabetes or other insulin-deficient forms of diabetes (e.g. cystic-
	fibrosis related diabetes)
	o Treatment with multiple daily doses (≥ 3) of insulin
	o Pregnancy
	o Continuation of therapy for patient new to plan
	o For OmniPod GO: trial and failure of a long-acting insulin or a medical
	reason why long-acting insulin cannot be used (adherence, etc.)
	Reauthorization
	One of the following:
	o Type 1 diabetes or other insulin-deficient form of diabetes
	o Prescriber attests member has benefited from, and has continued need
	for, therapy with an insulin pump
	o Initial approval was based on continuation of therapy for patient new to
	plan. o For OmniPod GO: continuous use of approved insulin compatible with
L	To omini ou oo. commuous use of approved insum companiole with

Revision/Review	device
Date 2/2024	
	Continuation of therapy based on a diagnosis of pregnancy alone is not eligible for reauthorization
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Dui an Austhania atian	James Winger Inhibitory for Managemental Witilian
Prior Authorization	Janus Kinase Inhibitors for Nonsegmental Vitiligo
Group Description	
Drugs	Opzelura (ruxolitinib)
Covered Uses	Medically accepted indications are defined using the following sources: the
	Food and Drug Administration (FDA), Micromedex, American Hospital
	Formulary Service (AHFS), United States Pharmacopeia Drug Information for
	the Healthcare Professional (USP DI), and the Drug Package Insert (PPI)
Exclusion Criteria	N/A
Required Medical	See "Other Criteria"
Information	
Age Restrictions	≥ 12 years of age
Prescriber	Prescribed by or in consultation with a dermatologist, immunologist, or
Restrictions	specialist experienced in treatment of vitiligo
Coverage Duration	If criteria are met, the request will be approved with up to a 6 month duration.
	All reauthorization requests will be approved up to 12 months in duration.
	If the conditions are not met, the request will be sent to a Medical
	Director/clinical reviewer for medical necessity review.
Other Criteria	Initial Authorization
Other Criteria	o Diagnosis of nonsegmental vitiligo
	o Documentation of depigmented lesions including measurements and
	locations is provided
	<u> </u>
	o Prescriber attests that the total body vitiligo area (facial and nonfacial)
	being treated does not exceed 10% BSA
	o Trial and failure of, or intolerance to, ALL of the following:
	o Topical corticosteroids
	o Topical calcineurin inhibitors
	o Targeted phototherapy
	o Prescriber attests that the member will not concomitantly use
	therapeutic biologics, other Janus kinase inhibitors, potent
	immunosuppressants, or phototherapy for repigmentation purposes
	o Request is for an FDA-approved dose
	**A MAXIMUM OF ONE 60 GRAM TUBE OF OPZELURA PER
	WEEK OR ONE 100 GRAM TUBE EVERY TWO WEEKS MAY BE
	APPROVED**
	Reauthorization
	o Prescriber attests that the member has experienced a clinical benefit
	(e.g. reduction in size or quantity of or stabilization of existing
Revision/Review	depigmented lesions; absence of new depigmented lesions)
Date 2/2024	o Request is for an FDA-approved dose
	Medical Director/clinical reviewer must override criteria when, in his/her
	professional judgement, the requested item is medically necessary.

Prior Authorization	
Group Description	Jesduvroq
Drugs	Jesduvroq (daprodustat)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Diagnosis of uncontrolled hypertension Concomitant use of strong CYP2C8 inhibitors (e.g., gemfibrozil)
Required Medical Information	See "Other Criteria"
Age Restrictions	Member must be at least 18 years of age
Prescriber Restrictions	Prescriber must be a hematologist or nephrologist
Coverage Duration	If all conditions are met, the request will be approved with a 6 month duration.
Other Criteria	 Initial Authorization: Member has a diagnosis of chronic kidney disease (CKD) and has been undergoing dialysis for at least four months Member has a documented hemoglobin between 8.0 and 11.5 g/dL Member has documentation of trial and failure, intolerance, contraindication, or inability to use erythropoietin stimulating agents (ESA) Documentation of the current ESA product (e.g., Procrit, Aranesp, etc.) and dose. The following lab results must be submitted and demonstrate normal values, otherwise, the member MUST be receiving, or is beginning therapy, to correct the deficiency: Serum ferritin level (> 100ng/mL) Transferrin saturation (TSAT) (> 20%) Provider attests that member has no history of myocardial infarction, cerebrovascular event, or acute coronary syndrome in the past 3 months Member will not be receiving concurrent treatment with an ESA Request is for an FDA-approved dose All submitted lab results have been drawn within 30 days of the request Reauthorization: All submitted lab results have been drawn within 30 days of the reauthorization request. Member has a documented increase in hemoglobin from baseline

Revision/Review Date: 04/2023	 The following lab results must be submitted and demonstrate normal values, otherwise, the member MUST be receiving, or is beginning therapy, to correct the deficiency: Serum ferritin level (> 100ng/mL) Transferrin saturation (TSAT) (> 20%) Member will not be receiving concurrent treatment with an ESA Request is for an FDA-approved dose
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary

Field Name	Field Description
Prior Authorization	Joenja
Group Description	
Drugs	Joenja (leniolisib)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Per prescribing information.
Prescriber Restrictions	Prescriber must be an immunologist, hematologist, medical geneticist, or other prescriber who specializes in the treatment of genetic or immunologic disorders.
Coverage Duration	If the criteria are met, requests will be approved with up to a 6-month duration. Thereafter, reauthorization requests will be approved with up to a 12-month duration.
Other Criteria	Initial Authorization:
	 Documentation of APDS/PASLI-associated PIK3CD/PIK3R1 mutation, confirmed by genetic testing. Documentation of nodal and/or extranodal lymphoproliferation, history of repeated oto-sino-pulmonary infections and/or organ dysfunction (e.g., lung, liver) Prescriber attests that the member is not currently taking immunosuppressive medication Prescriber attests that female patients have been advised of the potential risk to a fetus, will use effective contraception and have had a negative pregnancy test prior to initiation of treatment Medication is being prescribed at an FDA approved dose
	Reauthorization: • Documentation has been submitted indicating member has
	 experienced a clinical benefit from treatment (e.g., decreased lymph node size, increase in percentage of naïve B cells) Prescriber attests that female patients will use effective contraception and have had a negative pregnancy test Medication is being prescribed at an FDA approved dose
Revision/Review Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Agents for Homozygous Familial Hypercholesterolemia (HoFH)
Group Description	Evkeeza (evinacumab-dgnb) Juxtapid (lomitapide)
Drugs	**Please refer to the "Proprotein Convertase Subtilisin/kexin 9 (PCSK9) Inhibitors" policy for requests for medications in that class**
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by cardiologist or specialist in treatment of lipid disorders.
Coverage Duration	If all of the above conditions are met, the initial request will be approved for up to a 6 month duration, and the reauthorization request will be approved for a 12 month duration.
Other Criteria	 Documentation of a diagnosis of homozygous familial hypercholesterolemia (HoFH) via either: Genetic confirmation of two mutant alleles at the LDL receptor, ApoB, PCSK9 or ARH adaptor protein gene locus; OR A clinical diagnosis of HoFH which includes: untreated LDL-C >500 mg/dL (>13 mmol/L) or treated LDL-C ≥300 mg/dL (>8 mmol/L), AND Cutaneous or tendon xanthoma before age 10 years, OR Elevated LDL-C levels consistent with heterozygous FH in both parents. Patient has tried and failed atorvastatin 40mg-80mg or rosuvastatin 20-40mg (consistently for 3 months via claim history or chart notes). If patient is not able to tolerate atorvastatin or rosuvastatin, documentation was provided that patient is taking another statin at the highest tolerated dose, or a medical reason was provided why the member is not able to use these therapies. If prescriber indicates member is "statin intolerant", documentation was provided including description of the side effects, duration of therapy, "wash out", re-trial, and then change of agents. Patient has tried and failed ezetimibe at a maximal tolerated dose or a medical reason was provided why the member is not able to use ezetimibe Member has documented trial and failure with PCSK9 inhibitor for at least 3 months, or a medical reason has been provided, why member is unable to use a PCSK9 inhibitor indicated for HoFH to manage their

Revision/Review Date 2/2024

- Documentation was provided indicating provider has counseled member on smoking cessation and following a "heart healthy diet".
- Documentation was provided of current LDL level

Reauthorization:

- Documentation submitted indicates that the member has obtained clinical benefit from the medication including repeat fasting lipid panel lab report, and the member has achieved or maintained a LDL reduction from the levels immediately prior to initiation of treatment with Juxtapid.
- The patient's claim history shows consistent therapy (monthly fills).

Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Ketamine
Drugs	Ketamine (Ketalar)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	N/A
Prescriber Restrictions	Depression: N/A Complex Regional Pain Syndrome (CRPS): pain management specialist
Coverage Duration	Initial: 4 weeks
Other Criteria	Continuation of therapy: 6 months
	 Initial Authorization: Diagnosis of major depressive disorder (MDD) or treatment-resistant depression (TRD) Documented trial and failure of two preferred oral antidepressants (e.g. SSRIs, SNRIs, TCAs) of at least a minimum effective dose for four (4) weeks or longer OR a medical justification as to why the patient cannot use preferred alternative(s). Re-authorization: Documentation was submitted indicating the member has clinically benefited from therapy. CRPS Initial Authorization:
	 Diagnosis of CRPS (may also be termed reflex sympathetic dystrophy, algodystrophy, causalgia, Sudeck atrophy, transient osteoporosis, and acute atrophy of bone) Patient has tried and failed at least 8 weeks treatment with or continues to receive physical therapy (PT) and/or occupational therapy (OT). Patient has tried and failed at least two of the following: NSAIDs Anticonvulsants (e.g. gabapentin, pregabalin) Antidepressants (e.g. SNRIs, TCAs)

	o Bisphosphonate (in the setting of abnormal uptake on bone scan)
	Re-authorization:
	Patient has demonstrated clinical benefit.
Revision/Review Date 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is
	medically necessary.

Prior Authorization	
Group Description	Kuvan
Drugs	sapropterin (Kuvan)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert).
Exclusion Criteria	None
Required Medical Information	See "other criteria"
Age Restrictions	None
Prescriber Restrictions	Specialist experienced in treating Phenylketonuria (PKU)
Coverage Duration	<u>Initial:</u> If the criteria are met, the request will be approved for one month
	Reauthorization: If the criteria are met, the request will be approved 1 month for patients who require a dose increase to 20 mg/kg/day due to non-responsiveness and for all other patients the request will be approved for a duration of 6 months. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the request will be approved for 12 months.
Other Criteria	 INITIAL AUTHORIZATION: Documentation of a confirmed diagnosis of phenylketonuria (PKU) Documentation of the patient's baseline blood Phe level (within 30 days of the request) Documentation or prescriber attestation that the patient is currently utilizing a Phe restricted diet Documentation of the patient's current weight The medication is being prescribed at an FDA-approved dose PA CRITERIA FOR REAUTHORIZATION: Patients dosed at 20mg/kg/day (from initial auth) and did not have a decrease in Phe level of at least 30% from baseline, are considered NON RESPONDERS and NO ADDITIONAL TREATMENT will be authorized. Documentation of the patient's current weight Documentation of updated blood Phe level results showing reduction in Phe level from baseline The medication is being prescribed at an FDA approved dosage.

Revision/Review Date: 4/2023

Clinical reviewer/Medical Director must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date: 10/2023

Medical Director/clinical reviewer may override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Lagambi (laganamah ismah)
Group Description	Leqembi (lecanemab-irmb)
Drugs	Leqembi (lecanemab-irmb)
	Initial authorizations and reauthorizations must be approved by a Medical Director
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Patients with moderate to severe Alzheimer's Disease (AD) Patients with neurodegenerative disease caused by a condition other than AD
Required Medical Information	See "Other Criteria"
Age Restrictions	age 50-90 years
Prescriber	Prescriber must be a neurologist
Restrictions	
Coverage Duration	For initial authorization: the request will be approved in accordance with the FDA-indicated titration schedule for up to 6 months For reauthorization: if all of the conditions are met, the request will be approved for 6 months.
Other Criteria	 Initial Authorization Diagnosis of mild cognitive impairment (MCI) caused by AD or mild AD consistent with Stage 3 or Stage 4 Alzheimer's disease as evidenced by at least one of the following: Clinical Dementia Rating Global (CDR-G) score of 0.5-1.0 and a Memory Box score of 0.5 or greater Mini-Mental State Examination (MMSE) score ≥ 22 and ≤ 30 Wechsler Memory Scale IV-Logical Memory (subscale) II (WMS-IV LMII) score at least 1 standard deviation below age-adjusted mean The request is for an FDA approved dose Documentation of BOTH of the following: Recent, within past year, positive results for the presence of beta-amyloid plaques on a positron emission tomography (PET) scan or cerebrospinal fluid testing Recent, within past year, baseline Magnetic Resonance Imaging (MRI) scan

- Physician has assessed baseline disease severity utilizing an objective measure/tool (i.e., Alzheimer's Disease Assessment Scale-Cognitive Subscale [ADAS-Cog-14], Alzheimer's Disease Cooperative Study-Activities of Daily Living Inventory-Mild Cognitive Impairment version [ADCS-ADL-MCI], Clinical Dementia Rating Sum of Boxes [CDR-SB], etc.)
- No recent (past 1 year) history of stroke, seizures or transient ischemic attack (TIA), or findings on neuroimaging that indicate an increased risk for intracerebral hemorrhage.

Reauthorization

- The request is for an FDA approved dose
- Patient continues to have a diagnosis of mild cognitive impairment (MCI) caused by AD or mild AD consistent with Stage 3 or Stage 4 Alzheimer's disease as evidenced by at least one of the following:
 - o CDR-G score of 0.5-1.0 and a Memory Box score of 0.5 or greater
 - o MMSE score of 22-30
 - Wechsler Memory Scale IV-Logical Memory (subscale) II (WMS-IV LMII) score at least 1 standard deviation below age-adjusted mean
- Provider attestation of safety monitoring and management of amyloid related imaging abnormalities (ARIA) and intracerebral hemorrhage, as recommended per the manufacturer's prescribing information.
- Documentation that member has experienced clinical benefit from the medication (such as: stabilization or decreased rate of decline in symptoms from baseline on CDR-SB, ADAS-Cog14, or ADCS MCI-ADL scales)
- No recent (past 1 year) history of stroke, seizures, or TIA

If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date: 07/2023

Prior Authorization Group Description	Linezolid (Zyvox)
Drugs	linezolid (Zyvox)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for up to one month.
Other Criteria	 The member meets ONE of the two following criteria: Documented history of treatment with linezolid IV (continuation of therapy, IV to PO conversion). Documented trial and failure, or intolerance, to 1 preferred antibiotic to which the organism is susceptible. AND Requests for linezolid oral suspension require a documented trial and failure of linezolid oral tablets or a medical reason (e.g. intolerance, hypersensitivity, contraindication) why linezolid oral tablets cannot be used. Medical Director/clinical reviewer must override criteria
Revision/Review Date: 4/2023	when, in his/her professional judgement, the requested item is medically necessary.

Restrictions	of cardiovascular disease, such as a cardiologist
Coverage Duration	If all of the criteria are met, the request will be approved for 12 months.
Other Criteria	Patient has established atherosclerotic disease or multiple risk
	factors for cardiovascular disease
	Patient is currently receiving statin therapy, or documentation has
	been provided that the member has a medical reason statin therapy is not appropriate
	• Documentation is provided that guideline directed medical therapies targeted to patient's specific risk factors are being maximized, such as medications targeted at reduction in cholesterol, blood pressure, antiplatelet therapies, and diabetes
	• Patient does not have pre-existing blood dyscrasias (ex. leukopenia, thrombocytopenia)
	• Patient does not have renal failure (CrCl less than 15 ml/min) or severe hepatic impairment
	Patient is not currently taking medications contraindicated for concurrent use with Lodoco
Revision/Review Date: 2/2024	 Strong CYP3A4 inhibitors (ex. atazanavir, clarithromycin, darunavir/ritonavir, indinavir, itraconazole, ketoconazole, lopinavir/ritonavir, nefazodone, nelfinavir, ritonavir, saquinavir, telithromycin, tipranavir/ritonavir) P-glycoprotein inhibitors (ex. cyclosporine, ranolazine)
, _,	Physician/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Prior Authorization	Torres Andrew Televisian Andrew Books
Group Description	Long Acting Injectable Antipsychotics
Drug(s)	Preferred products: Abilify Asimtufii (aripiprazole monohydrate) Risperdal Consta, Perseris (risperidone) Invega Sustenna, Invega Trinza (paliperidone palmitate) Abilify Maintena (aripiprazole monohydrate) Aristada, Aristada Initio (aripiprazole lauroxil) Ziprasidone IM fluphenazine decanoate haloperidol decanoate
	Non-preferred products:
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert.
Exclusion Criteria	N/A
Age Restrictions	Member must be 18 years of age or older.
Prescriber Restrictions	Prescriber by or in consultation with a psychiatrist
Coverage Duration	If all of the conditions are met, the initial request will be approved for 6 months. Reauthorization requests will be approved for 12 months. If the provider states that the requested medication is for a chronic or long-term condition for which the medication may be necessary for the life of the patient, the initial request will be approved for 12 months.
Other Criteria	 Criteria for Initial Approval: Member has claims history or physician attestation that member has had prior use of an oral atypical antipsychotic Member has demonstrated tolerability to the oral agent of the drug that is being requested If the request is for any other product other than the preferred agents, the member has a documented trial (consistent with pharmacy claims or chart notes including 3 months or more of therapy) with one of the preferred agents, OR has a documented medical reason such as intolerance, hypersensitivity, contraindication, etc OR documentation was provided indicating member was previously established on a non- preferred agent and prescriber feels changing patient to one of the preferred long acting agents would cause detriment or patient decompensation. If request is for Invega Trinza, documentation has been provided that the member has been stable on Invega Sustenna for 4 months, and at the same dose for the last 2 months

•	If the request is for Invega Hafyera, documentation has been provided that
	the member has been stable on Invega Sustenna for 4 months and at the
	same dose for the last 2 months OR has been stable on Invega Trinza for
	the last 3 months

- If request is for Aristada Initio, only a single dose will be approved if documentation has been provided that the member is initiating Artistada
- Request is for FDA approved indication at an approved dose

Revision/Review Date: 1/2024

Criteria for Reauthorization:

- Member has been compliant with filling their medication OR documentation was provided indicating why member missed dosing
- Documentation was provided that member is stable on medication
- Request is for FDA approved indication at an approved dose

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Topical mTOR Kinase Inhibitors
Drugs	Hyftor (sirolimus topical gel)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	Member concomitantly taking an oral mTOR inhibitor
Required Medical Information	See "Other Criteria"
Age Restrictions	Member must be 6 years or older
Prescriber Restrictions	Prescriber must be a dermatologist, medical geneticist, neurologist, or other prescriber who specializes in the treatment of genetic or dermatologic disorders.
Coverage Duration	If the criteria are met, requests will be approved with up to a 3 month duration. Thereafter, reauthorization requests will be approved with up to a 6 month duration.
Other Criteria	Initial Authorization:
	 Member has a confirmed diagnosis of tuberous sclerosis complex (TSC) Member has at least 3 facial angiofibromas measuring 2 mm or larger in diameter Documentation of a comprehensive dermatologic evaluation has been provided Prescriber attests that the member is not a candidate for laser therapy or surgery Medication is being prescribed at an FDA approved dose
	Reauthorization:
Revision/Review Date 4/2023	 Documentation has been provided indicating that the member has experienced a clinical benefit from treatment (e.g. improvement in size and color of angiofibromas) Documentation of a comprehensive dermatologic evaluation has been provided Prescriber attests that the member is not a candidate for laser therapy or surgery Medication is being prescribed at an FDA approved dose

Field Name	Field Description
Prior Authorization Group Description	Mucopolysaccharidosis II (Hunter Syndrome) Agents
Drugs	Elaprase (idursulfase)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional (USP
	DI), the Drug Package Insert (PPI), or disease state specific standard of
E1i Cuiti-	care guidelines.
Exclusion Criteria	N/A
Required Medical Information	"See Other Criteria"
Age Restrictions	Patient is ≥ 16 months of age
Prescriber	Prescribed by or in consultation with a specialist in genetics or
Restrictions	metabolic disorders
Coverage Duration	Initial Authorization: 6 months
0 0 1 1 1 1 0 1 1 1 1 1 1 1 1 1 1 1 1 1	Reauthorization: 12 months
Other Criteria	Initial Authorization
	Diagnosis of Mucopolysaccharidosis II as confirmed by one of the
	following:
	 Enzyme assay demonstrating a deficiency of iduronate
	2-sulfatase activity
	o Genetic testing
	Patient's weight
	Dosing is consistent with FDA-approved labeling or is supported
	by compendia or standard of care guidelines
	Reauthorization
	• Patient has demonstrated a beneficial response (i.e., stabilization or
	improvement in 6-minute walk test [6-MWT], forced vital capacity
	[FVC]), urinary glycosaminoglycan (GAG) levels, liver volume,
	spleen volume, etc.)
	Patient's weight
	 Dosing is consistent with FDA-approved labeling or is supported
	by compendia or standard of care guidelines
Revision/Review	of compension of similaria of care guidelines
Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Mucopolysaccharidosis VI (Maroteaux-Lamy Syndrome) Agents
Group Description	
Drugs	Naglazyme (galsulfase)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	"See Other Criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	Initial: 6 months
Coverage Daration	Renewal: 12 months
Other Criteria	 Initial Authorization Diagnosis of Mucopolysaccharidosis VI as confirmed by one of the following: Enzyme assay demonstrating a deficiency in N-acetygalactosamine 4-sulfatase (arylsulfatase B) enzyme activity DNA testing Patient's weight Dosing is consistent with FDA-approved labeling or is supported by compendia or standard of care guidelines
Revision/Review Date 2/2024	 Reauthorization Patient has demonstrated a beneficial response (i.e., stabilization or improvement in 12-minute walk test [12-MWT], 3-minute stair climb test, urinary glycosaminoglycan (GAG) levels, etc.) Patient's weight Dosing is consistent with FDA-approved labeling or is supported by compendia or standard of care guidelines Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Multaq
Group Description	Multaq
Drugs	Multaq (dronedarone)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Pregnancy
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	Request must be from a cardiologist or electrophysiologist.
Coverage Duration	If the criteria are met, the request will be approved with up to a 12 month duration.
Other Criteria	 Diagnosis of paroxysmal or persistent arterial fibrillation (AF) or atrial flutter (AFL) with a recent episode. Must not have NYHA Class IV heart failure or symptomatic heart failure with recent decompensation requiring hospitalization or referral to a specialized heart failure clinic Must have AF that can be cardioverted into normal sinus rhythm, or is currently in sinus rhythm Prescriber attests women of childbearing potential have been counseled regarding appropriate contraceptives
Revision/Review Date 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Myasthenia Gravis Agents
Group Description	
Drugs	Rystiggo (rozanolixizumab), Soliris (eculizumab), Ultomiris (ravulizumab), Vyvgart (efgartigimod), Vyvgart Hytrulo (efgartigimod alfa and hyaluronidase)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	≥ 18 years
Prescriber Restrictions	Prescribed by or in consultation with a neurologist or rheumatologist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization:
	Diagnosis of generalized myasthenia gravis (gMG)
	Patient has a positive serological test for one of the following:
	 Anti-muscle-specific tyrosine kinase (MuSK) antibodies (Rystiggo only)
	Patient has a Myasthenia Gravis Foundation of America (MGFA) clinical classification of class II, III or IV
	• Patient has tried and failed, or has contraindication, to one of the following:
	 2 or more conventional therapies (i.e. acetylcholinesterase inhibitors, corticosteroids, non-steroidal immunosuppressive therapies)
Revision/Review Date: 10/2023	 Failed at least 1 conventional therapy and required chronic plasmapheresis or plasma exchange or intravenous immunoglobulin
	Medication is prescribed at an FDA approved dose
	Patient is not using agents covered by this policy concurrently (i.e. no concurrent use of Vyvgart, Vyvgart Hytrulo, Rystiggo, Soliris, or Ultomiris)
	For Vyvgart Hytrulo, patient has tried and failed, or has
	 contraindication, to Vyvgart Requests for Soliris (eculizumab) and Ultomiris (ravulizxumab) will
	requests for Soffis (counzumae) and Offormits (favunzaumae) will

also require all of the following:

- Patient has tried and failed, or has contraindication, to Vyvgart, Vyvgart Hytrulo, or Rystiggo.
- Documentation of vaccination against meningococcal disease or a documented medical reason why the patient cannot receive vaccination or vaccination needs to be delayed
- Antimicrobial prophylaxis with oral antibiotics (penicillin, or macrolides if penicillin-allergic) for two weeks will be administered if the meningococcal vaccine is administered less than two weeks before starting therapy or a documented medical reason why the patient cannot receive oral antibiotic prophylaxis

Re-Authorization:

- Provider has submitted documentation of clinical response to therapy (e.g., reduction in disease severity, improvement in quality of life scores, MG-ADL scores, etc).
- Medication is prescribed at an FDA approved dose

Prior Authorization	Self-administered Disease Modifying Therapies (DMTs) for Multiple
Group Description	Sclerosis (MS)
	<u>Preferred</u> : dimethyl fumarate (generic), teriflunomide, glatiramer, Glatopa (glatiramer), Avonex (interferon beta-1a), Rebif (interferon beta-1a), Betaseron (interferon beta-1b), fingolimod, Kesimpta (ofatumumab)
Drugs	Non-preferred: Briumvi (ublituximad-xiiv), Copaxone (glatiramer acetate), Gilenya (fingolimod), Tecfidera (dimethyl fumarate), Aubagio (teriflunomide), Extavia (interferon beta-1b), Plegridy (peginterferon beta-1a), Mayzent (siponimod), Mavenclad (cladribine), Vumerity (diroximel fumarate), Zeposia (ozanimod), Bafiertam (monomethyl fumarate), Ponvory (ponesimod), Tascenso ODT (fingolimod), or any other newly marketed self-administered DMT for MS indicated for the listed diagnoses
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Primary Progressive MS (PPMS) Mavenclad: Clinically Isolated Syndrome (CIS)
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be age appropriate per prescribing information (PI)
Prescriber Restrictions	Prescriber must be a neurologist
Coverage Duration	If all of the criteria are met, the request will be approved for 12 months for all agents except Mavenclad (cladribine). If all of the criteria for Mavenclad (cladribine) are met, the request will be approved for 1 course at a time with a lifetime maximum of 2 yearly treatment courses [1 course = (1 cycle per 30 days) two times].
Other Criteria	 Initial Authorization For all requests, the medication is being prescribed at a dose that is consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed literature. Clinically Isolated Syndrome (CIS) Diagnosis of CIS If the request is for a preferred agent, approve. If the request is for Gilenya: Healthcare Provider (HCP)-confirmed history of chickenpox, results of varicella zoster virus (VZV) antibody testing and, if negative, documentation of VZV vaccination If the request is for Tascenco ODT (fingolimod) 0.25mg, the member must
	meet both of the following criteria: o Healthcare Provider (HCP)-confirmed history of chickenpox, results of varicella zoster virus (VZV) antibody testing and, if negative,

documentation of VZV vaccination

- o Member weighs 40 kg or less
- o If the request is for a non-preferred agent, then the member must have a documented trial of at least TWO chemically distinct preferred agents or have a documented medical reason (e.g. contraindication, intolerance, hypersensitivity, etc.) for not utilizing these therapies AND
 - o If the request is for Kesimpta (ofatumumab), documentation that immunizations are up-to-date.
 - If the request is for Bafiertam (monomethyl fumarate) or Vumerity (diroximel fumarate), the patient has a trial and failure of or documented medical reason for not using dimethyl fumarate (Tecfidera).
 - If the request is for Mayzent (siponimod), Tascenso ODT (fingolimod), Ponvory (ponesimod), or Zeposia (ozanimod), documentation of the following is required:
 - Healthcare Provider (HCP)-confirmed history of chickenpox, results of varicella zoster virus (VZV) antibody testing and, if negative, documentation of VZV vaccination
 - Additionally, for Mayzent, the following is required: Results of CYP2C9 genotyping and
 - patient does not have CYP2C9 *3/*3 (CONTRAINDICATED)
 - if patient has CYP2C9 *1/*3 or *2/*3, dose does not exceed 1 mg daily
 - o If the request is for Tascenso ODT (fingolimod) 0.5mg, the patient has a trial and failure of or documented medical reason for not using fingolimod (Gilenya)

Relapsing Remitting MS (RRMS) and Secondary Progressive MS (SPMS)

- o Diagnosis of RRMS or SPMS
- o If the request is for a preferred agent, approve.
 - o If the request is for Gilenya: Healthcare Provider (HCP)-confirmed history of chickenpox, results of varicella zoster virus (VZV) antibody testing and, if negative, documentation of VZV vaccination
- o If the request is for Tascenco ODT (fingolimod) 0.25mg the member must meet both of the following criteria:
 - Healthcare Provider (HCP)-confirmed history of chickenpox, results of varicella zoster virus (VZV) antibody testing and, if negative, documentation of VZV vaccination
 - o Member weighs 40 kg or less
- o If the request is for a non-preferred agent, then the member must have a documented trial of at least TWO chemically distinct preferred agents or have a documented medical reason (e.g. contraindication, intolerance, hypersensitivity, etc.) for not utilizing these therapies AND

- If the request is for Bafiertam (monomethyl fumarate) or Vumerity (diroximel fumarate), the patient has a trial and failure of or documented medical reason for not using dimethyl fumarate (Tecfidera).
- If the request is for Mavenclad (cladribine), documentation of the following:
 - Patient's current weight
 - Results of VZV antibody testing and, if negative, documentation of VZV vaccination
 - If the patient has not tried at least one of the preferred therapies listed above but has a documented medical reason for not utilizing these therapies, the patient has tried and failed at least one other DMT for MS
- o If the request is for Kesimpta (ofatumumab), documentation that immunizations are up-to-date.
- o If the request is for Mayzent (siponimod), Tascenso ODT, Ponvory (ponesimod), or Zeposia (ozanimod):
 - Healthcare Provider (HCP)-confirmed history of chickenpox, results of varicella zoster virus (VZV) antibody testing and, if negative, documentation of VZV vaccination
 - Additionally, for Mayzent, the following is required: Results of CYP2C9 genotyping and
 - patient does not have CYP2C9 *3/*3(CONTRAINDICATED)
 - if patient has CYP2C9 *1/*3 or *2/*3, dose does not exceed 1 mg daily
- o If the request is for Tascenso ODT (fingolimod) 0.5mg, the patient has a trial and failure of or documented medical reason for not using fingolimod (Gilenya)

Revision/Review Date: 1/2024

Reauthorization

CIS

- The medication is being prescribed at a dose that is consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed literature
- O Documentation was provided that the prescriber has reviewed the risks and benefits of continuing DMT versus stopping.

RRMS and SPMS

- o The medication is being prescribed at a dose that is consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed literature
- Documentation was provided that the prescriber has evaluated the member and recommends continuation of therapy (clinical benefit).
- If the request is for Mavenclad (cladribine), patient's current weight is required AND **NO MORE THAN 2 COURSES IN TOTAL WILL BE APPROVED.**

Continuation of Therapy:

Members with history (within the past 90 days or past 12 months for Mavenclad [cladribine]) of a non-preferred product are not required to try a preferred agent prior to receiving the non-preferred product for continuation of therapy.

Prior Authorization Group Description	Healthcare professional (HCP) administered Disease Modifying Therapies (DMTs) for Multiple Sclerosis (MS)
Drugs	Preferred: Tysabri (natalizumab), Ruxience (rituximab-pvvr)
	Non-preferred/Non-formulary: Ocrevus (ocrelizumab), Rituxan (rituximab), Riabni (rituximab-arrx), Truxima (rituximab-abbs), Rituxan Hycela (rituximab/hyaluronidase), Lemtrada (alemtuzumab), Briumvi (ublituximab)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Tysabri, Briumvi:
	 Primary Progressive MS (PPMS) Lemtrada: PPMS Clinically Isolated Syndrome (CIS)
Required Medical Information	See "Other Criteria"
Age Restrictions	Patients must be age appropriate per PPI, nationally recognized compendia, or peer-reviewed medical literature
Prescriber Restrictions	Prescriber must be a neurologist
Coverage Duration	If all of the criteria are met, the request will be approved for 12 months.
Other Criteria	Initial Authorization
	Clinically Isolated Syndrome (CIS), Relapsing Remitting MS (RRMS), Secondary Progressive MS (SPMS)
	 Diagnosis of CIS, RRMS, or SPMS The medication is being prescribed at a dose consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature If the request is for Tysabri (natalizumab), documentation of the following Patient does not have a history of progressive multifocal leukoencephalopathy (PML) Documentation consistent with pharmacy claims data indicating the patient is not currently using any antineoplastic, immunosuppressant, or immunomodulating medications

- If the request is for Ruxience (rituximab-pvvr) or a non-preferred/non-formulary drug, documented trial of at least TWO of the following is required:
 - o Copaxone
 - o teriflunamide
 - Avonex
 - o Betaseron
 - Dimethyl fumarate
 - o Glatiramer
 - o Glatopa
 - o Gilenya
 - o Rebif
 - Or a documented medical reason (e.g. contraindication, intolerance, hypersensitivity, etc.) for not utilizing these therapies.

OR

For patients with "highly active" MS requesting Lemtrada or a rituximab product, a trial with Gilenya alone is acceptable.

- If the request is for Ocrevus (ocrelizumab), Briumvi (ublituximab) or a rituximab product, documentation of the following is required:
 - Attestation that the patient has been screened for and does not have active hepatitis B virus (HBV)
 - If the request is for a rituximab product other than Ruxience (rituximab-pvvr), documented trial and failure of Ruxience (rituximab-pvvr), or medical reason (e.g. intolerance, hypersensitivity, contraindication) why the patient cannot use Ruxience (rituximab-pvvr)

Primary Progressive Multiplate Sclerosis (PPMS)

- Diagnosis of PPMS
- The medication is being prescribed at a dose consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature
- If the request is for Ocrevus (ocrelizumab) or a rituximab product, documentation of the following has been submitted
 - o Attestation that the patient has been screened for and does not have active HBV
 - If the request is for a rituximab product other than Ruxience (rituximab-pvvr), documented trial and failure of Ruxience (rituximab-pvvr), or medical reason (e.g. intolerance, hypersensitivity, contraindication) why the patient cannot use Ruxience (rituximab-pvvr)
 - o If the request is for Rituxan Hycela (rituximab/hyaluronidase), all of the above AND documented medical reason why the patient cannot use rituximab.

Reauthorization

CIS

- The medication is being prescribed at a dose consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature
- Documentation was provided that the prescriber has reviewed the risks and benefits of continuing DMT versus stopping.

RRMS or SPMS, or PPMS

- Documentation that the prescriber has evaluated the member and recommends continuation of therapy (clinical benefit)
- The medication is being prescribed at a dose consistent with FDA-approved package labeling, nationally recognized compendia, or peer-reviewed medical literature
- If the request is for Lemtrada (alemtuzumab), documentation of the following
 - o At least 12 months has or will have elapsed since previous treatment
- If the request is for Tysabri (natalizumab), documentation of the following has been submitted
 - Patient does not have a history of PML
- Documentation consistent with pharmacy claims data was submitted indicating the patient is not currently using any antineoplastic, immunosuppressant, or immunomodulating medications

Revision/Review Date: 7/2023

Continuation of Therapy:

Members with history (within the past 180 days or past 12 months for Lemtrada [alemtuzumab]) of a non-preferred product are not required to try a preferred agent prior to receiving the non-preferred product for continuation of therapy.

Prior Authorization	
Group Description	Biologic Agents for Nasal Polyposis
Drugs	Preferred Drugs:
	Dupixent (dupilumab)
	Xolair (omalizumab)
	Nucala (mepolizumab) auto-injectors, 40 mg/0.4 mL syringes
	Non-Preferred Drugs:
	Nucala (mepolizumab) 100 mg/1 mL syringes, vials
	and any newly-approved biologic agent for nasal polyposis
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Use of Dupixent, Xolair, or Nucala concomitantly or with another pulmonary biologic (e.g. Fasenra, Cinqair)
Required Medical	See "Other Criteria"
Information	
Age Restrictions	Patients must be 18 years age or older
Prescriber Restrictions	Prescriber must be an allergist or otolaryngologist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy the request will be approved for 6 months.
Other Criteria	**Xolair: For asthma and urticaria, please refer to the "Xolair for Asthma and Urticaria" policy**
	Dupixent: For atopic dermatitis, please refer to the "Agents for Atopic Dermatitis" policy; For asthma, please refer to the "Pulmonary Biologics for Asthma and Eosinophilic Conditions" policy **Nucala: For asthma or other eosinophilic conditions, please refer to the "Pulmonary
	Biologics for Asthma and Eosinophilic Conditions" policy**
	Initial Authorization:
	Diagnosis of chronic rhinosinusitis with nasal polyposis (CRSwNP)
	Medication is being prescribed at an FDA approved dosage
	Documentation of ONE of the following:
	 Trial and failure, or medical reason for not using, all of the following therapies:
	■ Intranasal saline irrigation/spray
	 an intranasal corticosteroids
	 a systemic corticosteroid
	montelukast
	 Prior surgery for nasal polyps
	 Patient is currently using an intranasal corticosteroid, will be prescribed at an intranasal corticosteroid, or has a documented medical reason for not using an intranasal corticosteroid
	• For requests for non-preferred drugs, a trial and failure of, or documented medical reason for not using, a preferred drug is required.

	Re-authorization:
	Medication is prescribed at an FDA-approved dosage
Revision/Review Date 1/2024	Member will continue to use an intranasal corticosteroid, or has a medical reason for not using an intranasal corticosteroid
	• Documentation has been provided that demonstrates a clinical benefit (e.g. improvements in symptom severity, nasal polyp score [NPS], sino-nasal outcome test-22 [SNOT-22], nasal congestion score [NCS]),], nasal obstruction symptom visual analogue scale [VAS])
	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Natriuretic Peptides for Achondroplasia
Drugs	Voxzogo (vosoritide)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Hypochondroplasia or short stature condition other than achondroplasia
Required Medical Information	See "Other Criteria"
Age Restrictions	According to FDA approved prescribing information
Prescriber Restrictions	Prescribed by, or in consultation with, an endocrinologist, medical geneticist, or other specialist for the treatment of achondroplasia
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	 Initial Authorization: Member has a diagnosis of achondroplasia as confirmed via genetic testing Prescriber attests patient has open epiphyses Documentation is provided of baseline recent (within the past 6 months) growth velocity ≥1.5 cm/year Medication is prescribed at an FDA approved dose Re-Authorization: Documentation of positive clinical response to therapy (as demonstrated by improvement over baseline in annualized growth
Revision/Review Date: 4/2023	 velocity) Prescriber attests patient has open epiphyses Medication is prescribed at an FDA approved dose If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Neuromyelitis Optica Spectrum Disorder (NMOSD) Agents
Drugs	Step 1: Rituximab (Rituxan, Truxima, Riabni, Ruxience), Step 2: Enspryng (satralizumab-mwge) Uplizna (inebilizumab-cdon) Step 3: Soliris (eculizumab)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	For Enspryng, Uplizna, Soliris: Anti-aquaporin-4 (AQP4) antibody negative neuromyelitis optica spectrum disorder (NMOSD)
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with a specialist who is experienced in the treatment of NMOSD (such as immunologist, neurologist or hematologist)
Coverage Duration	If all of the conditions are met, requests will be approved for 12 months.
Other Criteria	Initial Authorization: For rituximab (Rituxan, Truxima, Riabni, or Ruxience): Member has a diagnosis of NMOSD Documentation indicating that the patient has been screened for HBV (hepatitis B virus) prior to initiation of treatment Dosing is supported by compendia or standard of care guidelines If the request is for any medication other than Ruxience (rituximab-pvvr) or Riabni (rituximab-arrx), there is a documented trial and failure of Ruxience or Riabni, or medical reason why (e.g. intolerance, hypersensitivity, contraindication) they cannot be used For Enspryng: Member has a diagnosis of anti-aquaporin-4 (AQP4) antibody positive NMOSD Provider attests to completion of the following assessments prior to the first dose of Enspryng as outlined in the prescribing information: Hepatitis B virus screening Tuberculosis screening Liver transaminase screening

- O Patient has not received live or attenuated-live virus vaccines within 4 weeks before the start of Enspryng therapy
- Documented trial and failure of rituximab (Rituxan, Truxima, Riabni, or Ruxience), azathioprine, or mycophenolate mofetil, or medical reason why (e.g., intolerance, hypersensitivity, contraindication) they cannot be used
- Dosing is consistent with FDA-approved labeling or is supported by compendia or standard of care guidelines

Exceptions:

Requests for drugs in step 2 (Enspryng, Uplizna) may be approved without a trial and failure of rituximab (Rituxan, Truxima, Riabni, Ruxience), azathioprine, or mycophenolate if the member has been using Soliris

For Uplizna:

- Member has a diagnosis of anti-aquaporin-4 (AQP4) antibody positive NMOSD
- Provider attests to completion of appropriate assessments prior to the first dose of Uplizna as outlined in the prescribing information:
 - o Hepatitis B virus screening
 - o Quantitative serum immunoglobulins
 - o Tuberculosis screening
 - Patient has not received live or attenuated-live virus vaccines within 4 weeks before the start of Uplizna therapy
- Documented trial and failure of rituximab (Rituxan, Truxima, Riabni, or Ruxience), azathioprine, or mycophenolate mofetil or medical reason why (e.g., intolerance, hypersensitivity, contraindication) they cannot be used
- Dosing is consistent with FDA-approved labeling or is supported by compendia or standard of care guidelines

Exceptions:

Requests for drugs in step 2 (Enspryng, Uplizna) may be approved without a trial and failure of rituximab (Rituxan, Truxima, Riabni, Ruxience), azathioprine, or mycophenolate if the member has been using Soliris

For Soliris:

 Member has a diagnosis of anti-aquaporin-4 (AQP4) antibody positive NMOSD

- Documentation of vaccination against meningococcal disease or a documented medical reason why the patient cannot receive vaccination or vaccination needs to be delayed
- Antimicrobial prophylaxis with oral antibiotics (penicillin, or macrolides if penicillin-allergic) for two weeks if the meningococcal vaccine is administered < 2 weeks before starting therapy or a documented medical reason why the patient cannot receive oral antibiotic prophylaxis.
- Documented trial and failure of, or medical reason why (e.g. intolerance, hypersensitivity, contraindication) why the following cannot be used (one from each bullet below):
 - o Rituximab (Rituxan, Truxima, Riabni, or Ruxience), azathioprine, or mycophenolate mofetil
 - o Enspryng
 - o Uplizna
- Dosing is consistent with FDA-approved labeling or is supported by compendia or standard of care guidelines

Revision/Review Date 10/2023

Reauthorization:

- Documentation that the prescriber has evaluated the member and recommends continuation of therapy (clinical benefit)
- Request is for an FDA approved/medically accepted dose

Prior Authorization	
	Medications for Management of Obesity
Group Description Drugs	Preferred Wegovy Saxenda Phentermine Non-Preferred Adipex-P (phentermine) Xenical (orlistat) orlistat amphetamine sulfate tab benzphetamine diethylpropion, diethylpropion ER Evekeo tab/ODT phendimetrazine, phendimetrazine ER Lomaira (phentermine) Phendimetrazine tartrate tab/ER cap Imcivree (setmelanotide) Any newly-approved medication indicated for obesity or weight management
Covered Uses	*Note: Alli is not a covered benefit* Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Age appropriate per labeling
Prescriber Restrictions	Imcivree: Prescribed by or in consultation with medical geneticist, endocrinologist, or specialist in metabolic disorders N/A for all other agents
Coverage Duration	If the criteria are met, the request will be approved for 6 months, or 12 months for Imcivree for BBS.

Initial Authorization:

- Requested dose is appropriate per labeling
- Documentation of current weight and body mass index (BMI)
- BMI must be one of the following:
 - 1. BMI of 27 29.9 kg/m² with one of the following weightrelated comorbidities: coronary artery disease, diabetes, hypertension, dyslipidemia, or obstructive sleep apnea
 - 2. BMI of 30 kg/m^2 or more
 - 3. Pediatric patients must be considered obese per package insert
- Documentation of counseling regarding lifestyle changes and behavioral modification (e.g., healthy diet and increased physical activity)
- For Lomaira: trial and failure or medical reason for not using generic phentermine
- For Imcivree, the patient meets one of the following:
 - 1. Diagnosis of Bardet-Biedl syndrome (BBS)
 - 2. Obesity is related to proopiomelanocortin (POMC), proprotein convertase subtilisin/kexin type 1 (PCSK1), or leptin receptor (LEPR) deficiency AND:
 - Deficiency is documented by an FDA-approved genetic test confirming variants in POMC, PCSK1, or LEPR genes that are interpreted as pathogenic, likely pathogenic, or of uncertain significance
 - POMC, PCSK1, or LEPR variants classified as benign or likely benign will not be approved
- For requests for non-preferred drugs, a trial and failure of, or documented medical reason for not using, a preferred drug is required

Revision/Review Date: 1/2024

Re-Authorization:

- Documentation of at least 5% reduction in body weight compared with baseline or 5% of baseline BMI for patients with continued growth potential
- If a weight-related comorbidity was previously noted, an objective improvement is documented (e.g. reduction in blood pressure, cholesterol, hemoglobin A1c, etc)

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Other Criteria

Prior Authorization	Medications without Drug or Class Specific Criteria
Group Description	
Drugs	 Medications without drug or class specific prior authorization criteria Brand drugs and reference biologics when a therapeutic equivalent generic drug or biosimilar/interchangeable biologic is available
	The Oncology Drugs prior authorization criteria will be applied to oncology drugs without drug or class specific criteria
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	N/A
Coverage Duration	If the criteria is met, the request will approved for up to 12 months (depending on the diagnosis and usual treatment duration).
Other Criteria	Initial Authorization:
	All Requests:The drug is requested for an appropriate use (per the
	references outlined in "Covered Uses"
	• The dose requested is appropriate for the requested use (per the references outlined in "Covered Uses")
	Patient meets one of the three following criteria:
	O Documented trial and failure or intolerance with up to two alternative preferred medications appropriate for the requested use (per the references outlined in "Covered Uses" or has a medical reason why these drug(s) cannot be used [e.g. intolerance, contraindication]). For medications where there is only one preferred agent, only that agent must have
	been ineffective or not tolerated. O No other preferred medication has a medically accepted use for the patient's specific diagnosis as referenced in the medical compendia.
Revision/Review Date 10/2023	o All other preferred medications are contraindicated based on the patient's diagnosis, other medical conditions, or other medication therapy.

Brand drugs with a therapeutically equivalent (A-rated) generic drug currently available:

• The provider either verbally or in writing has submitted a medical or member specific reason why the brand name drug is required based on the member's condition or treatment history; **AND** if the member had side effects or a reaction to the generic drug, the provider has completed and submitted an FDA MedWatch form to justify the member's need to avoid this drug. The MedWatch form must be included with the prior authorization request

Form FDA 3500 – Voluntary Reporting

Reference biologic drugs with either a biosimilar or interchangeable biologic drug currently available:

- The prescriber has verbally or in writing submitted a medical or member specific reason why the reference biologic is required based on the member's condition or treatment history; AND if the member had side effects or a reaction to two (if available) biosimilar or interchangeable biologics, the provider has completed and submitted an FDA MedWatch form to justify the member's need to avoid these drugs. The MedWatch form must be included with the prior authorization
- The currently available biosimilar product(s) does not have the same appropriate use (per the references outlined in "Covered Uses") as the reference biologic drug being requested

Form FDA 3500 – Voluntary Reporting

Reauthorization:

- Documentation of provider attestation that demonstrates a clinical benefit
- The requested drug is for a medically accepted dose as outlined in Covered Uses

Field Name	Field Description
Prior Authorization	Ocaliva
Group Description Drugs	Ocaliva (obeticholic acid)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restriction	Member must be 18 years of age or older
Prescriber Restrictions	Prescribed by or in consultation with a hepatologist or gastroenterologist
Coverage Duration	If the criteria are met, the request will be approved for 5 mg once daily for a 3 month duration for initial authorization and up to 10 mg once daily for up to a 12 month duration for reauthorization.
Other Criteria	 Initial Authorization: Diagnosis of primary biliary cholangitis (PBC) with confirmation of diagnosis by the following tests: a) Positive antimitochondrial antibody test b) Elevated serum alkaline phosphatase (ALP) level Ocaliva is being requested in addition to ursodeoxycholic acid (UDCA) due to patient having an inadequate response to UDCA monotherapy for at least 1 year, OR member has a documented medical reason (e.g., contraindication, intolerance, hypersensitivity) why UDCA cannot be used and is taking Ocaliva as monotherapy Prescriber attests the patient does not have complete biliary obstruction, decompensated cirrhosis (e.g., Child-Pugh Class B or C), or compensated cirrhosis (Child-Pugh Class A) with evidence of portal hypertension Submission of the following test results within 30 days of request: a) Serum ALP b) Total bilirubin Reauthorization: Provider attests that the patient has not developed complete biliary obstruction, decompensated cirrhosis (e.g., Child-Pugh Class B or C), or compensated cirrhosis (Child-Pugh Class A) with evidence of portal hypertension Submission of lab tests confirming each of the following:

	defined as 118 U/L for females and 124 U/L for males O Total bilirubin ≤ ULN defined as 1.1 mg/dL for females and 1.5 mg/dL for males
Revision/Review Date 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Omisirge
Group Description	<u> </u>
Drugs	Omisirge (omidubicel-only)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Patient has previously received this medication
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with an oncologist
Coverage Duration	If all the criteria are met, the initial request will be approved for a one-time treatment.
Other Criteria	 Initial Authorization: Patient has a hematologic malignancy planned for umbilical cord blood transplantation (UCBT) following myeloablative conditioning Prescriber attests that the patient is eligible for myeloablative allogeneic hematopoietic stem cell transplantation (HSCT) AND does not have a readily available matched related donor, matched unrelated donor, mismatched unrelated donor, or haploidentical donor Patient has not received a prior allogenic HSCT Patient does not have known allergy to dimethyl sulfoxide (DMSO), Dextran 40, gentamicin, human serum albumin, or bovine material The safety and effectiveness of repeat administration of Omisirge have not been evaluated and will not be approved.
Date: 07/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Opioid-Containing Products
Drugs	 All short-acting opioids (whether preferred or non-preferred) greater than 7 days or greater than 50 morphine milligram equivalents (MME) a day for new starts (defined as no history of opioids in previous 90 days) All long-acting opioids (whether preferred or non-preferred) (defined as no history of long acting opioids in the previous 90 days) Opioids >120 MME per day for treatment experienced members (defined as having history of opioids in the previous 90 days) Total quantity of oxycodone IR 15 mg exceeds 240 units per 365 days Total quantity of oxycodone IR 20 mg exceeds 120 units per 365 days Total quantity of oxycodone IR 30 mg exceeds 60 units per 365 days More than 120 immediate release tablets a month or 720 tablets per year
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Members taking buprenorphine-containing products for opioid dependence
Required Medical Information	See "Other Criteria"
Age Restrictions	per package insert
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved for up to 6 months. Requests for members with cancer, sickle cell disease, or hospice care may be approved for up to 12 months.

If the member has cancer, sickle cell disease, or is in hospice care, only the following criteria apply:

- If the request is for a non-preferred medication, the member must meet non-preferred criteria.
- Prescriber attests to checking the Delaware Prescription Monitoring Program (PMP) for member history
- For transmucosal fentanyl products (Subsys, Actiq, Lazanda, Fentora, Abstral), all of the following apply:
 - The medication is being requested for breakthrough cancer pain
 - O Documentation that the member is opioid-tolerant. (Opioid tolerance is defined as current use of one the following oral morphine 60 mg/day, transdermal fentanyl 25 mcg/hour, oral oxycodone 30 mg/day, oral hydromorphone 8 mg/day, oral oxymorphone 25 mg/day, oral hydrocodone 60 mg/day, or an equianalgesic dose of another opioid for at least one week).
 - o If the member is being newly-initiated on transmucosal fentanyl, the lowest dose of the respective formulation is being prescribed. (Data do not support an equianalgesic dosing of transmucosal fentanyl in relation to other opioids or between different transmucosal formulations).

Initial Authorization:

- The diagnosis is pain AND
- For short-acting opioids, if the request is for above the aforementioned limits, the provider must supply detailed clinical information on the condition and medical documentation that necessitates exceeding the limits.
- For oxycodone 15 mg, 20 mg, and 30 mg, approve if the member has an excluded medical
 condition (cancer, sickle cell, or is on hospice) or the member is on a dose of a long-acting
 medication that requires a high breakthrough pain dosage. The dosage of breakthrough pain
 medication should not exceed 10% of the total daily dose of long- acting opioids.
- For long-acting opioids, the diagnosis is chronic pain that requires daily, around the clock opioid medication AND the provider attests that the member is treatment experienced with a history of a short-acting opioid.
- For new starts only, the prescriber has justified medical necessity for dosing above 50 MME per day (e.g. active tapering) or greater than a 7 day supply of short-acting opioids or above 90 MME per day of long- acting opioids.
- For treatment experienced members only, the prescriber has justified medical necessity for dosing above 120 MME per day (e.g. active tapering) for all opioids.
- The member has tried and failed non-pharmacologic treatment (e.g. physical therapy, behavioral therapy) AND two non-opioid containing pain medications (e.g. acetaminophen, non-steroidal anti- inflammatory drugs (NSAIDs), select antidepressants, anticonvulsants).
- The member is not taking a benzodiazepine. If member is taking a benzodiazepine, prescriber
 has provided documentation as to why and has discussed risks of using opioids and
 benzodiazepines together.
- The member is not taking a muscle relaxant. If member is taking a muscle relaxant, prescriber has provided documentation as to why and has discussed risks of using opioids and muscle relaxants together
- Prescriber attests urine drug screens will be completed every 6 months and if illicit drugs are
 found, identifying the patient as high risk, the heightened risk of overdose will be explained
 to the patient.

Other Criteria

- If member has a high-risk condition stated in the CDC guidelines (ex. sleep apnea or other causes of sleep-disordered breathing, renal or hepatic insufficiency, older adults, pregnant women, depression or other mental health conditions, alcohol or other substance use disorders) prescriber attests to discussing heightened risks of opioid use and has educated member on naloxone use and has considered prescribing naloxone.
- Prescriber attests to discussing with the member the level of risk for opioid abuse/overdose with the dose/duration prescribed.
- Prescriber attests to discussing history of substance abuse and the risks associated with opioid overdose/abuse.
- Prescriber has the member's signature on file acknowledging education regarding the risks of opioid therapy.
- Prescriber attests that the member has entered into a pain management agreement (members in a facility are exempt from this requirement).
- Prescriber attests to checking the Delaware Prescription Monitoring Program (PMP) for member history.
- If the request is for a non-preferred opioid, member must meet above criteria and ONE of the following::
 - Documented trial and failure or intolerance with at least two preferred opioid medications
 - o No other preferred medication has a medically accepted use for the member's specific diagnosis as referenced in the medical compendia.

Reauthorization:

- If the member's daily opioid dose exceeds 120 MME or the quantity requested exceeds the limits noted above, the dose requested has been titrated down from the previous authorization. If not, the prescriber has explained medical necessity for continued dosing above 120MME per day and/or above the quantity limits or proposed a plan for titration going forward.
- Member is not taking a benzodiazepine. If member is taking a benzodiazepine, prescriber has
 provided documentation as to why and has discussed risks of using opioids and benzodiazepines
 together.
- Member is not taking a muscle relaxant. If member is taking a muscle relaxant, prescriber has provided documentation as to why and has discussed risks of using opioids and muscle relaxants together.
- Urine drug screens have been completed every 6 months and the dates have been submitted with the request. If illicit drugs are found, prescriber attests to identifying member as high risk and explained heightened risk of overdose to member. If opioids are not found on urine drug screen, prescriber attests to why member needs to continue therapy.
- If member has a high-risk condition stated in the CDC guidelines (ex. sleep apnea or other causes of sleep-disordered breathing, renal or hepatic insufficiency, older adults, pregnant women, depression or other mental health conditions, alcohol or other substance use disorders) prescriber attests to discussing heightened risks of opioid use and has educated member on naloxone use and has considered prescribing naloxone.
- Prescriber attests to checking the Delaware Prescription Monitoring Program (PMP) for member history

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date: 7/2023

Prior Authorization	Opioid Use Disorder Treatment
Group Description	
Drugs	Preferred products:
	 Lucemyra Suboxone films Zubsolv Probuphine Any other newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	N/A
Coverage Duration	Preferred products initial authorization for doses that exceed the daily quantity limit: up to one month Lucemyra: maximum of 16 tablets per day for no more than 14 days Other non-preferred products and pregnant members: 12 months

<u>Initial Authorization for dosing that exceeds the daily quantity limit of oral buprenorphine products:</u>

Other Criteria

- Diagnosis of opioid dependence or opioid use disorder
- May approve dosage up to 24 mg/day (Suboxone or buprenorphine) or 17.1-4.2 mg (Zubsolv) on an initial prescription if ONE of the following applies:
 - o Patient is filling an opioid use disorder agent for the first time and requires a dose that exceeds the quantity limit for the first month of induction
 - o Member is pregnant

Dosing that exceeds the daily quantity limit, following the one month induction will be denied, unless member is pregnant. Members are expected to titrate down to the daily quantity limit after a one month induction process.

Authorization of Lucemyra:

- Prescriber attests to review of the Delaware Prescription Monitoring Program (PMP)
- Member is undergoing abrupt opioid discontinuation and requires agent to mitigate opioid withdrawal symptoms
- Documentation of trial and failure of or contraindication/intolerance to clonidine tablets or clonidine patch
- Documentation provided that the member is undergoing a comprehensive treatment program for opioid use disorder treatment (not required if the prescriber is Board Certified in Addiction Medicine)

Authorization of non-preferred buprenorphine products:

- Prescriber attests to review of the Delaware Prescription Monitoring Program (PMP)
- Diagnosis of opioid dependence or opioid use disorder
- The member has a documented trial of or contraindication to at least two preferred drugs for opioid dependence

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date: 2/2024

Prior Authorization Group Description	Oxbryta (voxelotor)
Drugs	Oxbryta (voxelotor) tablets, tablets for suspension
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must be a hematologist or sickle cell specialist
Coverage Duration	If the criteria are met, the initial request may be approved for up to a 6-month duration. Reauthorization requests may be approved for 12 months.
Other Criteria	 Member has a confirmed diagnosis of sickle cell disease Baseline labs have been submitted for the following: Hemoglobin (Hb) Indirect bilirubin Reticulocytes If the member is 12 years of age or older documentation was provided that the member has had 1 or more vaso-occlusive/pain crises in the last 12 months Member has a baseline Hb level ≤10.5 g/dL Documentation was provided that the member has been taking hydroxyurea at the maximum tolerated dose and was compliant within the last 6 months as evidenced by paid claims (or a medical reason was provided why the patient is unable to use hydroxyurea) If the request is for Oxbryta tablets for suspension, or Oxbryta 300mg tablets, and member is either 12 years of age or older, or less than 12 years of age and weighs 40 kg or more, there is a documented medical reason why Oxbryta 500mg tablets cannot be used
Revision/Review Date: 2/2024	 Request is for an FDA-approved dose Reauthorization: Documentation of ONE of the following: Hb increase from baseline (at 6 months from initiation) OR maintenance of such Hb increase (at 12-month intervals thereafter)

 Improvement from baseline in hemolytic markers (i.e. decrease in indirect bilirubin, decrease in percentage of reticulocytes)

Field Name	Field Description
Prior Authorization	Palynziq
Group Description	•
Drugs	Palynziq (pegvaliase-pqpz)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	None
Required Medical Information	See "other criteria"
Age Restrictions	None
Prescriber Restrictions	Specialist experienced in the treatment of phenylketonuria (PKU).
	Initial Authorizations: 12 months
	Dose Increases (to 40 mg or 60 mg daily): 16 weeks
Coverage Duration	Reauthorization: 12 months
Other Criteria	 INITIAL AUTHORIZATION: Documentation of a confirmed diagnosis of Phenylketonuria (PKU); AND Documentation the member's blood phenylalanine (Phe) level is greater than 600 micromol/L(include lab results; must be within the past 90 days) Documentation or prescriber attestation that the member has attempted control of PKU through a Phe restricted diet with Phe-free medical products/foods in conjunction with dietician or nutritionist. (Examples include Phenyl-Free [phenylalanine free diet powder], Loplex, Periflex, Phlex-10, PKU 2, PKU 3, XPhe Maxamaid, XPhe Maxamum) Member has previously received sapropterin (Kuvan) and either had an inadequate response, was a non-responder (defined as members who were dosed at 20 mg/kg/day and did not have a decrease in blood Phe level after 1 month), or has a documented medical reason why sapropterin (Kuvan) cannot be used The medication is being prescribed at a dose no greater than the FDA approved maximum initial dose of 20 mg SQ once daily.
	 DOSE INCREASES: Documentation of recent blood Phe level results (within the past 90 days). Confirmation Phe control has not been achieved after adequate timeframe on the current dosing regimen:

- o For requests for a dose of 40 mg per day, the patient has been on 20 mg once daily continuously for at least 24 weeks and has not achieved adequate control
- o For requests for a dose of 60 mg per day, the patient has been on 40 mg once daily continuously for at least 16 weeks and has not achieved adequate control
- The medication is being prescribed at an FDA approved dose (maximum of 60 mg once daily).

REAUTHORIZATION:

- Documentation of recent blood Phe level results (within the previous 90 days); **AND**
- The medication is being prescribed at an FDA approved dose; **AND**
- Member has achieved a reduction in blood phenylalanine concentration from pre-treatment baseline..

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date: 4/2023

Field Name	Field Description
Prior Authorization Group Description	Peanut Allergy Immunotherapy Agents (FDA Approved)
Drugs	Palforzia [Peanut (Arachis hypogaea) Allergen Powder-dnfp] capsule/sachet
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Initiation: Patient is age 4-17 years.
	Up dosing and maintenance: Patient is age ≥ 4 years
Prescriber Restrictions	Prescriber is a specialist in the area of allergy/immunology
Coverage Duration	6 months
Other Criteria	Initial Authorization: Palforzia is approved when all of the following criteria are met: Patient has a confirmed diagnosis of peanut allergy For patients starting initial dose escalation (new to therapy) Patient has not had severe or life-threatening anaphylaxis within the previous 60 days Patient will follow a peanut-avoidant diet Patient has been prescribed and has acquired (as demonstrated by pharmacy claims or documentation) injectable epinephrine No history of eosinophilic esophagitis or other eosinophilic gastrointestinal disease Patient does not have uncontrolled asthma Criteria for Re-Authorization: Palforzia is approved for re-authorization when all of the following criteria are met Patient will follow a peanut-avoidant diet Patient is able to tolerate at least the 3 mg dose daily Patient is able to comply with the daily dosing requirements Patient does not have recurrent asthma exacerbations or persistent loss of asthma control Patient has been prescribed and has acquired (as demonstrated by pharmacy claims or documentation) injectable epinephrine

Revision/Review Date	Medical Director/clinical reviewer must override criteria when,
4/2023	in his/her professional judgement, the requested item is
	medically necessary.

Anti-Parkinson's Agents for OFF Episodes
Nourianz (istradefylline), Inbrija (levodopa) inhalation, apomorphine (Apokyn), Xadago (safinamide), Ongentys (opicapone), or any other newly marketed agent
Medically accepted indications are defined using the following sources: The Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
N/A
See Other Criteria
N/A
Prescriber is a neurologist or is working in consultation with a neurologist
If the criteria are met, the initial requests will be approved for up to a 6 month duration and reauthorization requests will be approved for 12 months.
 Initial Authorization: Diagnosis of Parkinson's disease Patient is currently taking and will continue to take carbidopa/levodopa Patient is experiencing symptom fluctuations or off episodes while taking carbidopa/levodopa where attempts have been made to adjust the carbidopa/levodopa dose and/or formulation in order to manage symptoms without success Documented trial and failure (or contraindication) to at least two of the following adjunctive medication classes:
 Documentation of positive clinical response Dosing is appropriate as per labeling or is supported by compendia or standard of care guidelines Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Treatments for Plasminogen Deficiency Type 1 (PLD1)
Group Description	
Drugs	Ryplazim (human plasma-derived plasminogen)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional (USP
	DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical	See "Other Criteria"
Information	
Age Restrictions	N/A
Prescriber	Prescriber must be a hematologist, medical geneticist, or other
Restrictions	specialist in the treatment of rare blood or genetic disorders
Coverage Duration	If all of the criteria are met, the initial request will be approved for 12
	weeks. Reauthorization requests will be approved for 12 weeks if the
	member has not had a documented positive response to therapy and for
	12 months if the member has had a documented positive response to
	therapy.
Other Criteria	Initial Authorization
	 Member must have a diagnosis of PLD1 (i.e.
	hypoplasminogenemia)
	 Member must have a documented history of lesions or other
	symptoms consistent with the diagnosis (e.g. ligneous
	conjunctivitis, oral, respiratory, gastrointestinal, urogenital,
	integumentary, or central nervous system manifestations)
	 Member must have baseline plasminogen activity levels ≤ 45%
	 If the member received plasminogen supplementation with
	fresh frozen plasma, prescriber attests that a 7-day washout
	period was performed before obtaining baseline
	plasminogen activity levels.
	 The request is for an FDA approved dose
	Reauthorization
	ONE of the following is true:
	Member has a documented positive response to therapy
	(e.g. reduction in number or size of lesions, no new or
	recurring lesions)
	o Member has not had a documented positive response to
	therapy and ONE of the following:
	 If confirmed plasminogen activity levels are ≥ 10%
	above baseline, then appropriate dosing frequency
	adjustments must be made.
	■ If confirmed plasminogen activity levels are < 10%
	above baseline, then appropriate dosing frequency

	adjustments must be made AND the prescriber must provide a medical justification as to why therapy should be continued. • The request is for an FDA approved dose
Revision/Review Date 4/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	Proprotein Convertase Subtilisin/kexin 9 (PCSK9) Monoclonal Antibodies (mAbs)
Group Description Drugs	Preferred: Repatha (evolocumab), Praluent (alirocumab)
Drugs	Non-preferred: Legvio (inclisiran), Any PCSK9 inhibitor new to market
Covered Uses	Medically accepted indications are defined using the following sources: the Food
covered oses	and Drug Administration (FDA), Micromedex, American Hospital Formulary
	Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare
	Professional (USP DI), the Drug Package Insert (PPI), or disease state specific
	standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	See "Other Criteria"
Prescriber Restrictions	Prescriber must be cardiologist or specialist in treatment of lipid disorders
Coverage Duration	If the criteria are met, the initial request will be approved for up to a 3 month duration, and the reauthorization request will be approved for up to a 12 month duration;
Other Criteria	Initial Authorization
	For All Requests:
	 Request is appropriate for member (e.g. age) as indicated in package labeling or standard of care guidelines
	• Patient has tried and failed atorvastatin 40mg-80mg or rosuvastatin 20-40mg (consistently for 3 months via claim history or chart notes). If patient is not able to tolerate atorvastatin or rosuvastatin, documentation was provided that patient is taking another statin at the highest tolerated dose, or a medical reason was provided why the member is not able to use these therapies.
	• If prescriber indicates member is "statin intolerant", documentation was provided including description of the side effects, duration of therapy, "wash out", re-trial, and then change of agents.
	 Documentation was provided indicating provider has counseled member on smoking cessation and following a "heart healthy diet".
	• If the request is for a non-preferred agent, documentation was provided of trial and failure, or a medical reason has been provided, why member is unable to use the preferred agent to manage their condition
	AND the member meets the following for the respective diagnosis:
	Familial Hypercholesterolemia (FH):
	 Member has a diagnosis of familial hypercholesterolemia as evidenced by one of the following:
	 Documentation provided including two fasting lipid panel lab reports with abnormal low density lipoprotein (LDL) levels ≥190 for FH in adults or ≥160 for FH in children.

- Results of positive genetic testing for an LDL-C-raising gene defect (LDL receptor, apoB, or PCSK9)
- Additionally, if the diagnosis is heterozygous FH (HeFH), both of the following:
 - Patient has tried and failed ezetimibe at a maximal tolerated dose or documentation has been provided that the patient is not able to tolerate ezetimibe.
 - LDL remains ≥100 mg/dL despite maximally tolerated LDL-lowering therapy

<u>Hyperlipidemia (Primary OR Secondary Atherosclerotic Cardiovascular Disease [ASCVD] Prevention)</u>

- If the diagnosis is primary severe hyperlipidemia (i.e. LDL ≥190 mg/dL)
 - o LDL remains ≥ 100 mg/dL despite maximally tolerated LDL-lowering therapy
- If the diagnosis is secondary ASCVD prevention
 - o Patient has tried and failed ezetimibe at a maximal tolerated dose or documentation has been provided that the patient is not able to tolerate ezetimibe.
 - o LDL remains ≥ 55 mg/dL or non-HDL (i.e. total cholesterol minus HDL) ≥ 85 mg/dL despite maximally tolerated LDL-lowering therapy
 - o And ONE of the following:
 - Documented history of multiple major ASCVD events (acute coronary syndrome within past 12 months, history of myocardial infarction, history of ischemic stroke, symptomatic peripheral artery disease)
 - Documented history of 1 major ASCVD event (acute coronary syndrome within past 12 months, history of myocardial infarction, history of ischemic stroke, symptomatic peripheral artery disease) AND multiple high-risk conditions (age ≥ 65 years, history of coronary artery bypass graft or percutaneous coronary intervention, diabetes mellitus, hypertension, chronic kidney disease, current smoker, or congestive heart failure)

Reauthorization for all indications:

- Documentation submitted indicates that the member has obtained clinical benefit from the medication including repeat fasting lipid panel lab report, and the member has had a reduction in LDL from baseline
- The patient's claim history shows consistent therapy (i.e. monthly fills)

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Revision/Review Date 4/2023

Prior Authorization Group Description	Potassium-removing agents
Drugs	 Preferred Lokelma (sodium zirconium cyclosilicate) Non-preferred Veltassa (patiromer)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Patient is 18 years of age or older
Prescriber Restrictions	Prescriber is a cardiologist or nephrologist or is working in consultation with one of these specialists
Coverage Duration	If the criteria are met, the request will be approved for up to 3 months for initial requests and up to 6 months for renewal requests.
	Lokelma will pay at point-of-sale and is not subject to prior authorization
Other Criteria	 Initial Authorization Diagnosis of hyperkalemia Documentation patient has been counseled to follow a low potassium diet Where clinically appropriate, documentation of medications known to cause hyperkalemia (e.g. angiotensin-converting enzyme inhibitor, angiotensin II receptor blocker, aldosterone antagonist, NSAIDs) have been discontinued or decreased to lowest effective dose
Revision/Review Date: 1/2024	 Re-Authorization Documentation that demonstrates member is receiving clinical benefit from treatment (e.g. potassium level returned to normal or significant decrease from baseline). Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Proton Pump Inhibitors (PPIs)
Group Description	 Preferred omeprazole capsule (Rx) pantoprazole tablet Protonix (pantoprazole) packet for oral solution (for members age 10 and younger)
Drugs	Non-Preferred (Require PA)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved with for up to 12 months.
Other Criteria	 Initial Authorization Presumed or documented diagnosis of peptic ulcer disease, H. pylori infection, gastritis, gastroesophageal reflux disease (GERD), erosive esophagitis, Barrett's esophagus or hypersecretory disease including Zollinger-Ellison syndrome. Non-preferred drugs require a documented trial and failure of, or medical reason for not using, two preferred drugs for a minimum of 3 weeks of therapy EACH within the last 120 days. For requests for liquid dosage forms in members over 10 years of age, documentation as to why the member is unable to use a solid dosage form.
Revision/Review Date: 2/2024	Doses Greater Than Once Daily After Meeting Criteria For PPI:

• Confirmed diagnosis of GERD, erosive esophagitis, *H. pylori* infection, peptic ulcer disease, or hypersecretory disease (e.g. Zollinger-Ellison syndrome).

OR

• Evaluation made by gastroenterologist and / or otolaryngologist recommending higher doses of PPI.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Primary Hyperoxaluria Agents
Group Description	
Drugs	Oxlumo (lumasiran)
	Rivfloza (nedosiran)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber	Prescriber must be a nephrologist, urologist, hepatologist,
Restrictions	endocrinologist or consultation with one of these specialists
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6
	months. For continuation of therapy, the request will be approved for
	12 months. If the conditions are not met, the request will be sent to a
	Medical Director/clinical reviewer for medical necessity review.
Other Criteria	<u>Initial Authorization</u>
	 Diagnosis of primary hyperoxaluria type 1 (PH1) confirmed by one of the following: Genetic testing confirming at least one mutation at the AGXT gene Liver biopsy demonstrating absent or significantly reduced AGT activity Metabolic testing demonstrating one of the following: Oxlumo or Rivfloza Increased urinary oxalate excretion (≥ 0.5 mmol/1.73 m²per day[45 mg/1.73 m²per day]) Increased urinary oxalate:creatinine ratio relative to normative values for age Oxlumo only: Increased plasma oxalate level (≥ 20 μmol/L) For Rivfloza: member has relatively preserved kidney function (e.g., EGFR ≥ 30 mL/min/1.73 m2) Member is concurrently using pyridoxine or has tried and failed previous pyridoxine therapy for at least 3 months, or has a medical reason for not using pyridoxine Member has no history of liver transplant Medication is prescribed at an FDA approved dose Patient is not using Oxlumo and Rivfloza concurrently

Reauthorization
Members r

Revision/Review
Date 2/2024

- Members previously using pyridoxine will continue to use pyridoxine, or have a medical reason for not using pyridoxine
- Documentation has been provided that demonstrates a clinical benefit (e.g. symptomatic improvement, reduction in urinary or plasma oxalate levels from baseline)
- Medication is prescribed at an FDA approved dose
- Patient is not using Oxlumo and Rivfloza concurrently

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Vasodilators for Pulmonary Arterial Hypertension (PAH)
Group Description	Preferred products:
	ambrisentan tablets
	bosentan tablets
	sildenafil tablets
	tadalafil tablets
	Ventavis (iloprost)
	ventavis (noprost)
	Non-preferred products:
	Revatio suspension *BRAND*
	Adcirca (tadalafil)
	Adempas (riociguat)
	Opsumit (macitentan)
Drugs	Orenitram ER (treprostinil diolamine)
	Tracleer (bosentan) tablets, tablets for suspension
	Tyvaso, Tyvaso DPI (treprostinil)
	Uptravi (selexipag)
	Tadliq (tadalafil) oral suspension
	Ligrev (sildenafil)
	sildenafil suspension
	Any other newly marketed PAH treatment agent
	Tarry other newly marketed that deathers agent
	Non-formulary products:
	epoprostenol (Flolan/Veletri)
	treprostinil sodium (Remodulin)
	Medically accepted indications are defined using the following sources: the
	Food and Drug Administration (FDA), Micromedex, American Hospital
Covered Uses	Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare
	Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care
5 L : 0 :: :	guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by, or in consultation with, a pulmonologist or cardiologist
Trescriber Restrictions	
	Orenitram, Tyvaso, Tyvaso DPI, Adempas, or Ventavis: 3 months for initial request
	Uptravi: Request will be approved for the titration pack for 28 days until the highest tolerated dose (maintenance dose) is achieved. Once the member has achieved maintenance dosing,
Coverage Duration	further refills can be approved for a 6 month duration.
	For all others: 6 months
	All refill requests will be approved for 6 months
Other Criteria	Initial Authorization:
	Member has a confirmed diagnosis that is indicated in the FDA approved package insert or
	has other medically-accepted use
	• If the diagnosis is PAH (WHO Group 1) Functional Class (FC) I-III, documentation of the

member's acute vasoreactivity testing is provided and ONE of the following:

- o If the results of the acute vasoreactivity testing are favorable (defined as a fall in mean pulmonary arterial pressure [PAPm] of at least 10 mm Hg to ≤ 40 mm Hg with an increased or unchanged cardiac output), then documentation that is provided that the disease has progressed despite maximal medical treatment with a calcium channel blocker
- O Documentation has been provided of medical reason why patient is not able to use a calcium channel blocker.
- For Uptravi, Orenitram, Tyvaso, Tyvaso DPI, Ventavis, Remodulin, Adempas, ONE of the following:
 - O Documented trial and failure of one PDE-5 inhibitor (e.g. sildenafil, tadalafil) AND one Endothelin Receptor Antagonist (e.g. ambrisentan, bosentan)
 - O Diagnosis of WHO Group 1 FC III with evidence of rapid disease progression or FC IV (Uptravi, Orenitram, Tyvaso, Tyvaso DPI, Ventavis, Remodulin ONLY)
 - Diagnosis of Chronic Thromboembolic Pulmonary Hypertension (CTEPH) WHO Group 4 and recurrent/persistent CTEPH after surgical treatment or inoperable CTEPH (Adempas ONLY)
 - o Diagnosis of PH-ILD WHO Group 3 (Tyvaso ONLY)
- If the request is for Opsumit the patient must have a documented trial and failure or intolerance to ambrisentan and bosentan, or a medical reason was provided why these therapies are not appropriate for the patient.
- If the request is for a non-preferred drug, member has a documented treatment failure with at least two of the preferred drugs OR has a documented medical reason (intolerance, hypersensitivity, contraindication, etc.) why they are not able to use preferred drugs.
- If the provider is requesting combination therapy:
 - o A PDE-5 inhibitor and an ERA are requested as the combination OR
 - O Documentation, or a medical reason, must be submitted as to why patient is unable to be treated with existing therapy (e.g. worsening of dyspnea or fatigue, decline in functional class by at least one class or in 6-minute walk test (6MWD) by greater than 30 minutes)
- Documentation of the patient's current weight, dosing, and titration schedule is provided (as applicable)
- The medication is prescribed at a dose that is within FDA-approved guidelines.

Revision/Review Date: 2/2024

Re-authorization:

- Documentation has been submitted indicating the clinical benefit of therapy (e.g. improvement in functional class, improvement in 6-minute walk test, exercise capacity, or hemodynamics).
- If dosing is being increased, documentation of the medical necessity to increase the dosage is provided.
- Documentation of the patient's current weight, dosing, and titration schedule is provided (as applicable). The medication is being prescribed at a dose that is within FDA approved guidelines.

If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Pyruvate Kinase Activators
Group Description	
Drugs	Pyrukynd (mitapivat)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Age ≥18 years
Prescriber Restrictions	Prescribed by or in consultation with a hematologist
Coverage Duration	If the conditions are met, the request will be approved for a 6-month duration for initial requests and a 6-month duration for renewal requests. **If the conditions are not met: may approve up to 14 days of a Pyrukynd Taper Pack to allow for discontinuation tapering
Other Criteria	 Initial Authorization: The prescribed dose is within FDA approved dosing guidelines Diagnosis of hemolytic anemia with pyruvate kinase deficiency (PKD) Documentation of at least two variant alleles in the pyruvate kinase liver and red blood cell (PKLR) gene, of which at least one is a missense variant Documentation that the member is not homozygous for the R479H variant Documentation that the member does not have two nonmissense variants of the PKLR gene, without the presence of another missense variant in the PKLR gene Documentation of ONE of the following: The member does not regularly require blood transfusions (defined as requiring less than or equal to 3 red blood cell (RBC) transfusions in the past 52 weeks and no transfusions in the past 3 months) AND hemoglobin (Hb) level ≤ 10 g/dL The member has required more than or equal to 6 RBC transfusions in the past 12 months Documentation of the number of transfusions and the number of red blood cell (RBC) units

- Prescriber attests that the member does not have moderate or severe hepatic dysfunction
- Prescriber attests that the member has not had a splenectomy in the past 12 months
- Prescriber attests that the member does not have a history of a prior bone marrow or stem cell transplant
- The member is not concurrently using hematopoieticstimulating agents (e.g. Procrit or Retacrit)
- Prescriber attests the member is taking at least 0.8mg of folic acid daily

Reauthorization:

- The prescribed dose is within FDA approved dosing guidelines
- For the first reauthorization, documentation of benefit: increase in Hb ≥1.5 g/dL over baseline OR a reduction in transfusions, defined as ≥33% reduction in the number of red blood cell (RBC) units transfused over baseline
- For subsequent reauthorizations: documentation of benefit: stabilization in Hb levels OR a sustained reduction in transfusions
- If the reauthorization criteria are not met, may authorize up to 14 days of a Pyrukynd Taper Pack to allow for tapering. To reduce the risk of acute hemolysis, abrupt discontinuation of Pyrukynd should be avoided.

Revision/Review Date: 7/2023

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Qalsody (tofersen)
Drugs	Qalsody (tofersen)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	See "Other Criteria"
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with a neurologist, neuromuscular specialist, or physician specializing in the treatment of amyotrophic lateral sclerosis (ALS)
Coverage Duration	If all the criteria are met, initial and renewal requests will be approved for 6 months
Other Criteria	 Initial Authorization: Diagnosis of ALS Documentation of genetic test confirming a mutation in the superoxide dismutase 1 (SOD1) gene Member is not dependent on invasive ventilation or tracheostomy Documentation of slow vital capacity (SVC) ≥ 50% Medication is prescribed at an FDA approved dose Re-Authorization: Documentation or provider attestation of positive clinical response (e.g., reduction in the mean concentration of neurofilament light [NfL] chains in the plasma, reduction in concentration of SOD1 in cerebrospinal fluid (CSF), or improvement in the Revised ALS Functional Rating Scale (ALSFRS-R) total score) Member is not dependent on invasive ventilation or tracheostomy Medication is prescribed at an FDA approved dose
Review/Revision Date: 7/2023	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Radicava
Group Description	
Drugs	Radicava, Radivaca ORS (edaravone)
	and any other newly marketed agent
	*** "!!- (D'!!-) '- Do-f ! !
	*** riluzole (Rilutek) is Preferred and does not require prior authorization***
Covered Uses	Medically accepted indications are defined using the following
Covered Oses	sources: the Food and Drug Administration (FDA), Micromedex, the
	Drug Package Insert, and/or per the standard of care guidelines
Exclusion Criteria	N/A
Required Medical	
Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	Prescriber must be a neurologist
Coverage Duration	If the criteria are met, requests will be approved for up to 6 month
	duration
Other Criteria	Initial Authorization:
	 Member must have a diagnosis of ALS
	Member must have a documented baseline evaluation of
	functionality using the revised ALS functional rating scale
	$(ALSFRS-R)$ score ≥ 2
	Member's disease duration is 2 years or less
	 Member has a baseline forced vital capacity (FVC) of ≥ 80%
	Member has been on riluzole (Rilutek), is beginning
	therapy as an adjunct to treatment with Radicava, or
	provider has provided a medical reason why patient is
	unable to use riluzole
	Dose is within FDA approved limits
	Reauthorization:
	Member is not ventilator-dependent
	Provider documents clinical stabilization in symptoms (e.g.
	stabilization of ALSFRS-R score)
	Dose is within FDA approved limits
Revision/Review Date	
4/2023	Medical Director/clinical reviewer must override criteria when,
	in his/her professional judgement, the requested item is medically
	necessary.

Prior Authorization	Reblozyl (luspatercept-aamt)
Group Description Drugs	Reblozyl (luspatercept-aamt) vial for subcutaneous injection
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Members are excluded if they have hemoglobin S/beta-thalassemia, isolated alpha-thalassemia.
Required Medical Information	See "other criteria"
Age Restrictions	Member must be 18 years of age or older
Prescriber Restrictions	Prescriber must be a hematologist or oncologist
Coverage Duration	Initial requests will be approved for 3 months. Reauthorization requests will be approved for 6 months.
Other Criteria	 Criteria for initial approval: Requested dose is appropriate per labeling The member's weight has been provided with the request The member's most recent hemoglobin level (within the last month) has been provided with the request Diagnosis appropriate per Covered Uses For requests for anemia due to beta thalassemia, documentation of all of the following is required: Member requires regular RBC transfusions (defined as no transfusion-free period of more than 35 days over the last 6 months) For requests for anemia due to myelodysplastic syndrome, documentation of all of the following is required: Myelodysplastic Syndrome Revised International Prognostic Scoring System (IPSS-R) categorization as very low, low, or intermediate risk of progression. Member has required transfusion of 2 or more red blood cell (RBC) units within an 8 week period in the last 4 months Hemoglobin less than 10 g/dl Reauthorization: For diagnosis of anemia due to beta thalassemia, documentation of the following: Fewer transfusions compared with baseline AND A reduction in transfusion requirement of at least 2 red-cell units compared with baseline
	 Diagnosis of anemia due to myelodysplastic syndrome: documentation of ONE of the following:

	o Hemoglobin increase of at least 1.5 g/dl from baseline over a
	period of 8-12 weeks
	OR
	o Reduction in red blood cell transfusion by at least 4 units
Revision/Review	over a period of 8-12 weeks compared with baseline
Date: 12/2023	transfusion requirement
	• Prescriber states that the member did not experience a Grade 3 or 4
	hypersensitivity reaction.
	If the above conditions are not met, the request will be referred to a Medical Director for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Relyvrio (sodium phenylbutyrate and taurursodiol)
Drugs	Relyvrio (sodium phenylbutyrate and taurursodiol)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	See "Other Criteria"
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with a neurologist, neuromuscular specialist, or physician specializing in the treatment of amyotrophic lateral sclerosis (ALS)
Coverage Duration	If all the criteria are met, initial and renewal requests will be approved for 6 months
Other Criteria	Initial Authorization:
	Medication is prescribed at an FDA approved dose
	Diagnosis of ALS with onset of symptoms within the previous 18 months
	 Member is not dependent on invasive ventilation or tracheostomy Documentation of slow vital capacity (SVC) > 60%
	Re-Authorization:
	Documentation or provider attestation of positive clinical response (such as stabilization or slowing of progression in the Revised ALS Functional Rating Scale (ALSFRS-R) total score)
	Member is not dependent on invasive ventilation or tracheostomy
Review/Revision	Medication is prescribed at an FDA approved dose
Date: 2/2024	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Prior Authorization Group Description	Oral Retinoids
Drugs	Preferred: Isotretinoin Claravis (isotretinoin) Myorisan (isotretinoin) Zenatane (isotretinoin) Amnesteem (isotretinoin) Non-Preferred: Absorica (isotretinoin) Absorica LD (isotretinoin) Or any newly marketed oral retinoid product
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	N/A
Coverage Duration	If the criteria are met, the request will be approved with up to a 6 month duration.
Other Criteria	 Initial Authorization Diagnosis of moderate to severe recalcitrant nodular acne AND Documented treatment with a therapeutic trial and failure or intolerance to one or more first line topical therapies (e.g. topical antibiotics or topical retinoids) IN COMBINATION WITH one or more first line oral therapies (e.g. doxycycline, tetracycline, or minocycline) for at least 4 weeks (28 days) of therapy of each drug in the previous 180 days. If the request is for a non-preferred drug, documentation has been provided that the member has tried and failed two preferred drugs or has a medical reason why these drugs cannot be used
Revision/Review Date: 10/2023	 Re-Authorization Prescriber attests the member has experienced clinical benefit from therapy (e.g. perceived improvement of acne) and

continued treatment with, or retreatment with, isotretinoin is necessary
Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Pompe Disease Agents
Group Description	Lumizyme (alglucosidase alfa)
Drugs	Nexviazyme (avalglucosidase alfa-ngpt) injection
	Pombiliti (cipaglucosidase alfa-atga) + Opfolda (miglustat)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to FDA approved prescribing information
Prescriber Restrictions	Prescribed by, or in consultation with, a specialist in the treatment of Pompe disease, such as a genetic or metabolic specialist, neurologist, cardiologist, or pediatrician.
Coverage Duration	If all of the criteria are met, the request will be approved for 12 months.
Other Criteria	Initial Authorization: For infantile onset Pompe Disease (Lumizyme only): Patient has a diagnosis of infantile-onset Pompe Disease, confirmed by one of the following: Enzyme assay showing a deficiency of acid alphaglucosidase (GAA) activity in the blood, skin, or muscle Genetic testing showing a mutation in the GAA gene Requested dose is appropriate per prescribing information (documentation of patient weight must be submitted with request) Requested regimen will not be used in combination with other enzyme replacement therapies For late onset Pompe Disease (Lumizyme, Nexviazyme, or Pombiliti + Opfolda): Patient has a diagnosis of late-onset (non-infantile) Pompe Disease, confirmed by one of the following: Enzyme assay showing a deficiency of acid alphaglucosidase (GAA) activity in the blood, skin, or muscle Genetic testing showing a mutation in the GAA gene Documentation patient has measurable signs or symptoms of Pompe disease Results of a baseline 6-minute walk test (6MWT) and percent-predicted forced vital capacity (FVC) are provided (not required for patients who are not old enough to walk)

- Requested dose is appropriate per prescribing information (documentation of patient weight must be submitted with request)
- Requested regimen will not be used in combination with other enzyme replacement therapies (Exception: Pombiliti + Opfolda are to be used together)
- Additionally for Nexviazyme: Patients < 30 kg must provide documentation of a trial and therapy failure of, or a medical reason why Lumizyme may not be used.
- Additionally for Pombiliti + Opfolda: Patient must have trial and failure of another enzyme therapy (Lumizyme or Nexviazyme)

Re-Authorization:

- Documentation or provider attestation of positive clinical response to therapy
 - o Infantile onset: provider attestation of member benefit
 - Late onset: improvement, stabilization, or slowing of progression of percent-predicted FVC and/or 6MWT
- Requested dose is appropriate per prescribing information (documentation of patient weight must be submitted with request)
- Requested regimen will not be used in combination with other enzyme replacement therapies (Exception: Pombiliti + Opfolda are to be used together)

Revision/Review Date: 2/2024

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	Retinoic Acid Derivatives
Drugs	Preferred Agents: (will pay at POS for member ≤ 30 years of age) • adapalene/benzoyl peroxide 0.1-2.5% gel • tretinoin 0.01%, 0.025% gel • tretinoin 0.025%, 0.05%, 0.1% cream Non-Preferred Agents • adapalene (Differin) • Aklief (trifarotene) cream • Altreno (tretinoin) lotion • Arazlo (tazarotene) lotion • clindamycin/tretinoin (Veltin, Ziana) gel • adapalene/benzoyl peroxide (EpiDuo Forte) 0.3%-2.5% gel • tazarotene (Fabior) foam • tazarotene (Tazorac) cream • tazarotene (Tazorac) gel • tretinoin 0.05% gel • tretinoin microspheres (Retin-A Micro) gel
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Requests for cosmetic use such as fine wrinkles, mottled hyperpigmentation, or facial skin roughness are excluded from coverage.
Required Medical Information	N/A
Age Restrictions	9 to 30 years of age
Prescriber Restrictions	Limited to providers with an appropriate scope of practice
Coverage Duration	If the criteria are met, the request will be approved for a maximum of 50 g/30 days for 12 months.
Other Criteria Revision/Review Date: 2/2024	 Requests for members > 30 years of age: Diagnosis of acne vulgaris or non-cosmetic, medically-accepted condition Additional criteria for Non-Preferred Agents: Diagnosis of acne vulgaris or non-cosmetic, medically-accepted condition For acne, documented trial and failure of, or intolerance to, two preferred topical acne medications. One of the two products must be a preferred retinoic acid derivative product For other medically accepted conditions, documented trial and failure of, or intolerance to, one preferred topical medication If the criteria are not met, the request will be referred to a clinical reviewer for medical necessity review.

Rituximab

Drugs:

Rituxan (rituximab)

Rituxan Hycela (rituximab/hyaluronidase human, recombinant)

Truxima (rituximab-abbs)

Ruxience (rituximab-pvvr)

Riabni (rituximab-arrx)

RITUXIMAB WILL BE APPROVED IF THE FOLLOWING PRIOR AUTHORIZATION CRITERIA IS MET:

MULTIPLE SCLEROSIS:

• Refer to the "Healthcare Professional (HCP) administered/IV Disease Modifying Therapies (DMTs) for Multiple Sclerosis (MS)" policy

NEUORMYELITIS OPTICA SPECTRUM DISORDER (NMOSD):

• Refer to the "Neuromyelitis Optica Spectrum Disorder (NMOSD) Agents" policy

RHEUMATOID ARTHRITIS:

- The medication is being recommended and prescribed by a rheumatologist.
- The patient is an adult (≥18 y/o) and has a documented clinical diagnosis of rheumatoid arthritis.
- The patient has a documented (consistent with pharmacy claims data, OR for new members to the health plan consistent with medical chart history) adequate trial (including dates and doses) of 3 months or more of therapy with one conventional (non-biologic) DMARD (e.g. methotrexate, leflunomide, sulfasalazine, hydroxychloroquine) or has a documented medical reason (e.g. intolerance, hypersensitivity) for not utilizing any of these therapies to manage their medical condition.
- The patient has a documented (consistent with pharmacy claims data, OR for new members to the health plan consistent with medical chart history) adequate trial (including dates, doses) of 2 preferred biologics indicated for rheumatoid arthritis, or has documented medical reason (intolerance, hypersensitivity, etc.) for not taking the preferred therapies to manage their medical condition.
- Documentation indicating that rituximab is being used concurrently with methotrexate, or a medical reason why methotrexate cannot be used

- Documentation indicating that the patient has been screened for Hepatitis B Virus (HBV) prior to initiation of treatment.
- Rituximab is being prescribed at an FDA approved dosage.
- If the request is for any medication other than Ruxience(rituximab-pvvr), or Riabni (rituximab-arrx), there is a documented trial and failure of Ruxience (rituximab-pvvr), or medical reason why (e.g. intolerance, hypersensitivity, contraindication) they cannot be used.

If all of the above conditions are met, the request will be approved for up to a 1 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

Reauthorization

- The member has been receiving rituximab and documentation is provided that a rheumatologist has reevaluated the member and recommends continuation of therapy.
- Documentation was provided indicating that the patient had clinical benefit from receiving rituximab therapy.
- At least 16 weeks (4 months) has elapsed since the previous course of rituximab therapy.
- Documentation indicating that rituximab is being used concurrently with methotrexate, or a medical reason why methotrexate cannot be used.
- Rituximab is being prescribed at an FDA approved dosage.

If all of the above conditions are met, the request will be approved for up to a 1 year duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

PEMPHIGUS VULGARIS

- The medication is being recommended and prescribed by a rheumatologist or dermatologist
- The patient is ≥ 18 years with a diagnosis of moderate to severe pemphigus vulgaris
- Documentation the patient will be receiving P. jirovecii pneumonia (PJP) prophylaxis (ex. TMP/SMX, dapsone, atovaquone) or the prescriber has provided a medical reason for not prescribing PJP prophylaxis
- Documentation indicating that the patient has been screened for HBV prior to initiation

of treatment

- Rituximab is being prescribed at an FDA approved dose/frequency
- Rituximab is being used in combination with a tapering course of glucocorticoids

If all of the above conditions are met, the request will be approved for up to a 1 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

Reauthorization

- Documentation of clinical benefits (e.g., absence of new lesions) with rituximab therapy was provided by a rheumatologist or dermatologist
- Documentation the patient will continue to receive PJP prophylaxis (ex. TMP/SMX, dapsone, atovaquone) or the prescriber has provided a medical reason for not prescribing PJP prophylaxis
- Rituximab is being prescribed at an FDA approved dose/frequency

If all of the above conditions are met, the request will be approved for up to a 1 year duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

ONCOLOGY INDICATIONS

- The medication is being recommended and prescribed by an oncologist.
- The medication is being requested for a labeled indication or the an indication supported by a NCCN category 1 or 2A level of evidence
- Documentation of CD20 positive disease
- Documentation indicating that the patient has been screened for HBV prior to initiation of treatment.
- Rituximab is being prescribed at a dose that is within FDA approved guidelines and/or is supported by the medical compendium as defined by the Social Security Act and/or the National Comprehensive Cancer Network (NCCN) or American Society of Clinical Oncology (ASCO) standard of care guidelines.
- If the request is for any medication other than Ruxience (rituximab-pvvr) there is a documented trial and failure of Ruxience (rituximab-pvvr), or medical reason why (e.g. intolerance, hypersensitivity, contraindication) Ruxience (rituximab-pvvr) cannot be used.
- If the request is for Rituxan Hycela (rituximab/hyaluronidase human, recombinant),

- o the patient has received at least one full dose of a rituximab product by intravenous infusion,
- o the medication is being requested for a malignant condition, and
- o there is a medical reason why the alternative rituximab product cannot be continued

If all of the above conditions are met, the request will be approved for up to a 3 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

Reauthorization

- The medication is being recommended and prescribed by an oncologist.
- Rituximab is being prescribed at a dose that is within FDA approved guidelines and/or is supported by the medical compendium as defined by the Social Security Act and/or per the NCCN or ASCO standard of care guidelines.

If all of the above conditions are met, the request will be approved for up to a 3 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

GRANULOMATOSIS WITH POLYANGIITIS (GPA) (WEGENER'S GRANULOMATOSIS) AND MICROSCOPIC POLYANGIITIS (MPA):

- The medication is being recommended and prescribed by a rheumatologist or nephrologist.
- The patient is 2 years of age or older and has a documented clinical diagnosis of GPA (Wegener's Granulomatosis), eosinophilic granulomatosis with polyangiitis (EGPA), or MPA AND the prescriber indicates whether there is severe or non-severe disease.
- For non-severe disease, the patient has a documented (consistent with pharmacy claims data, OR for new members to the health plan consistent with medical chart history) adequate trial of three months (including dates, doses) of glucocorticoid (i.e. prednisone) AND methotrexate or documentation includes a medical reason (intolerance, hypersensitivity, etc.) why patient is not able to use these therapies to manage their medical condition.
- For severe disease, a trial of glucocorticoid and methotrexate is not required
- Documentation indicating that rituximab is being used concurrently with glucocorticoids.

- Documentation the patient will be receiving PJP prophylaxis (ex. TMP/SMX, dapsone, atovaquone) during treatment or the prescriber has provided a medical reason for not prescribing PJP prophylaxis
- Documentation indicating that the patient has been screened for HBV prior to initiation of treatment.
- Rituximab is being prescribed at an FDA approved dosage.
- If the patient is 18 years of age or older, and the request is for any medication other than Ruxience (rituximab-pvvr) or Riabni (rituximab-arrx), there is a documented trial and failure of Ruxience (rituximab-pvvr) or Riabni, or medical reason why (e.g. intolerance, hypersensitivity, contraindication) they cannot be used.

If all of the above conditions are met, the request will be approved for up to a 1 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

Re-authorization:

- The medication is being recommended and prescribed by a rheumatologist or nephrologist.
- Documentation the patient will continue to receive PJP prophylaxis (ex. TMP/SMX, dapsone, atovaquone) or the prescriber has provided a medical reason for not prescribing PJP prophylaxis
- Rituximab is being prescribed at an FDA approved dose.

If all of the above conditions are met, the request will be approved for up to a 1 year duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

DERMATOMYOSITIS (DM) and POLYMYOSITIS (PM)

- Rituximab is being recommended and prescribed by a neurologist, rheumatologist, or dermatologist.
- Patient meets one of the following:
 - o Bohan and Peter score indicating definite DM or PM
 - o Bohan and Peter score indicating probable DM or PM AND concurring diagnostic evaluation by ≥ 1 specialist (e.g. neurologist, rheumatologist, dermatologist)
- Patient does NOT have cancer associated myositis defined as myositis within 2 years of cancer diagnosis (except basal or squamous cell skin cancer or carcinoma in situ of the cervix that has been excised and cured)

- One of the following:
 - o Patient has a documented trial and failure of, or has a documented medical reason for not using methotrexate (MTX) OR azathioprine
 - o Patient has severe, life-threatening weakness or dysphagia
- Rituximab is prescribed at a dose per the medical compendia (Micromedex, American Hospital Formulary Service (AHFS), DrugPoints, the Drug Package Insert as defined in the Social Security Act and/or per the American Academy of Pediatrics (AAP) standard of care guidelines and has a Class I or IIa recommendation).
- If the request is for any medication other than Ruxience (rituximab-pvvr) there is a documented trial and failure of Ruxience (rituximab-pvvr), or medical reason why (e.g. intolerance, hypersensitivity, contraindication) Ruxience (rituximab-pvvr) cannot be used.

If all of the above conditions are met, the request will be approved for up to a 1 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

Re-authorization:

- Rituximab is being recommended and prescribed by a neurologist, rheumatologist, or dermatologist.
- Documentation was provided indicating that the patient had clinical benefit from receiving rituximab therapy.
- Rituximab is prescribed at a medically accepted dose per the medical compendia.

If all of the above conditions are met, the request will be approved for up to a 3 month duration; if all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

OTHER MEDICALLY ACCEPTED INDICATIONS

- The medication is prescribed for a non-FDA approved indication but is considered to be a
 medically accepted use of the medication per the medical compendia (Micromedex,
 American Hospital Formulary Service (AHFS), DrugPoints, the Drug Package Insert as
 defined in the Social Security Act and/or per the American Academy of Pediatrics (AAP)
 standard of care guidelines and has a Class I or IIa recommendation.
- The medication is prescribed at a medically accepted dose per the medical compendia as defined above.
- The medication is recommended and prescribed a specialist in the field to treat the member's respective medical condition.
- Documentation indicating that the patient has been screened for HBV prior to initiation

of treatment.

- Documentation was submitted indicating that the member has a documented (consistent with pharmacy claims data, OR for new members to the health plan consistent with medical chart history) adequate trial (including dates, doses of medications) of ALL first line medical therapies as recommended by the medical compendia and standard care guidelines and/or has another documented medical reason (e.g. intolerance, contraindications, etc.) for not receiving or trying all first line medical treatment(s).
- If the request is for any medication other than Ruxience (rituximab-pvvr), there is a documented trial and failure of Ruxience (rituximab-pvvr), or medical reason why (e.g. intolerance, hypersensitivity, contraindication) Ruxience (rituximab-pvvr) cannot be used.

If all of the above conditions are met, the request will be approved for up to a 3 month duration. If all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

Re-authorization:

- The medication is prescribed at a medically accepted dose per the medical compendia
- The medication is recommended and prescribed a specialist in the field to treat the member's respective medical condition.
- Documentation from medical chart was submitted indicating that the member has significantly clinically benefited from the medication.

If all of the above conditions are met, the request will be approved for up to a 3 month duration. If all of the above criteria are not met, the request is referred to a Medical Director/clinical reviewer for medical necessity review.

NOTE: Physician/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date: 7/2023

Field Name	Field Description
Prior Authorization	Destarion
Group Description	Roctavian
Drugs	Roctavian (valoctocogene roxaparvovec-rvox)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Prior use of gene therapy for Hemophilia A
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be 18 years of age and older
Prescriber	Proscriber must be a hometologist
Restrictions	Prescriber must be a hematologist
Coverage Duration	If all of the criteria are met, the initial request will be approved for a one-time treatment.
	Initial Authorization:
Other Criteria	 Diagnosis of severe hemophilia A (congenital factor VIII deficiency with factor VIII activity < 1 IU/dL) Documentation of a current prophylactic regimen of Factor VIII infusions or bispecific monoclonal antibodies (i.e. Hemlibra) Documented FDA-approved anti-AAV5 antibody test showing the patient is negative for anti-AAV5 antibodies Documented Factor VIII inhibitor titer test showing the patient is negative for Factor VIII inhibitors Prescriber attestation of performed liver health assessments Patient weight Medication is prescribed at an FDA approved dose The safety and effectiveness of repeat administration of Roctavian
	has not been evaluated and will not be approved.
Revision/Review Date: 10/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Skyclarys (omaveloxolone)
Drugs	Skyclarys (omaveloxolone)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Per FDA-approved prescribing information
Prescriber Restrictions	Prescriber must be a neurologist or in consultation with a neurologist or specialist with expertise in treating patients with Friedreich's Ataxia.
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	 Initial Authorization: Diagnosis of Friedreich's Ataxia, confirmed via genetic testing (must submit documentation) Modified FARS score ≥20 and ≤80 Medication is prescribed at an FDA approved dose Re-Authorization: Documentation or provider attestation of positive clinical response to Skyclarys therapy (i.e. improvement in symptoms, slowing of disease progression, etc.) Medication is prescribed at an FDA approved dose
Revision/Review Date 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Sleep Disorder Therapy
Drugs	Formulary status: Preferred, Prior Authorization Required
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Wakix: severe hepatic impairment (Child-Pugh class C) Sodium oxybate (Xyrem/Xyway): Succinic semialdehyde dehydrogenase deficiency
Required Medical Information	See "Other Criteria"
Age Restrictions	Per FDA approved prescribing information.
Prescriber Restrictions	Prescribed by or in consultation with a sleep specialist, neurologist, or other specialist in the treatment of the member's diagnosis (does not apply for diagnosis of shift-work disorder)
Coverage Duration	If the criteria are met, requests for modafinil, armodafinil, Sunosi, and Wakix will be approved with up to a 12 month duration. Requests for sodium oxybate products will be approved with up to a 3 month duration.
Other Criteria	 For all requests: Medication is being prescribed at an FDA approved dose Modafinil/armodafinil initial authorization: For a diagnosis of obstructive sleep apnea (OSA) documentation that the member has been compliant with or is unable to use positive airway pressure [continuous positive airway pressure (CPAP), bilevel positive airway pressure (BPAP), or automatic positive airway pressure (APAP)]. Sunosi initial authorization Documented trial and failure of modafinil or armodafinil or a documented medical reason for not utilizing these medications. For members with OSA:

- For a diagnosis of narcolepsy without cataplexy: documented trial and failure of (or medical reason for not using), BOTH of the following:
 - o Modafinil or armodafinil
 - Sunosi (solriamfetol)
- For a diagnosis of narcolepsy with cataplexy: documented trial and failure of, or medical reason for not using, the following:
 - o Dextroamphetamine

Sodium Oxybate (Xyrem/Xyway) initial authorization

- Medication is not being taken concurrently with sedative hypnotics
- For a diagnosis of narcolepsy without cataplexy:
 - O Documented trial and failure of, or a medical reason for not using, ALL of the following:
 - Either modafinil or armodafinil
 - Sunosi (solriamfetol)
 - Wakix (pitolisant)
 - o For Xyrem or Xywav: documented trial and failure of, or medical reason for not using generic sodium oxybate.
- For a diagnosis of narcolepsy with cataplexy:
 - o Documented trial and failure of each of, or medical reason for not using BOTH of the following:
 - Dextroamphetamine
 - Wakix (pitolisant)
 - o For Xyrem or Xywav: documented trial and failure of, or medical reason for not using generic sodium oxybate.
- For a diagnosis of idiopathic hypersomnia (Xywav only):
 - o Patient has a documented trial and failure of, or medical contraindication to, the following:
 - Modafinil or armodafinil

Reauthorization:

- Documentation has been submitted indicating member has experienced a clinical benefit from treatment (e.g. improvement on Epworth Sleepiness Score, reduction in frequency of cataplexy attacks)
- For a diagnosis of obstructive sleep apnea (OSA) documentation that the member continues to be compliant with or is unable to use positive airway pressure (CPAP, BPAP, or APAP)

Revision/Review Date 1/2024

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary

Field Name	Field Description
Prior Authorization	Serostim (somatropin, mammalian derived)
Group Description	* ′
Drugs Covered Uses	Serostim (somatropin, mammalian derived)
Covered Uses	Medically accepted indications are defined using the following sources:
	the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug
	Information for the Healthcare Professional (USP DI), the Drug Package
	Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical	
Information	See "Other Criteria"
Age Restrictions	N/A
Prescriber	Prescriber must be an HIV or infectious disease specialist
Restrictions	-
Coverage Duration	If all criteria are met, Serostim will be authorized for 12 weeks
Other Criteria	Initial Authorization:
	Patient has been receiving optimal highly active antiretroviral
	therapy (HAART) for at least three months prior to initiation
	 Prescriber attests that the patient has been evaluated for other
	possible causes of wasting/cachexia (e.g. malignancies) or fat
	redistribution (e.g. diabetes mellitus, lipodystrophy, etc.)
	Request is for the FDA approved or medically accepted dosing
	• Documentation supporting all of the following must be provided:
	Baseline and repeated evaluation every 3 months of
	patient's weight (most recent weight measurement must
	be within the past 3 months)
	o BMI and lean body mass measured by X-ray
	absorptionmetry (DEXA/DXA) were provided with the
	request
	o Demonstrable weight loss of greater than 10% of the
	baseline body weight associated with either chronic diarrhea (two or more loose stools per day for greater
	than or equal to 1 month) or chronic weakness and fever
	for greater than or equal to 1 month
	o Patient has had an insufficient response to a three month
	trial of an anabolic steroid such as oxandolone
	 Patient has had an insufficient response to a three month
	trial of one of the following agents: megestrol acetate,
	cyproheptadine, or dronabinol
	Re-authorization:
	The patient is receiving concomitant anti-HIV treatment
	<u> </u>

	 The prescriber has provided documentation of clinical benefit/response to Serostim. Request is for FDA approved or medically accepted dosing
Revision/Review Date: 7/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Skysona (elivaldogene autotemcel)
Drugs	Skysona (elivaldogene autotemcel)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Cerebral adrenoleukodystrophy secondary to head trauma Positive for human immunodeficiency virus type 1 or 2
Required Medical Information	See "Other Criteria"
Age Restrictions	See "Other Criteria"
Prescriber Restrictions	Prescriber must be a specialist in the disease being treated.
Coverage Duration	If all the criteria are met, the initial request will be approved for a one-time treatment.
Other Criteria	Initial Authorization:
	 Member has a diagnosis of early, active cerebral adrenoleukodystrophy (CALD) defined as all of the following: elevated very long chain fatty acid (VLCFA) levels confirmed mutations in the ABCD1 gene asymptomatic or mildly symptomatic (neurologic function score, NFS ≤ 1) Gadolinium enhancement on brain magnetic resonance imaging (MRI) of demyelinating lesions and Loes scores of 0.5-9 Member is a male 4-17 years of age Medication is prescribed at an FDA approved dose Member has not had a prior allogeneic hematopoietic stem-cell transplant (HSCT) Member has no HLA-matched sibling donor for HSCT, or a reason why HSCT with matched sibling donor is not appropriate. Re-Authorization:
Revision/Review Date: 2/2024	The safety and effectiveness of repeat administration of Skysona have not been evaluated and will not be approved.

Field Name	Field Description
Prior Authorization	SMN2 Splicing Modifiers for the Treatment of Spinal Muscular
Group Description	Atrophy (SMA)
Drugs	Evrysdi (risdiplam)
	Spinraza (nusinersen)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), and the Drug Package Insert (PPI).
Exclusion Criteria	For Spinraza: patient has previously received treatment with Zolgensma
	Concomitant use of Evrysdi and Spinraza
Required Medical Information	For Evrysdi: Patient's body weight
Age Restrictions	N/A
Prescriber	Prescriber must be a neurologist
Restrictions	
Coverage Duration	For Evrysdi: If all of the conditions are met, the request will be approved for 6 months for initial approval, followed by 12 months for reauthorization requests.
	For Spinraza: If all of the conditions are met, the request will be approved for 6 months for 5 doses (4 loading doses and 1st maintenance dose) for initial approval, and 12 months for 3 additional maintenance doses for reauthorization requests. If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.
Outs an Childrenia	
Other Criteria	 Member has a confirmed diagnosis of SMA types I, II or III and the molecular genetic test with mutation analysis was submitted that is positive for the genetic deletion of the exon 7 of the survival motor neuron (SMN1) For Spinraza: Documentation of genetic testing confirming either two or three copies of the SMN2 gene OR four copies of the SMN2 gene with symptomology of SMA For Evrysdi: Documentation of genetic testing confirming two to four copies of the SMN2 gene Baseline motor function or motor milestone achievement was

submitted with request [e.g. CHOP Infant Test of
Neuromuscular Disorders (CHOP-INTEND) or Hammersmith
Infant Neurological Examination (HINE) for Type 1 or
Hammersmith Functional Motor Scale Expanded Scores
(HFMSE) for Type II and Type III, or 6 minute walk test in
subjects able to walk]

• The request is for an FDA approved dose

Reauthorization

- Documentation of clinical response was submitted with request (e.g. improvement in motor function/motor milestone achievement scores using CHOP-INTEND or HFMSE, 6 minute walk test or HINE improvement in more categories of motor milestones than worsening, patient remains permanent ventilation free if no prior ventilator support)
- The request is for an FDA approved dose

Revision/Review Date 2/2024

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Sohonos
Group Description	
Drugs	Sohonos (palovarotene)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Pregnancy Use in patients younger than 8 years of age for females and 10 years of age for males
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber	Prescribed by or in consultation with an orthopedic specialist or
Restrictions	provider who specializes in rare connective tissue diseases
Coverage Duration	If all of the criteria are met, the initial or reauthorization request will be approved for up to 6 months taking into account patient specific scenarios.
Other Criteria	Initial Authorization:
Revision/Review Date: 2/2024	 Documented diagnosis of fibrodysplasia ossificans progressiva (FOP) Documented genetic testing of ACVR1 R206H mutation Attestation that patient is not pregnant and appropriate contraception methods will be used at least 1 month before treatment, during treatment, and 1 month after the last dose (if applicable) Documentation of weight for patients younger than 14 years old Medication is prescribed at an FDA approved dose Re-Authorization: Documentation or provider attestation of clinical benefit (i.e. volume reduction of heterotopic ossification) or worsening (i.e. flare-up presence and/or worsening of flare-ups) Attestation that patient is not pregnant and appropriate contraception methods will be used at least 1 month before treatment, during treatment, and 1 month after the last dose (if applicable) Documentation of weight for patients younger than 14 years old Medication is prescribed at an FDA approved dose
	Physician/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

r must be a specialist with appropriate expertise in treating the in question (such as an endocrinologist, neurologist/neurosurgeon, at, etc.). Consultation with appropriate specialist for the condition in its also acceptable.
ne criteria are met, the initial request will be approved for 6 months. nuation of therapy, the request will be approved for 12 months.
DA approved indications Medication requested is for an FDA approved indication and dose of the provider is requesting therapy with more than one somatostatin analog, or a somatostatin analog and a growth hormone receptor intagonist, then documentation must be submitted as to why patient is mable to be treated with monotherapy, or a medical reason was rovided why monotherapy is not appropriate. Megaly Matient has had an inadequate response to, or medical reason why, surgical treatment cannot be used. If the patient mild disease (e.g. mild signs and symptoms of growth formone excess, modest elevations in IGF-1) there is a documented rial of a dopamine agonist (e.g. bromocriptine mesylate, cabergoline) at a therapeutically appropriate dose or a documented medical reason why a dopamine agonist cannot be used

	For Cushing's Disease (pasireotide products only) • Patient must have had inadequate response or medical reason why surgical treatment cannot be used
Revision/Review Date 7/2023	 Reauthorization Medication requested is for an FDA approved indication and dose Documentation has been provided that demonstrates a clinical benefit (e.g. improvement in laboratory values, improvement or stabilization of clinical signs/symptoms, etc.)
	Medical Director/clinical reviewer must override criteria when, in his/her

Prior Authorization Group Description	Spravato
Drugs	Spravato (esketamine)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be 18 years age or older
Prescriber Restrictions	N/A
Coverage Duration	If all of the criteria are met, the initial request will be approved for 4 weeks. For continuation of therapy, the request will be approved for 6 months.
Other Criteria	Initial Authorization:
	 Member has a diagnosis of at least one of the following: Major depressive disorder with treatment-resistant depression Major depressive disorder with acute suicidal ideation or behavior Prescriber attests Spravato will be used in conjunction with an oral antidepressant. Medication is being prescribed at an FDA approved dosage. If Spravato is being requested for a diagnosis of major depressive disorder with treatment-resistant depression (i.e. without suicidal ideation or behavior) the member has either: Documented trial and failure of two preferred oral antidepressants (eg. SSRIs, SNRIs, TCAs) of at least a minimum effective dose for four (4) weeks or longer
	 Medication is prescribed at an FDA-approved dosage. Medication is being used in conjunction with an oral antidepressant. Documentation was submitted indicating the member has clinically benefited from therapy.
Revision/Review Date:	Medical Director/clinical reviewer must override criteria when, in his/her
10/2023	professional judgement, the requested item is medically necessary.

Prior Authorization Group Description	SymlinPen (pramlintide)
Drug	SymlinPen (pramlintide)
Formulary Status	Formulary
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	N/A
Age Restrictions	Member is 15 years of age or older
Prescriber Restrictions	N/A
Coverage Duration	If all of the conditions are met, requests will be approved for 12 months.
Other Criteria Revision/Review	 Criteria for Approval: Requested dose is appropriate per labeling Documented failure to meet desired glucose control with prandial insulin regimen despite excellent compliance Member will concurrently use prandial insulin with pramlintide Member's hemoglobin A1c is < 9% Attestation that the member has not had recurrent episodes of severe hypoglycemia requiring assistance during the past 6 months
Date: 4/2023	If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Synagis (palivizumab)
Group Description	
Drugs	Synagis (palivizumab)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Members who have received Beyfortus (nirsevimab-alip) for the current respiratory syncytial virus (RSV) season
Required Medical Information	See "other criteria"
Age Restrictions	N/A
Prescriber Restrictions	N/A
Coverage Duration	A maximum of 5 doses may be approved within the Respiratory Syncytial Virus (RSV) season. Requests for additional doses will be reviewed on a case-by case basis based on CDC surveillance reports, state/local health department recommendations, and other current medical literature.
Other Criteria	Infants less than 1 year of age at the onset of the respiratory syncytial virus (RSV) season (which typically starts November 1st, but may vary seasonally) AND have one of the following indications: • Born at less than 29 weeks, 0 days gestation • Born at less than 32 weeks, 0 days gestation AND had chronic lung disease of prematurity defined as greater than 21% oxygen for at least 28 days after birth • Born at any gestational age with hemodynamically significant heart disease including: • Cyanotic heart disease in consultation with a pediatric cardiologist • Acyanotic Heart disease with one of the following: • On heart failure medication and expected to require cardiac surgical procedure • Moderate to severe pulmonary hypertension • Cystic fibrosis with clinical evidence of chronic lung disease (CLD) and/or nutritional compromise in the first year of life • Born at any gestational age with pulmonary abnormality or neuromuscular disease that impairs the ability to clear secretions from the lower airway Infants less than 2 years of age at the onset of the RSV season (which
	typically starts November 1 st , but may vary seasonally) AND have one of the following indications:

- Born at less than 32 weeks, 0 days AND had a diagnosis of chronic lung disease of prematurity at birth as defined above AND had continued need for one of the following respiratory interventions in the 6 months preceding RSV season: Chronic steroids, chronic diuretics, supplemental oxygen
- Cystic fibrosis with manifestations of severe lung disease (previous hospitalization for pulmonary exacerbation in the first year of life or abnormalities on chest radiography or chest computed tomography that persist when stable) or weight for length less than the 10th percentile
- Born at any gestational age and will be profoundly immunocompromised during the RSV season, including:
 - Solid organ or hematopoietic stem cell transplant recipient
 - o Chemotherapy recipient
- Born at any gestational age and receiving a cardiac transplant

Revision/Review Date: 2/2024

Field Name	Field Description
Prior Authorization	Tavneos (avacopan)
Group Description	_
Drugs	Tavneos (avacopan)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Not Applicable
Required Medical Information	See "Other Criteria"
Age Restrictions	≥18 years old
Prescriber	Prescribed by or in consultation with a rheumatologist or
Restrictions	hematologist
Coverage Duration	If the conditions are met, the request will be approved for a 6-
	month duration for initial requests and a 6-month duration for
Other Criteria	renewal requests. Initial Authorization:
	 Diagnosis of one of the following subtypes of severe active antineutrophil cytoplasmic autoantibody (ANCA)-associated vasculitis: granulomatosis with polyangiitis (GPA) or microscopic polyangiitis (MPA) Prescriber attestation that Tavneos will be prescribed in combination with corticosteroids AND cyclophosphamide or rituximab, unless there is documented trial and failure, intolerance, inability to use, or contraindication to these therapies The prescribed dose is within FDA-approved dosing guidelines Documentation of baseline Birmingham Vasculitis Activity Score (BVAS) score Prescriber attestation that the patient will have liver function tests before treatment (ALT, AST, alkaline phosphate, and total bilirubin) and every 4 weeks after start of therapy for the first 6 months of treatment Prescriber attestation that the patient has been screened for and does not have active hepatitis B virus (HBV) infection at baseline Reauthorization: Documentation of remission (BVAS score of 0) OR improvement in BVAS score Prescriber attestation that patient has no abnormality in liver function tests (abnormality: ALT or AST >3 times

the upper limit of normal and bilirubin >2 times the upper limit of normal)

• Prescriber attestation that patient has no active HBV infection

• The prescribed dose is within FDA approved dosing guidelines

Revision/Review Date: 2/2024

Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Prior Authorization	
Group Description	Agents for Thrombocytopenia
-	Preferred Thrombocytopenia Agent(s):
	Promacta (eltrombopag)
	Doptelet (avatrombopag)
Drugs	
Diago	Non-Preferred Thrombocytopenia Agent(s):
	Nplate (romiplostim)
	Mulpleta (lusutrombopag) The distribution of the distributio
	Tavalisse (fostamatinib) Madically accorded in directions and defined using the following.
	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
Covered Uses	Pharmacopeia Drug Information for the Healthcare Professional (USP)
	DI), the Drug Package Insert (PPI), or disease state specific standard of
	care guidelines.
Exclusion Criteria	N/A
Required Medical	See "other criteria"
Information	
	For Doptelet, Mulpleta, and Tavalisse, member must be 18 years or
A D 4 - 1 - 4	older
Age Restrictions	ITP: For Promacta and Nplate, member must be 1 year or older.
	Severe aplastic anemia: For Promacta, member must be 2 years or older.
Prescriber Restrictions	
Treserred reserretions	If the criteria are met, the requests for Promacta, Nplate, and Tavalisse
	will be approved for 12 months. Mulpleta will be approved for a
Covers on Dynation	maximum of 7 days. Doptelet will be approved for 12 months if the
Coverage Duration	request is for ITP or for a maximum of 5 days if the request is for
	thrombocytopenia associated with chronic liver disease in adult
	patients requiring elective surgery.
Other Criteria	Chronic immune (idiopathic) thrombocytopenia (ITP):
	• Platelet count < 30,000 cells/microL
	Documented trial and failure, or intolerance, contraindication, ONE of the fall primary.
	to ONE of the following: O Glucocorticoids
	o Intravenous immune globulin (IVIG)
	o Rituximab
	o splenectomy
	If the request is for Doptelet, Nplate or Tavalisse, the member
	has a documented trial and failure, intolerance, or
	contraindication to Promacta
	Severe aplastic anemia (Promacta only):
	immunosuppressive agent OR there is a documented trial and
	Promacta is being prescribed in conjunction with at least one

- failure, intolerance, or contraindication to at least one immunosuppressive agent
- Platelet count < 20,000 cells/microL OR platelet cout < 30,000 cells/microL with bleeding OR reticulocyte count < 20,000 cells/microL OR absolute neutrophil count < 500 cells/microL

Thrombocytopenia in patients with Hepatitis C infection (Promacta only):

- Diagnosis of chronic hepatitis C
- Platelet count < 50,000 cells/microL
- Documented treatment with interferon-based therapy AND patient's degree of thrombocytopenia prevents the initiation or limits the ability to maintain interferon-based therapy

Thrombocytopenia associated with chronic liver disease in <u>adult</u> patients requiring elective surgery (Doptelet and Mulpleta only):

- Patient has a diagnosis of chronic liver disease and is scheduled to undergo a procedure
- Platelet count < 50,000 cells/microL
- For Mulpleta, approve if there is documentation of trial and failure, intolerance, or contraindication to use Doptelet

Revision/Review Date 4/2023

Field Name	Field Description
Prior Authorization Group Description	Transthyretin-mediated Amyloidosis Agents
Drugs	Preferred: Polyneurpathy – Onpattro (patisiran), Amvuttra (vutrisiran) Cardiomyopathy – Vyndaqel (tafamidis meglumine), Vyndamax (tafamidis) Non-preferred:
	Polyneuropathy – Tegsedi (inoterson) Or any other newly marketed agent
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be 18 years of age or older
Prescriber Restrictions	Prescriber must be neurologist, cardiologist, or specialist in the treatment of amyloidosis
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy the request will be approved for 6 months.
Other Criteria	
Other Criteria	 Regimen does not exceed FDA-approved dose/frequency Patient has not undergone a liver or heart transplant Patient is not taking any of these agents concurrently: Tegsedi, Onpattro, Amvuttra, Vyndaqel or Vyndamax If the request is for Onpattro, Amvuttra, or Tegsedi, patient has diagnosis of polyneuropathy of hereditary transthyretin-mediated amyloidosis as evidenced by: Documented transthyretin variant by genotyping One of the following: Patient has baseline polyneuropathy disability (PND) score ≤ IIIb Patient has a baseline FAP Stage 1 or 2 Patient has baseline neuropathy impairment (NIS) score ≥ 5 and ≤ 130 Patient has clinical signs/symptoms of neuropathy For Tegsedi, patient has contraindication to/or previous trial and failure of use of Onpattro or Amvuttra If the request is for Vyndaqel or Vyndamax, patient has diagnosis of cardiomyopathy of wild-type or hereditary

transthyretin-mediated amyloidosis as evidenced by all of the following:

- Documented transthyretin variant by genotyping or wildtype amyloidosis
- Documented amyloid deposit by biopsy or positive technetium 99m pyrophosphate (Tc 99m PYP) cardiac imaging
- o Patient has New York Heart Association (NYHA) functional class I, II, or III heart failure symptoms.

Re-authorization (for continuing and new patients to the plan):

- Patient's regimen does not exceed FDA-approved dose/frequency for the agent
- Patient has not undergone a liver or heart transplant
- Patient is not taking any of these agents concurrently: Tegsedi, Onpattro, Amvuttra, Vyndaqel or Vyndamax)
- Documented positive clinical response to therapy from baseline (stabilization/slowing of disease progression, improved neurological impairment, motor functions, improved NIS score, stabilization/reduced rate of decline in 6 minute walk test, etc.)
- If the request is for Vyndaqel/Vyndamax
 - o Patient has continued NYHA functional class I, II, or III heart failure symptoms

Continuation of Therapy Provision:

Members with history (within the past 90 days) of a non-formulary product are not required to try a formulary agent prior to receiving the non-formulary product.

Medical Director/clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Revision/Review Date:2/2024

Field Name	Field Description
Prior Authorization	Type I Interferon (IFN) Receptor Antagonist
Group Description	
Drugs Covered Uses	Saphnelo (anifrolumab-fnia) Medically accepted indications are defined using the following
Covered Uses	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
	standard of care guidelines.
Exclusion Criteria	Severe active central nervous system lupusActive lupus nephritis
Required Medical	
Information	See "Other Criteria"
Age Restrictions	<u>≥</u> 18 years
Prescriber	Prescriber must be a rheumatologist or in consultation with a
Restrictions	rheumatologist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6
	months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization:
Other Criteria	 Diagnosis of active moderate to severe systemic lupus
	erythematosus (SLE)
	 Member has tried all of the following (or there is a medical reason
	they cannot use these therapies) before Saphnelo:
	Hydroxychloroquine + Glucocorticoids
	One other immunosuppressant (i.e., methotrexate, azathioprine,
	calcineurin inhibitors, or mycophenolate)
	o Benlysta (belimumab), if member has autoantibody-positive SLE
	Prescriber attests member will not be using Saphnelo concurrently
	with Benlysta
	Medication is prescribed at an FDA approved dose
	Re-Authorization:
	Documentation or provider attestation of positive clinical response
	(i.e., reduction in signs and symptoms of SLE, fewer flares, reduced
	oral corticosteroid use, etc.)
	Prescriber attests member will not be using Saphnelo concurrently
	with Benlysta
Date: 10/2023	Medication is prescribed at an FDA approved dose
	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Urea Cycle Disorder Agents
Group Description	
Drugs	Preferred (PA required) sodium phenylbutyrate (Buphenyl)
	Non-Preferred (PA required) Pheburane (sodium phenylbutyrate) Olpruva (sodium phenylbutyrate) Ravicti (glycerol phenylbutyrate)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Ravicti: N-Acetylglutamate Synthetase (NAGS) deficiency is not a covered diagnosis
Required Medical Information	See "Other Criteria"
Age Restrictions	Per FDA approved prescribing information
Prescriber Restrictions	Prescriber must be (or have prescribed in consultation with) a metabolic disease specialist or healthcare provider experienced in the treatment of urea cycle disorders.
Coverage Duration	If all of the criteria are met, the initial request will be approved for 3 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization (for all agents):
	Medication is prescribed at an FDA approved dose.
	• Documentation of member's current weight or body surface area (depending on agent and patient in question).
	Diagnosis of a urea cycle disorder confirmed by genetic testing or enzyme analysis.
	 Provider attests patient's condition is unable to be managed solely with dietary protein restriction and/or amino acid supplementation. Provider attests the requested medication will be used in conjunction with ongoing dietary protein restriction and amino acid supplementation (if appropriate). Patient has not received a liver transplant.
	 Additionally for Pheburane: Trial and failure of a preferred urea cycle disorder agent, or a medical reason why this would be inappropriate must be provided.
	Additionally for Olpruva:

- Trial and failure of a preferred urea cycle disorder agent, or a medical reason why this would be inappropriate must be provided.
- Trial and failure of Pheburane is required before Olpruva will be considered, or a medical reason why this would be inappropriate must be provided. Requests for Olpruva due only to convenience of packaging will not be considered.

Additionally for Ravicti:

- Trial and failure of a preferred urea cycle disorder agent.
- Trial and failure of Pheburane or Olpruva is required before Ravicti will be considered, or a medical reason why this would be inappropriate must be provided. Reasons of taste/palatability will not be considered as a medical reason for waiving trial of Pheburane or Olpruva

Review Date: 7/2023

Re-Authorization:

- Documentation or provider attestation of positive clinical response (i.e. stabilization of patient's plasma ammonia levels).
- Medication is prescribed at an FDA approved dose.

If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization Group Description	Veopoz (pozelimab-bbfg)
Drugs	Veopoz (pozelimab-bbfg)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Patients with unresolved Neisseria meningitidis infection Concurrent use of another complement inhibitor (i.e. Soliris)
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must have experience in treating complement related disorders (i.e., gastroenterologist, immunologist, cardiologist, etc.)
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization:
	 Medication is prescribed at an FDA approved dose Diagnosis of CD55-deficient protein-losing enteropathy (PLE), also known as CHAPLE disease
	 Documentation of hypoalbuminemia (serum albumin <3.5 g/dL) Documentation of patient weight
	Re-Authorization:
	• Documentation or provider attestation of positive clinical response (i.e. symptom improvement, normalization of labs such as serum albumin (3.5-5.5 g/dL) and IgG concentrations, reduced hospitalizations and severe adverse events, increased quality of life, etc.)
	Documentation of patient weight
Revision/Review	Medication is prescribed at an FDA approved dose
Date: 10/2023	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior Authorization	Verquvo
Group Description	_
Drugs	Verquvo (vericiguat)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Pregnancy
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be 18 years or older
Prescriber Restrictions	Prescribed by or in consultation with a cardiologist
Coverage Duration	If all of the conditions are met, the request will be approved for 12 month duration.
Other Criteria	 Medication is prescribed at an FDA approved dose The medication is being used for the treatment of symptomatic chronic heart failure with reduced ejection fraction (less than 45%) Documentation that the patient has had a previous hospitalization for heart failure or has required outpatient IV diuretics Member is currently being prescribedthe following treatment regimens, or documentation has been provided that the member is not able to tolerate or has a contraindication to any of these agents: Angiotensin-converting enzyme (ACE) inhibitor OR angiotensin receptor/neprilysin inhibitor Mineralocorticoid receptor antagonist (e.g. spironolactone) Evidence based beta-blocker (i.e., bisoprolol, carvedilol, metoprolol succinate) Farxiga or Jardiance Patient is not concomitantly using a phosphodiesterase-5 (PDE-5) enzyme inhibitor (e.g. sildenafil) Negative pregnancy test (for females of reproductive age; as indicated) within 30 days of request Prescriber attests to discussing with females of reproductive potential the need to use effective forms of contraception during
Revision/Review Date 7/2023	Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Vesicular Monoamine Transporter 2 (VMAT2) Inhibitors
Drugs Covered Uses	Preferred: Austedo/Austedo XR (deutetrabenazine) tetrabenazine (Xenazine) Non-preferred: Ingrezza (valbenazine) Xenazine (tetrabenazine) Any other newly marketed agent Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Concurrent use of monoamine oxidase inhibitors (MAOIs)
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by, or in consultation with, a neurologist or psychiatrist
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	 Initial Authorization: Dose is within FDA-approved limits Prescriber attests patient will not be receiving treatment with any other VMAT2 inhibitor For requests for non-preferred drugs, a trial and failure of, or documented medical reason for not using, a preferred drug is required For approval for use in Tardive Dyskinesia (TD): Member must have clinical diagnosis of tardive dyskinesia that has persisted for the last 90 days, with documented baseline evaluation (e.g., Abnormal Involuntary Movement Scale (AIMS), the Tardive Dyskinesia Rating Scale (TDRS), etc.) For members on antipsychotics, the antipsychotic dose(s) must have been stable for a continuous 90 day period at some point prior to the request Prescriber has attempted at least ONE of the following strategies to manage the patient's condition, or has provided a clinical reason why NONE of the following are possible:

- o For members on first generation antipsychotics, switching to a second generation antipsychotic
- o Trial of benzodiazepines
- For VMAT2 inhibitors other than tetrabenazine, member has a documented medical reason (e.g., treatment failure, intolerance, hypersensitivity, contraindication) for not using tetrabenazine AND
 - o For Austedo requests:
 - Prescriber attests patient has no signs of hepatic impairment
 - For patients at risk for QT prolongation, prescriber attests a baseline ECG has been obtained
 - o For Ingrezza requests:
 - Must be dosed at one capsule per day

For approval for use in chorea associated with Huntington's Disease (HD):

- Patient must have diagnosis of moderate to severe Huntington's with chorea, with documented baseline Total Maximal Chorea (TMC) score provided
- For VMAT2 inhibitors other than tetrabenazine, member has a documented medical reason (e.g., treatment failure, intolerance, hypersensitivity, contraindication) for not using tetrabenazine AND
 - o For Austedo requests:
 - Prescriber attests patient has no signs of hepatic impairment
 - For patients at risk for QT prolongation, prescriber attests a baseline ECG has been obtained
 - o For Ingrezza requests:
 - Must be dosed at one capsule per day

Re-Authorization:

- Documentation or provider attestation of positive clinical response (e.g., improvement from baseline in average scores on the previously submitted symptom rating scale, decrease in symptoms, etc.)
- Medication is prescribed at an FDA approved dose

If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	\geq 2 years
Prescriber	Prescribed by or in consultation with a geneticist,
Restrictions	dermatologist, vascular surgeon, hematologist/oncologist, or other specialist in the treatment of PIK3CA-Related Overgrowth Spectrum (PROS)
Coverage Duration	If all of the criteria are met, the initial request will be approved for 6 months. For continuation of therapy, the request will be approved for 12 months.
Other Criteria	Initial Authorization:
Date: 07/2023	 Diagnosis of PROS Documented evidence of a mutation in the PIK3CA gene Patient has at least one target lesion identified on imaging Prescriber attests the patient's condition is severe or life-threatening and necessitates systemic treatment Medication is prescribed at an FDA approved dose Re-Authorization: Documentation of a positive clinical response defined as the patient achieving ALL of the following: At least a 20% reduction in the sum of measurable target lesion volume (1 to 3 lesions, via central review of imaging scans) None of the individual target lesions have ≥ 20% increase from baseline Absence of progression of non-target lesions Absence of any new lesions Prescriber attests the patient does not have any serious adverse
Date. 07/2023	 events or unacceptable toxicity Medication is prescribed at an FDA approved dose If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Description
Vimizim (elosulfase alfa)
Vimizim (elosulfase alfa)
Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
N/A
See "other criteria"
Patient must be 5 years of age or older.
Prescriber is, or is collaborating with another provider who is, a specialist in the treatment of Morquio A syndrome or other lysosomal storage disorders.
6 months
Initial Authorization (new to therapy):
 Patient has confirmed diagnosis of mucopolysaccharidosis IVA (MPS IVA, or Morquio A syndrome) via one of the following: Genetic testing Analysis of N-Acetylgalactosamine 6-sulfatase (GALNS) activity in leukocytes or fibroblasts Dosage does not exceed 2 mg/kg once a week. Patient must have completed a 6-minute walk test for baseline evaluation (must submit results with request) and be able to walk a minimum of 30 meters at baseline.
Re-Authorization:
 Dosage does not exceed 2 mg/kg once a week. Patient shows signs of improvement from baseline in a 6-minute walk test (must submit results with request)
Re-authorization for members new to the plan previously treated with Vimizim:
 Patient has confirmed genetic diagnosis of mucopolysaccharidosis IVA (MPS IVA, or Morquio A syndrome) via one of the following: Genetic testing Analysis of N-Acetylgalactosamine 6-sulfatase (GALNS) activity in leukocytes or fibroblasts Dosage does not exceed 2 mg/kg once a week. Patient must have completed a 6-minute walk test for baseline evaluation, and patient shows signs of improvement from baseline in a recent 6-minute walk test (must submit both results with request). If a baseline 6-minute walk test was not completed prior to initiation of Vimizim therapy, then:

0	A current test must be completed and patient must be
	able to walk a minimum of 30 meters (must submit
	results with request).

- Continued authorizations for Vimizim for patients without a completed baseline 6-minute walk test evaluation prior to initiation of therapy must continue to be able to walk a minimum of 30 meters in subsequent evaluations.
- o If patient is established on Vimizim therapy prior to enrollment on the plan, but is not able to walk a minimum of 30 meters, then medical justification is required as to how the patient continues to receive benefit from Vimizim therapy.

Group Description	White Blood Cell Stimulators
	Short-acting G-CSFs
	Nivestym (filgrastim-aafi)
	Granix (TBO-filgrastim) – PREFERRED
	Neupogen (filgrastim) vials, syringes – PREFERRED
	Zarxio (filgrastim-sndz)
	Releuko (filgrastim-ayow) – PREFERRED
	Or any newly market agent
	Long-acting G-CSFs
	Ziextenzo (pegfilgrastim-bmez) – PREFERRED
	Fulphila (pegfilgrastim-jmdb)
	Nyvepria (pegfilgrastim-apgf) - PREFERRED
Drugs	Udenyca (pegfilgrastim-cbqv)
	Neulasta (pegfilgrastim)
	Neulasta Onpro (pegfilgrastim)
	Rolvedon (eflapegrastim-xnst)
	Stimufend (pegfilgrastim-fpgk)
	Fylnetra (pegfilgrastim-pbbk)
	Or any newly market agent
	Other Hematopoietic Agents:
	Aphexda (motixafortide)
	Plerixafor (Mozobil)
	Leukine (sargramostim)
	or any newly marketed agent
	Medically accepted indications are defined using the following sources:
G 111	the Food and Drug Administration (FDA), Micromedex, American
Covered Uses	Hospital Formulary Service (AHFS), United States Pharmacopeia Drug
	Information for the Healthcare Professional (USPDI), the Drug Package
E 1 : C::	Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical	See "Other Criteria"
Information	
Age Restrictions	N/A
Prescriber	Prescriber must be a hematologist, an oncologist, or an infectious disease
Restrictions	specialist
	Initial authorization requests for all indications will be approved for 12 weeks.
	Re-authorization requests for all indications, with the exception of chronic
Coverage Duration	neutropenia, will be approved for 12 weeks. Re-authorization requests for
20,012,01	chronic neutropenia will be approved for 24 weeks. If the provider attests that
	the preferred medication is for a chronic or long-term condition,
04 03:	reauthorization will be approved for 12 months.
Other Criteria	Initial Authorization:
	• The drug is being used for an appropriate indication at an appropriate dose
	per "Covered Uses.
	• For ALL requests for treatment or prophylaxis of febrile neutropenia:

Documentation of the patient's absolute neutrophil count (ANC) within the last 30 day has been provided.

Requests for Non-Preferred Short-Acting G-CSFs:

• The member must have a documented treatment failure (e.g. failure to reach and/or maintain target ANC, prolonged febrile neutropenia, or infection requiring prolonged use) with the use of a preferred drug or has another documented medical reason (intolerance, hypersensitivity, stem cell collection, etc.) for not using preferred drug(s).

Requests for Non-Preferred Long-Acting G-CSFs:

- For Fulphila, Rolyedon, Stimufend, Fylnetra or Udenyca, requests: The member must have a documented treatment failure (i.e. failure to reach and/or maintain target ANC, prolonged febrile neutropenia or infection requiring prolonged anti-infection use) with an adequate trial (including dates, doses of therapy) of both Ziextenzo AND Nyepria or has another documented medical reason (intolerance, hypersensitivity, stem cell collection, etc.) for not using Ziextenzo AND Nyepria.
- For Neulasta or Neulasta Onpro requests: The member must have a documented treatment failure (i.e. failure to reach and/or maintain target ANC, prolonged febrile neutropenia or infection requiring prolonged anti-infection use) with an adequate trial (including dates, doses of therapy) of Ziextenzo AND Nyvepria AND either Fulphila or Udenyca or has another documented medical reason (intolerance, hypersensitivity, stem cell collection, etc.) for not using these therapies.

Revision/Review Date: 2/2024

Requests for Other Hematopoietic Agents:

- For Leukine requests: Documentation is submitted of the patient's current diagnosis, current body weight, body surface area (within 30 days of the request).
- For Plerixafor & Aphexda requests: Documentation must be submitted that the patient is using the drug in combination with a granulocyte-colony stimulating factor (G-CSF) agent. Requests for Aphexda must also have a documented treatment failure (i.e. failure to reach and/or maintain target ANC, prolonged febrile neutropenia or infection requiring prolonged anti-infection use) with plerixafor

Prior Authorization Group Description	Xifaxan (rifaximin)
Drugs	Xifaxan (rifaximin)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines
Exclusion Criteria	N/A
Required Medical Information	See "other criteria"
Age Restrictions	Patient must be 18 years of age or older
Prescriber Restrictions	N/A
Coverage Duration	Hepatic Encephalopathy: If the criteria are met, for initial authorization, the request will be approved for 6 months. For reauthorization, the request will be approved for 12 months. Irritable Bowel Syndrome with diarrhea (IBS-D): If the criteria are met, the request will be approved for 14 days. For re-authorization, the request may be approved up to 2 more times for a 14 day duration.
Other Criteria	 Initial Authorization: Hepatic Encephalopathy Patient has the diagnosis of hepatic encephalopathy Patient will be using lactulose concurrently or has a medical reason for being unable to use lactulose Irritable Bowel Syndrome with diarrhea (IBS-D) Patient has the diagnosis of moderate to severe IBS-D Patient has tried and failed or has a contraindication or intolerance to one formulary tricyclic antidepressant
Revision/Review Date: 7/2023	 Re-Authorization Documentation indicating the member has clinically benefited from therapy. Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization Group Description	Xolair for Asthma and Urticaria
Drugs	Xolair (omalizumab)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, the Drug Package Insert, and/or per the standard of care guidelines
Exclusion Criteria	Use of Xolair concomitantly with another pulmonary biologic (e.g. Fasenra, Nucala, Cinqair, Dupixent, Tezspire)
Required Medical Information	See "Other Criteria"
Age Restrictions	Asthma: ≥ 6 years Chronic idiopathic urticoria: > 12 years
Prescriber	Chronic idiopathic urticaria: ≥ 12 years
Restrictions	Prescribed by, or in consultation with, an allergist/immunologist, pulmonologist, or dermatologist
Coverage Duration	If all of the conditions are met, the request will be approved for up to a 4
Coverage Duration	month duration for initial requests and up to a 6 month duration for renewal requests.
Other Criteria	**For nasal polyposis, please refer to the "Biologic Agents for Nasal
other criteria	Polyposis" policy**
	- say Possas Possas
	Initial Authorization:
	Asthma:
	Member has at least a 6 month history of moderate to severe asthma
	 The drug is being prescribed at an approved dose according to member's weight and IgE level
	 Member is taking maximally tolerated ICS/LABA combination in addition to a LAMA (e.g. tiotropium) for at least 3 months, or there is a documented medical reason why the member is unable to take these medications
	 Member's asthma is uncontrolled as defined by having one of the following: Frequent severe exacerbations requiring two or more
	bursts of systemic glucocorticoids (more than three days each) in the previous year
	o History of serious exacerbation: at least one
	hospitalization, intensive care unit stay, or mechanical ventilation in the previous year
	o Airflow limitation defined as a forced expiratory volume
	in 1 second (FEV1) less than 80% of predicted O Poor symptom control including at least THREE of the
	following:
	 Asthma Control Questionnaire (ACQ) consistently > 1.5 or Asthma Control Test (ACT)

< 20

- Daytime asthma symptoms more than twice per week
- Use of an inhaled short acting B-2 agonist to relieve asthma symptoms more than twice per week (not including use prior to exercise)
- Limited physical activity due to asthma symptoms
- Nighttime awakening due to asthma symptoms
- Member has a positive immediate response on RAST test and/or skin prick test to at least 1 common allergen (e.g. dermatophagoides farinae, dermatop hagoides pteronyssinus, dog, cat, or cockroach) that is an asthma trigger (copy of results required).
- Pre-treatment serum IgE levels must be greater than or equal to 30 IU/mL.

Chronic Idiopathic Urticaria:

- The drug is prescribed at an approved dose
- Member has at least a 6 week history of urticaria
- Member requires oral corticosteroids to control symptoms
- The patient remains symptomatic despite a minimum two week trial (or has medical reason for not utilizing) of two preferred second generation H1 antihistamines at the maximum tolerated dose

Re-Authorization:

- The drug is being prescribed at an approved dose
- The member has experienced a clinical benefit from medication (e.g. decrease exacerbations, reduction in use of oral steroids)

Review/Revision Date: 10/2023

If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.

Field Name	Field Description
Prior	
Authorization	Zolgensma (onasemnogene abeparvovec-xioi)
Group Description	
Drugs	Zolgensma (onasemnogene abeparvovec-xioi)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package
	Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	 Patient has previously received this medication Advanced spinal muscular atrophy (SMA) (e.g., complete paralysis of limbs, permanent ventilator-dependence) Administration to premature neonates before reaching full-term gestational age
Required Medical Information	Patient's body weight
Age Restrictions	Patient must be less than 2 years of age
Prescriber Restrictions	Neurologist
Coverage Duration	Authorization will be placed for 1 dose.
Other Criteria	 Patient must meet all of the following criteria: Diagnosis of Spinal Muscular Atrophy (SMA) Bi-allelic mutations in the survival motor neuron 1 (SMN1) gene Documentation is provided that the patient has 3 copies or less of the SMN2 gene Baseline anti-AAV9 antibody titers of ≤1:50 measured using an enzyme-linked immunosorbent assay (ELISA) Dosing is consistent with FDA approved labeling The safety and effectiveness of repeat administration of Zolgensma have not been evaluated and will not be approved.
Revision/Review Date 10/2023	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Agents for the Treatment of Postpartum Depression
Group Description	
Drugs	Zulresso (brexanalone)
Committees	Zurzuvae (zuranolone)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	N/A
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescriber must be a psychiatrist or an obstetrician-gynecologist.
Coverage Duration	If all of the criteria are met, the initial request will be approved for a one-time administration of Zulresso or one 14-day course of Zurzuvae per postpartum period. Reauthorization will not be permitted.
Other Criteria	 Initial Authorization: Prescriber attestation of severe postpartum depression (PPD) diagnosis and submission of validated screening tool result(s) (e.g. Edinburgh Postnatal Depression Scale, Hamilton Depression Rating Scale) that requires quick onset where the patient cannot wait 4-6 weeks for the standard of care antidepressants to take effect Patient is ≤ 6 months postpartum with a major depressive episode without psychosis that began no earlier than the third trimester and no later than the first 4 weeks after delivery For requests for Zurzuvae: Attestation that the provider warned the patient not to drive for at least 12 hours after each dose. For requests for Zulresso: Healthcare facility and patient must be enrolled in the Zulresso REMS program prior to initiation of medication
Revision/Review Date: 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Gene Therapy for Hemophilia
Group Description	
Drugs	Hemgenix (etranacogene dezaparvovec)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
	standard of care guidelines.
Exclusion Criteria	Patient has previously received this medication
Required Medical Information	See "Other Criteria"
Age Restrictions	Patient must be 18 years of age or older
Prescriber Restrictions	Prescriber must be a hematologist
Coverage Duration	If all the criteria are met, the initial request will be approved for a one-
	time treatment.
Other Criteria	 Initial Authorization: Diagnosis of Hemophilia B (congenital Factor IX deficiency) with ONE of the following:
Date: 2/2024	Medical Director/clinical reviewer must override criteria when, in his/her professional judgement, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Gene Therapy for Regular Red Blood Cell (RBC) Transfusion
Group Description	Dependent Beta-Thalassemia
Drugs	Casgevy (exagamglogene autotemcel), Zynteglo (betibeglogene
	autotemcel)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
F 1 1 C 1	standard of care guidelines.
Exclusion Criteria	Repeat use of same gene therapy agent
D ' 1M I' 1	Trial of a different gene therapy agent after another has been used
Required Medical	See "Other Criteria"
Information Age Restrictions	
Prescriber Restrictions	Per FDA approved prescribing information
Prescriber Restrictions	Prescriber must be a hematologist
Coverage Duration	If all the criteria are met, the initial request will be approved for a
	one-time treatment for one gene therapy agent.
Other Criteria	Initial Authorization:
	Medication is prescribed at an FDA approved dose
	Member has a diagnosis of transfusion dependent beta-
	thalassemia
Revision/Review Date: 2/2024	Member requires regular RBC transfusions defined as ONE of
	the following:
	o History of ≥100 mL/kg/year of packed red blood cell
	(pRBCs) in the past 2 years
	o History of ≥8 transfusions of pRBCs per year in the past 2
	 years Patient has not had a prior HSCT or gene therapy treatment
	• If the request is for Zynteglo, a medical reason must be submitted
	why the patient is unable to use Casgevy
	Negative pregnancy test (if applicable)
	The safety and effectiveness of repeat administration of Casgevy
	or Zynteglo have not been evaluated and will not be approved.
	P.F. STORY

Field Name	Field Description
Prior Authorization Group Description	Gene Therapy for Sickle Cell Disease
Drugs	Casgevy (exagamglogene autotemcel), Lyfgenia (lovotibeglogene autotemcel)
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.
Exclusion Criteria	Repeat use of same gene therapy agent Trial of a different gene therapy agent after another has been used
Required Medical Information	See "Other Criteria"
Age Restrictions Prescriber Restrictions	Per FDA approved prescribing information Prescriber must be a hematologist or specialist in the treatment of sickle cell disease
Coverage Duration	If all the criteria are met, the initial request will be approved for a one-time treatment for one gene therapy agent. If the conditions are not met, the request will be sent to a Medical Director/clinical reviewer for medical necessity review.
Other Criteria	 Medication is prescribed at an FDA approved dose Member has a diagnosis of sickle cell disease Member has experienced at least 2 severe vaso-occlusive crises/events per year in the past 2 years defined as either: VOE requiring a hospitalization or multiple visits to an emergency department/urgent care over 72 hours and receiving intravenous medications at each visit priapism lasting > 2 hours and requiring a visit to a medical facility acute chest syndrome splenic sequestration Documentation was provided that the member has been taking hydroxyurea at the maximum tolerated dose and has been compliant within the last 6 months (or a medical reason was provided why the patient is unable to use hydroxyurea) Documentation was provided that the member had a trial and failure of, or a medical reason was provided why the patient is unable to trial two of the following agents

Revision/Review Date: 1/2024	• If the request is for Lyfgenia, a medical reason must be submitted why the patient is unable to use Casgevy.
	The safety and effectiveness of repeat administration of Casgevy or Lyfgenia have not been evaluated and will not be approved.

Prior Authorization Group Description	Specialty Biological Agents for Crohn's Disease		
Description	Preferred Biological Agents: Humira (adalimumab)		
Drugs	Non-Preferred Biological Agents: Cimzia (certolizumab) Entyvio (vedolizumab) Rinvoq (upadacitinib) Stelara (ustekinumab) Tysabri (natalizumab) Amjevita (adalimumab) Hadlima (adalimumab) Cyltezo (adalimumab) Yusimry (adalimumab) Hulio (adalimumab) Hulio (adalimumab) Hyrimoz (adalimumab) Idacio (adalimumab) Yuflyma (adalimumab) adalimumab fkjp adalimumab adaz Or any newly marketed agent		
Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.		
Exclusion Criteria	N/A		
Required Medical Information	N/A		
Age Restrictions	According to package insert		
Prescriber Restrictions	Prescribed by, or in consultation with, a gastroenterologist		
Coverage Duration	If all of the conditions are met, the request will be approved for 12 month duration.		
Other Criteria	Initial Authorization: • The request is for an appropriate dose for member based on age and weight • ONE of the following: • The member has a diagnosis of severe/fulminant Crohn's disease or perianal/fistulizing Crohn's disease • The member has a diagnosis of moderate-to-severe/moderate-to-high risk Crohn's disease AND has had an adequate trial of, or documented medical reason for not using, one of the following: corticosteroids, azathioprine, 6-mercaptupurine, or methotrexate • The member has a diagnosis or moderate-to-severe/moderate-to-high risk Crohn's disease AND has evidence of active disease despite treatment with oral or intravenous corticosteroids • If the request is for a non-preferred agent, there must be documentation of an adequate trial of preferred biologic agent consistent with pharmacy claims/medical chart data.		

	-		
	Reauthorization:		
	• The medication is being prescribed by a gastroenterologist at an FDA-approved dose.		
	• The member has been receiving the medication and there is documentation that a clinical benefit was observed.		
Continuation of Therapy:			
Revision/Review Date: 7/2023	 Members with history (within the past 90 days) of a non-preferred biological agent are not required to try the prerequisite therapy noted above prior to receiving the non- preferred agent. Members with history (within the past 90 days) of a preferred biological agent are not required to try the prerequisite therapy noted above prior to receiving the preferred biological agent. 		
	Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.		

Prior Authorization Group Description	Specialty Drugs for Ulcerative Colitis		
Drugs	Preferred Agents: Humira (adalimumab) Xeljanz IR (tofacitinib) Non-Preferred agents: Simponi (golimumab) Entyvio (vedolizumab) Xeljanz XR (tofacitinib) Stelara (ustekinumab) Zeposia (ozanimod) Rinvoq (upadacitinib) Amjevita (adalimumab) Hadlima (adalimumab) Cyltezo (adalimumab) Yusimry (adalimumab) Hulio (adalimumab) Hyrimoz (adalimumab) Hyrimoz (adalimumab) Yuflyma (adalimumab) Yuflyma (adalimumab) adalimumab fkjp adalimumab adaz		
Covered Uses	Or any newly marketed agent Medically accepted indications are defined using the following sources: the Food an Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Profession		
	(USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.		
Exclusion Criteria	N/A		
Required Medical Information	N/A		
Age Restrictions	According to package insert		
Prescriber Restrictions	Prescribed by, or in consultation with, a gastroenterologist		
Coverage Duration	If all of the conditions are met, the request will be approved for 12 month duration.		
Other Criteria	 Initial Authorization: The member has a diagnosis of moderate to severely active ulcerative colitis The medication is being prescribed at an appropriate FDA approved dose (for age and weight) The member has had a an adequate trial of, or a documented medical reason for not using, at least one conventional therapy (e.g. sulfasalazine, mesalamine, 6-mercaptopurine, azathioprine, budesonide MMX (Uceris), or oral corticosteroids) If the request is for a non-preferred agent, documented (consistent with pharmacy claims/medical record data/chart notes/physician attestation), adequate trial of a preferred drug. 		

• For requests for Zeposia (ozanimod): Documentation of results of varicella zoster virus (VZV) antibody testing indicating previous infection or vaccination. If negative, subsequent documentation of VZV vaccination

Reauthorization:

- The medication is being recommended or prescribed by a gastroenterologist for an FDA-approved indication at an FDA-approved dose.
- The member has been receiving the medication and documentation was provided that the prescriber has evaluated the member and recommends continuation of therapy (clinical benefit).

Continuation of Therapy:

Revision/Review Date: 7/2023

- Members with history (within the past 90 days) of a non-preferred agent are not required to try the prerequisite therapy noted above prior to receiving the nonpreferred agent.
- Members with history (within the past 90 days) of a preferred agent are not required to try the prerequisite therapy noted above prior to receiving the preferred agent

Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Prior Authorization Group Description	Specialty Biological Agents for Psoriasis		
	PREFERRED BIOLOGICAL AGENTS:		
	TNF Inhibitors: Enbrel (etanercept) Humira (adalimumab) IL-17 Inhibitors: Taltz (ixekizumab) PDE-4 Inhibitor Otezla (apremilast)

Covered Uses	Or any newly marketed agent Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.		
Exclusion Criteria	N/A		
Required Medical Information	N/A		
Age Restrictions	According to package insert		
Prescriber Restrictions	Prescribed by, or in consultation with, a rheumatologist		
Coverage Duration	If all of the conditions are met, the request will be approved for 12 month duration.		
Other Criteria	 Initial Authorization: The member has a diagnosis of rheumatoid arthritis The medication is being prescribed at an appropriate FDA-approved dose (for age and weight) The member has an adequate trial with, or medical reason for not using, at least one non-biologic disease modifying anti-rheumatic drug (DMARD) (e.g. methotrexate, leflunomide, sulfasalazine or hydroxychloroquine), as noted in pharmacy claims/medical record data/chart notes/physician attestation If the request is for a non-preferred biological agent, documented (consistent with pharmacy claims/medical record data), adequate trial of at least two 		

preferred products or medical reason as to why patient is unable to utilize the preferred products

Reauthorization:

- The medication is being prescribed at an FDA-approved dose
- The member has been receiving the medication and documentation was provided that the prescriber has evaluated the member and recommends continuation of therapy (clinical benefit).
- For members who require dose increases to Humira 40 mg weekly or 80 mg every other week the member has had an adequate trial with methotrexate in combination with Humira at their current dose or has a medical reason (e.g. intolerance, hypersensitivity, contraindication) for not receiving methotrexate in combination with Humira.

Continuation of Therapy:

- Members with history (within the past 90 days) of a non-preferred biological product are not required to try the prerequisite therapy noted above prior to receiving the non-preferred agent.
- Members with history (within the past 90 days) of two preferred biological agents are not required to try the prerequisite therapy noted above prior to receiving the preferred biological agent.

Revision/Review Date: 7/2023

Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

	Hyrimoz (adalimumab)		
	Idacio (adalimumab)		
	Yuflyma (adalimumab)		
	adalimumab fkjp		
	adalimumab adazOr any newly marketed agent		
	Medically accepted indications are defined using the following sources: the Food and		
	Drug Administration (FDA), Micromedex, American Hospital Formulary Service		
Covered Uses	(AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional		
Covered Oses	(USP DI), the Drug Package Insert (PPI), or disease state specific standard of care		
	guidelines.		
Exclusion Criteria	N/A		
Required Medical			
Information	N/A		
Age Restrictions	According to package insert		
Prescriber			
Restrictions	Prescribed by, or in consultation with, a rheumatologist		
Coverage Duration	If all of the conditions are met, the request will be approved for 12 month duration.		
Other Criteria	Initial Authorization:		
	• The member has a diagnosis of an approved form of spondyloarthritis		
	• The medication is being prescribed at an appropriate dose (for age and weight) per		
	compendia		
	• The member has had an adequate trial with, or documented medical reason for not		
	using, two different nonsteroidal anti-inflammatory drugs (NSAIDs) or		
	cyclooxegenase-2 (COX-2) inhibitors, each for at least two weeks, as noted in		
	pharmacy claims/medical record data/chart notes/physician attestation		
	• For active ankylosing spondylitis without axial symptoms (prominent peripheral		
	arthritis) the member has also had an adequate trial and failure, or medical reason for		
	not using, a conventional DMARD (e.g. sulfasalazine, leflunomide, or methotrexate)		
	• If the request is for a non-preferred biological agent, documented trial of (consistent		
	with pharmacy claims/medical record data, OR for new members to the health plan		
	consistent with medical chart history) at least two preferred products with different		
	mechanisms of action or medical reason as to why patient is unable to utilize the		
	preferred biological agents.		

Reauthorization:

- The medication is being prescribed at an appropriate dose per compendia.
- The member has been receiving the medication and documentation was provided that the prescriber has evaluated the member and recommends continuation of therapy (clinical benefit).

Continuation of Therapy:

- Members with history (within the past 90 days) of a non-preferred biological product are not required to try the prerequisite therapy noted above prior to receiving the non-preferred agent.
- Members with history (within the past 90 days) of a preferred biological agent are not required to try the prerequisite therapy noted above prior to receiving the preferred biological agent.

Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Covered Uses	Medically accepted indications are defined using the following sources: the Food and Drug Administration (FDA), Micromedex, American Hospital Formulary Service (AHFS), United States Pharmacopeia Drug Information for the Healthcare Professional (USP DI), the Drug Package Insert (PPI), or disease state specific standard of care guidelines.		
Exclusion Criteria	N/A		
Required Medical Information	N/A		
Age Restrictions	According to package insert		
Prescriber Restrictions	Prescribed by, or in consultation with, a specialist in the field to treat the member's respective medical condition		
Coverage Duration	If all of the conditions are met, the reques	t will be approved for a 12 month duration.	
Other Criteria	 Initial Authorization: Request has a medically accepted use per the medical compendia or standard of care guidelines for member (e.g. age/weight) at recommended dose 		
	 The member has an adequate trial of all first line therapies as recommended by the medical compendia or standard of care guidelines and is consistent with pharmacy claims/medical record data/chart notes/physician attestation (including dates and dosing of all first line therapies) OR member has a documented medical reason (e.g. allergy, intolerance, contraindication) for not using all first line therapies to manage their condition. If the request is for a non-preferred biological agent, documented (consistent with pharmacy claims/medical record data) adequate trial of at least two preferred products (with different mechanisms of action where applicable) with a medically-accepted use for the patient's condition per standard of care guidelines, or medical reason as to why patient is unable to utilize the preferred products Reauthorization: 		
	Documentation submitted indicates that the member has obtained clinical benefit		

	from the medication. • The medication is prescribed at a compendia/guideline/FDA-approved dosage
Revision/Review Date: 7/2023	 Continuation of Therapy: Members with history (within the past 90 days) of a non-preferred biological agent are not required to meet the prerequisite drug therapy above prior to receiving the non-preferred agent. Members with history (within the past 90 days) of guideline-recommended, preferred biological agents are not required to try the above-mentioned first line therapies prior to receiving the preferred biological agent. Medical Director/Clinical reviewer must override criteria when, in his/her professional judgment, the requested item is medically necessary.

Field Name	Field Description
Prior Authorization	Tzield (teplizumab-mzwv)
Group Description	
Drugs	Tzield (teplizumab-mzwv)
Covered Uses	Medically accepted indications are defined using the following
	sources: the Food and Drug Administration (FDA), Micromedex,
	American Hospital Formulary Service (AHFS), United States
	Pharmacopeia Drug Information for the Healthcare Professional
	(USP DI), the Drug Package Insert (PPI), or disease state specific
	standard of care guidelines.
Exclusion Criteria	Type 2 diabetes (T2D)
Required Medical Information	See "Other Criteria"
Age Restrictions	According to package insert
Prescriber Restrictions	Prescribed by or in consultation with an endocrinologist
Coverage Duration	If all the criteria are met, the initial request will be approved for a one-
	time treatment.
Other Criteria	Initial Authorization:
	Medication is prescribed at an FDA approved dose
	• Diagnosis of stage 2 type 1 diabetes (T1D) confirmed by presence of at least two of the following autoantibodies:
	 Glutamic acid decarboxylase 65 (GAD) autoantibody Insulin autoantibody (IAA)
	 Insulinoma-associated antigen 2 autoantibody (IA-2A)
	Zinc transporter 8 autoantibody (ZnT8A)Islet cell autoantibody (ICA)
	Abnormal glucose on an oral glucose-tolerance test (or alternative)
	glycemic test if an oral glucose-tolerance test is not available)
Date: 2/2024	If all of the above criteria are not met, the request is referred to a Medical Director/Clinical Reviewer for medical necessity review.
