## Strategies to Improve Birth-Dose Hepatitis B Vaccination Rates

Registration is now open for this live, interactive webinar

*This 60-minute interactive webinar is brought to you by Quality Insights and AmeriHealth Caritas Delaware. Information presented is appropriate for physicians, physician assistants, nurse practitioners, nurses, and other clinical support staff.*

### Learning Objectives

- Define pediatric dosing and scheduling of hepatitis B vaccination.
- Emphasize the importance of delivering a birth dose.
- Review hepatitis B testing and vaccination procedures for all pregnant women, and children.
- Discuss vaccine hesitancy and tools for addressing hesitancy with patients within your practice.

### Course Content

- The current impact and prevalence of hepatitis B.
- Interventions to prevent hepatitis B transmission.
- Hepatitis B vaccination data for the state of Delaware.
- Resources for addressing vaccine hesitancy.

### No-Cost CME

The Medical Society of Delaware has approved this continuing medical education activity for AMA PRA Category 1 Credit™.
